*Skiing into Modernity* Andrew Denning, 2014-11-26 *Skiing into Modernity* is the story of how skiing moved from Europe's Scandinavian periphery to the mountains of central Europe where it came to define the modern Alps and set the standard for skiing across the world Denning offers a fresh sophisticated and engaging cultural and environmental history of skiing that alters our understanding of the sport and reveals how leisure practices evolve in unison with our changing relationship to nature Denning probes the modernist self definition of Alpine skiers and the sport's historical appeal for individuals who sought to escape city strictures while achieving mastery of mountain environments through technology and speed two central features distinguishing early twentieth century cultures *Skiing into Modernity* surpasses existing literature on the history of skiing to explore intersections between work tourism leisure development environmental destruction urbanism and more
