Warner, 2009-01-18 Aridity prevails over more than one third of the land area of the Earth and over a significant fraction of the oceans as well Yet to date there has been no comprehensive reference volume or textbook dealing with the weather processes that define the character of desert areas Desert Meteorology fills this gap by treating all aspects of desert weather such as large scale and local scale causes of aridity precipitation characteristics in deserts dust storms floods climate change in deserts precipitation processes desertification land surface physics of deserts numerical modelling of desert atmospheres and the effect of desert weather on humans A summary is provided of the climates and surface properties of the desert areas of the world The book is written with the assumption that the reader has only a basic knowledge of meteorology physics and calculus making it useful

to those in a wide range of disciplines It includes review questions and problems for the student This comprehensive volume will satisfy all who need to know more about the weather and climate of arid lands It will appeal especially to advanced students and researchers in environmental science meteorology physical geography hydrology and engineering

The Desert Michael Welland, 2014-09-15 From endless sand dunes and prickly cacti to shimmering mirages and green oases deserts evoke contradictory images in us They are lands of desolation but also of romance of blistering Mojave heat and biting Gobi cold Covering a quarter of the earth's land mass and providing a home to half a billion people they are both a physical reality and landscapes of the mind The idea of the desert has long captured Western imagination put on display in films and literature but these portrayals often fail to capture the true scope and diversity of the people living there Bridging the scientific and cultural gaps between perception and reality The Desert celebrates our fascination with these arid lands and their inhabitants as well as their importance both throughout history and in the world today Covering an immense geographical range Michael Welland wanders from the Sahara to the Atacama depicting the often bizarre adaptations of plants and animals to these hostile environments He also looks at these seemingly infertile landscapes in the context of their place in history as the birthplaces not only of critical evolutionary adaptations civilizations and social progress but also of ideologies Telling the stories of the diverse peoples who call the desert home he describes how people have survived there their contributions to agricultural development and their emphasis on water and its scarcity He also delves into the allure of deserts and how they have been used in literature and film and their influence on fashion art and architecture As Welland reveals deserts may be difficult to define but they play an active role in the evolution of our global climate and society at large and their future is of the utmost importance Entertaining informative and surprising The Desert is an intriguing new look at these seemingly harsh and inhospitable landscapes

Sand Michael Welland, 2009-01-15 From individual grains to desert dunes from the bottom of the sea to the landscapes of Mars and from billions of years in the past to the future this is the extraordinary story of one of nature's humblest most powerful and most ubiquitous materials Told by a geologist with a novelist's sense of language and narrative Sand examines the science sand forensics the physics of granular materials sedimentology paleontology and archaeology planetary exploration and at the same time explores the rich human context of sand Interwoven with tales of artists mathematicians explorers and even a vampire the story of sand is an epic of environmental construction and destruction an adventure in staggering scales of time and distance yet a tale that encompasses the ordinary and everyday Sand in fact is all around us it has made possible our computers buildings and windows toothpaste cosmetics and paper and it has played dramatic roles in human history commerce and imagination In this luminous kinetic revelatory account we do indeed find the world in a grain of sand

Getting Over the Color Green Scott Slovic, 2001 Desert vistas are often deemed vacant inhospitable wastelands Don't suggest that to Joy Harjo Pat Mora or other contemporary southwestern writers In these arid stretches often devoid of green today's southwestern writers see

pyrotechnic colors and Gothic shapes that excite and often overwhelm the imagination And they capture this excitement in words that fix these desert images in the minds of readers who may too often look at the world through green colored glasses This anthology of contemporary nature writing from the Greater Southwest brings together a host of writers including peers of Edward Abbey such as Charles Bowden and Ann Zwinger and representatives of a new generation of writers such as Rick Bass and Terry Tempest Williams The book is an eclectic blend of nonfiction and fiction field notes and poetry through which artists of diverse backgrounds both celebrate and illuminate the unique vitality and complexity of southwestern literature proving that green is only one of many colors on their palette The selections included here range all across the southwestern landscape and explore adventures in the wild topics in natural history living close to the land and efforts at conservation and restoration They clearly demonstrate that there is grace and beauty in this often maligned part of the world both in the human traditions that have developed in the region and in the natural features of the desert itself **Sarah Anderson's Travel Companion** Sarah Anderson,2004 For those who want to find out more about Africa and the Middle East than can be found in a normal guidebook Sarah Anderson s Travel Companion offers a delightfully informed personal selection including travel literature illustrated volumes biographies and memoirs and more Travelers and readers can discover novels set in Kenya cultural studies of Syria or guidebooks best suited to their tastes This is an indispensable companion for every serious reader of travel writing Forbes ,1996
