Sidereus Nuncius Stella Polaris:

Sidereus Nuncius & Stella Polaris Tore Frängsmyr, 1997 Galileo's Telescope Massimo Bucciantini, Michele Camerota, Franco Giudice, 2015-03-23 An innovative exploration of the development of a revolutionary optical device and how it changed the world Between 1608 and 1610 the canopy of the night sky changed forever ripped open by an object created almost by accident a cylinder with lenses at both ends Galileo's Telescope tells the story of how an ingenious optical device evolved from a toy like curiosity into a precision scientific instrument all in a few years In transcending the limits of human vision the telescope transformed humanity's view of itself and knowledge of the cosmos Galileo plays a leading but by no means solo part in this riveting tale He shares the stage with mathematicians astronomers and theologians from Paolo Sarpi to Johannes Kepler and Cardinal Bellarmine sovereigns such as Rudolph II and James I as well as craftsmen courtiers poets and painters Starting in the Netherlands where a spectacle maker created a spyglass with the modest magnifying power of three the telescope spread like technological wildfire to Venice Rome Prague Paris London and ultimately India and China Galileo's celestial discoveries hundreds of stars previously invisible to the naked eye lunar mountains and moons orbiting Jupiter were announced to the world in his revolutionary treatise Sidereus Nuncius Combining science politics religion and the arts Galileo's Telescope rewrites the early history of a world shattering innovation whose visual power ultimately came to embody meanings far beyond the science of the stars Praise for Galileo's Telescope One of the most fascinating stories in the history of science Mark Archer The Wall Street Journal In broad outline the story of Galileo and the first use of a telescope in astronomy is well known Bucciantini Camerota and Giudice take a new look at this seminal event by focusing on how the news spread across Europe and how it was received Their well written narrative examines the central issues using papers paintings letters and other contemporary documents After four centuries Galileo's reputation has been thoroughly vindicated D E Hogg Choice **Apotheosis of the North** Bernd Roling, Bernhard Schirg, Stefan Heinrich Bauhaus, 2017-05-08 Despite its enormous extent and impact the Swedish scholarship produced in the context of Olof Rudbeck's monumental Atlantica 4 vols 1679 1702 has hitherto escaped attention outside Scandinavia The present volume explores the numerous disciplines that comprised this one of the last but grandest appropriations of the classical heritage in early modern times In the decades around 1700 dozens of scholars all around the Baltic Sea embarked on studies of classical and Norse mythology material remains and antiquities of languages botany and zoology as well as biblical scholarship in order to reveal the primordial status of ancient Sweden Fusing together numerous disciplines within Rudbeck's elaborate and all encompassing epistemological framework they gave to a nation that had advanced to the rank of a European superpower a narrative of a glorious past that matched its contemporary pretensions Presenting case studies stretching from the 17th to the 19th century and across a wide number of fields this volume traces the extent and longue dur e of one of the most fascinating and underestimated episodes in European intellectual history **The Natural philosophy of Emanuel Swedenborg** David

Duner,2012-07-31 Although Emanuel Swedenborg 1688 1772 is commonly known for his spiritual philosophy his early career was focused unnatural science During this period Swedenborg thought of the world was like a gigantic machine following the laws of mechanics and geometry This volume analyzes this mechanistic worldview from the cognitive perspective by means of a study of the metaphors in Swedenborg s texts The author argues that these conceptual metaphors are vital skills of the creative mind and scientific thinking used to create visual analogies and abstract ideas This means that Swedenborg s mechanistic and geometrical worldview allowed him to perceive the world as mechanical and geometrical Swedenborg thought with books and pens The reading gave him associations and clues forced him to interpret and gave him material for his intellectual development The Power of Images in Early Modern Science Wolfgang Lefèvre,Jürgen Renn,Urs

Schoepflin,2012-12-06 Wolfgang Lefevre Jiirgen Renn and Vrs Schoepflin General The origin of this volume is a workshop held has a deeper more complex structure which in 1997 in Berlin as part of a series of work must be assumed if its analysis is only based shops organized in the framework of the on text In fact the analysis of the function of Network on Science and the Visual Images images in the early modern period shows that 1500 1800 funded by the European Science they mediated not only between science and Foundation and initiated by William Shea its cultural context but also between practi Meanwhile a selection of contributions was cal knowledge and its theoretical reflection thoroughly revised and prepared for publica in scientific theories tion together with additionally invited papers The analysis of images thus constitutes an for this book The result is a volume which important branch of the history of science we hope corresponds to the original inten that on the one hand is conceived of as part tion of the Network to contribute to a histori of a more general history of culture and on cal reconstruction of the role of images in the the other hand as a historical epistemology of history of science still neglected because of knowledge This book is not a systematic and the traditional focus of the history of science comprehensive account of scientific images on texts corresponding to a concentration on and the early modern period

Panaceia's Daughters Alisha Rankin,2013-03-19 Panaceia s Daughters provides the first book length study of noblewomen s healing activities in early modern Europe Drawing on rich archival sources Alisha Rankin demonstrates that numerous German noblewomen were deeply involved in making medicines and recommending them to patients and many gained widespread fame for their remedies Turning a common historical argument on its head Rankin maintains that noblewomen s pharmacy came to prominence not in spite of their gender but because of it Rankin demonstrates the ways in which noblewomen s pharmacy was bound up in notions of charity class religion and household roles as well as in expanding networks of knowledge and early forms of scientific experimentation The opening chapters place noblewomen s healing within the context of cultural exchange experiential knowledge and the widespread search for medicinal recipes in early modern Europe Case studies of renowned healers Dorothea of Mansfeld and Anna of Saxony then demonstrate the value their pharmacy held in their respective roles as elderly widow and royal consort while a study of the long suffering Duchess

Elisabeth of Rochlitz emphasizes the importance of experiential knowledge and medicinal remedies to the patient's experience of illness Boreas rising Bernd Roling, Bernhard Schirg, 2019-07-08 For a long time studies on northern antiquarianism have focused on individual nations This volume introduces this phenomenon in a transnational perspective In the course of the 17th and 18th centuries the Baltic Sea was at the centre of a culture of debate whose networks encompassed numerous European centres of learning When the countries around the Baltic began to explore their own antiquities in this period the prevailing climate of competition between Sweden Denmark Russia and the German countries soon permeated the construction and presentation of their own pasts Exploring the ancient literatures and monuments of Iceland Sweden or Denmark studying runic writings or the Sami tradition the northern scholars were establishing an individual architecture of history and so extending the horizon of their emerging nations both geographically and historically The contributions in this volume provide case studies illustrating the role that scholarship art and literature played in establishing and maintaining national claims around the Baltic Sea The variety of methods combined for this purpose makes this book of interest to intellectual historians as well as historians of art and early modern science **Literature and**

Identity in Italian Baroque Travel Writing Nathalie Hester, 2016-12-05 This first full length study in English on seventeenth century Italian travel writing enriches our understanding of an unusually fertile period for Italian contributions to the genre The intrinsic qualities of this literature can now be grasped in terms of the larger question of cultural identity in Italy For Hester the specifically literary characteristics of Italian travel writing including its humanism or Petrarchism highlight the classic eminence throughout Europe of a prestigious tradition inherent to Italy one compensating then for the peninsula's lack of a national political identity Appeals to the cultural authority of that tradition represent a means of addressing and overcoming anxieties about the Italian subject's diasporic status during the Golden Age of European global colonial expansion Self funded travelers Francesco Carletti Pietro Della Valle Francesco Belli Francesco Negri and Giovanni Francesco Gemelli Careri are the major authors studied who journeyed through Europe the Middle East Asia and America

Placing the Enlightenment Charles W. J. Withers, 2008-09-15 The Enlightenment was the age in which the world became modern challenging tradition in favor of reason freedom and critical inquiry While many aspects of the Enlightenment have been rigorously scrutinized its origins and motivations its principal characters and defining features its legacy and modern relevance the geographical dimensions of the era have until now largely been ignored Placing the Enlightenment contends that the Age of Reason was not only a period of pioneering geographical investigation but also an age with spatial dimensions to its content and concerns Investigating the role space and location played in the creation and reception of Enlightenment ideas Charles W J Withers draws from the fields of art science history geography politics and religion to explore the legacies of Enlightenment national identity navigation discovery and knowledge Ultimately geography is revealed to be the source of much of the raw material from which philosophers fashioned theories of the human condition

Lavishly illustrated and engagingly written *Placing the Enlightenment* will interest Enlightenment specialists from across the disciplines as well as any scholar curious about the role geography has played in the making of the modern world

Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn
