Nous Trois:

Thèmes et figures du siècle des lumières Raymond Trousson, 1980 **Experiments with Mixtures** John A. Cornell, 1843 This guide shows how to design and set up mixture experiments then analyze the data and draw inferences from the results Virtually every technique that has appeared in the literature of mixtures can be found here and for each method computing formulas are provided with completely worked examples Coverage begins with Scheffe lattice designs introducing the use of independent variables and ends with the most current methods Almost all of the numerical examples are taken from real experiments It should serve as a supplementary text for courses on experimental design and statistical methods as well as a ready reference to important techniques for research workers in such fields as engineering the physical sciences agriculture and medicine **Complete Poems** Blaise Cendrars, 1992 At last A superb translation of one of the great and greatly neglected Modernist poets The map of Modernist poetry will never be quite the same Marjorie Perloff Padgett s sparkling translations do marvelous justice to the eccentric and exciting poetry of Blaise Cendrars John Ashbery
