Covert Regime Change Lindsey A. O'Rourke, 2018-12-15 Lindsey A O Rourke is Assistant Professor of Political Science at Boston College Her research focuses on regime change international security and US foreign policy **Regime Change** Patrick Deneen, 2023-07-06 Classical liberalism promised to overthrow the old aristocracy creating an order in which individuals could create their own identities and futures To some extent it did but it has also demolished the traditions and institutions that nourished ordinary people and created a new and exploitative ruling class This class's economic libertarianism progressive values and technocratic commitments have led them to rule for the benefit of the few at the expense of the many precipitating our current political crises In *Regime Change* Patrick Deneen proposes a bold plan for replacing the liberal elite and the ideology that created and empowered them Grass roots populist efforts to destroy the ruling class altogether are naive what's needed is the strategic formation of a new elite devoted to a pre postmodern conservatism and aligned with the interest of the many Their top down efforts to form a new governing philosophy ethos and class could transform our broken regime from one that serves only the so called meritocrats Drawing on the oldest lessons of the western tradition but recognizing the changed conditions that arise in liberal modernity Deneen offers a roadmap for these changes offering hope for progress after progress and liberty after liberalism **Regime Change** Christopher Hitchens, 2003 Nobody is entitled to view this battle as a spectator *Regime Change* is the one essential book for anyone who wants to understand the greatest global crisis of the past decade one that has bitterly divided public opinion across Britain and around the world Watching events unfold in the US and writing directly from Iraq Christopher Hitchens cuts through the spin and slogans shaping popular thought and tackles the fundamental questions What was the true nature of Saddam's regime Was this really Bush's war for oil Was Blair principled or a poodle Will our military action spark more terrorist attacks Hitchens reports on the current crisis while at the same time emphasizing the historical perspective that this war began when Saddam Hussein invaded Kuwait in 1990 only a few months after the fall of the Berlin wall In this polemical incendiary account Hitchens offers hindsight on the rights and wrongs of an epochal war **Regime Change in Turkey** Errol Babacan, Melehat Kutun, Ezgi Pinar, Zafer Yilmaz, 2021-03-23 Turkey's new presidential regime promoted and shaped by the Justice and Development Party AKP has become a global template for rising authoritarianism Its violence intensifies the exigency for critical analysis By focusing on neoliberal authoritarian hegemonic and Islamist aspects this book sheds light on long term dynamics that resulted in the regime transformation It presents a comprehensive study at a time when rising authoritarianism challenges liberal democracies on a global scale Reaching from critical political economy and state theory to media gender and cultural studies this volume covers a range of studies that transcend disciplinary boundaries These essays challenge the narrative of an authoritarian turn that splits the AKP era into democratic and authoritarian periods Hence recent transformation is analyzed in a broad historical framework which is sensitive to both continuities and shifts

Studies that explore moments of resistance and relate the political development in Turkey to rising authoritarianism and the crisis driven trajectory of neoliberalism on a global scale are included in this effort Since the advancement of neoliberal policies in conjunction with the religious project that is pushed forward by the AKP suggests that the ongoing transformation may well advance into a more totalitarian regime this book strives to inform struggles that are trying to resist and reverse this development By reviewing the dynamics and impacts of recent authoritarian developments it calls on critical scholars to further seek out potentials and dynamics of opposition in the current authoritarian era Falling Friends Martin Staniland, 2019-04-08 For U S policymakers the collapse of governments headed by good friends of the United States has been over the past thirty years a repeated cause of alarm and embarrassment Such crises of succession have implications not only for U S foreign policy but also for recent and forthcoming changes in Eastern Europe and the Soviet Union Martin Staniland draws together extended case studies illustrating regime change and shows how each crisis resembles the others in its phases of development from the status quo to the attack phase and ultimately to negotiating the succession In the process students get to know the history culture and personalities involved from Batista and Eisenhower to Marcos and the Reagan administration As in every volume in the Case Studies in International Affairs series this volume opens with an introduction that taps into current theoretical debates in international relations while giving students a framework for understanding and comparing the cases that follow Individual introductions to each case place the study in context and discussion questions and exercises are strategically interjected throughout to encourage students to explore the issues and to assess the choices facing policymakers **Covert Regime Change** Lindsey A. O'Rourke, 2018-12-15 Lindsey A O Rourke is Assistant Professor of Political Science at Boston College Her research focuses on regime change international security and US foreign policy Overthrow Stephen Kinzer, 2007-02-06 Stephen Kinzer's Overthrow provides a fast paced narrative history of the coups revolutions and invasions by which the United States has toppled fourteen foreign governments not always to its own benefit Regime change did not begin with the administration of George W Bush but has been an integral part of U S foreign policy for more than one hundred years Starting with the overthrow of the Hawaiian monarchy in 1893 and continuing through the Spanish American War and the Cold War and into our own time the United States has not hesitated to overthrow governments that stood in the way of its political and economic goals The invasion of Iraq in 2003 is the latest though perhaps not the last example of the dangers inherent in these operations In Overthrow Stephen Kinzer tells the stories of the audacious politicians spies military commanders and business executives who took it upon themselves to depose monarchs presidents and prime ministers He also shows that the U S government has often pursued these operations without understanding the countries involved as a result many of them have had disastrous long term consequences In a compelling and provocative history that takes readers to fourteen countries including Cuba Iran South Vietnam Chile and Iraq Kinzer surveys modern American history from a new and often surprising perspective Detailed passionate and

convincing with the pace and grip of a good thriller Anatol Lieven The New York Times Book Review **Department 89:**
Books 4-7 Mark O'Neill, **The Word Militant, paperback edition** Walter Brueggemann, 2010-10 Against the easy assurance of a too enculturated religion Walter Brueggemann refocuses the preaching task around the decentering destabilizing always risky Word that confronts us in Scripture if we have the courage to hear **I Can Read It All by Myself** Paul V. Allen, 2021-05-28 In the late 1950s Ted Geisel took on the challenge of creating a book using only 250 unique first grade words something that aspiring readers would have both the ability and the desire to read The result was an unlikely children's classic The Cat in the Hat But Geisel didn't stop there Using The Cat in the Hat as a template he teamed with Helen Geisel and Phyllis Cerf to create Beginner Books a whole new category of readers that combined research based literacy practices with the logical insanity of Dr Seuss The books were an enormous success giving the world such authors and illustrators as P D Eastman Roy McKie and Stan and Jan Berenstain and beloved bestsellers such as Are You My Mother Go Dog Go Put Me in the Zoo and Green Eggs and Ham The story of Beginner Books and Ted Geisel's role as president policymaker and editor of the line for thirty years has been told briefly in various biographies of Dr Seuss but I Can Read It All by Myself The Beginner Books Story presents it in full detail for the first time Drawn from archival research and dozens of brand new interviews I Can Read It All by Myself explores the origins philosophies and operations of Beginner Books from The Cat in the Hat in 1957 to 2019's A Skunk in My Bunk and reveals the often fascinating lives of the writers and illustrators who created them **Global Encyclopedia of Public Administration, Public Policy, and Governance** Ali Farazmand, 2023-04-05 This global encyclopedic work serves as a comprehensive collection of global scholarship regarding the vast fields of public administration public policy governance and management Written and edited by leading international scholars and practitioners this exhaustive resource covers all areas of the above fields and their numerous subfields of study In keeping with the multidisciplinary spirit of these fields and subfields the entries make use of various theoretical empirical analytical practical and methodological bases of knowledge Expanded and updated the second edition includes over a thousand of new entries representing the most current research in public administration public policy governance nonprofit and nongovernmental organizations and management covering such important sub areas as 1 organization theory behavior change and development 2 administrative theory and practice 3 Bureaucracy 4 public budgeting and financial management 5 public economy and public management 6 public personnel administration and labor management relations 7 crisis and emergency management 8 institutional theory and public administration 9 law and regulations 10 ethics and accountability 11 public governance and private governance 12 Nonprofit management and nongovernmental organizations 13 Social health and environmental policy areas 14 pandemic and crisis management 15 administrative and governance reforms 16 comparative public administration and governance 17 globalization and international issues 18 performance management 19 geographical areas of the world with country focused entries like Japan China Latin America Europe Asia Africa the Middle

East Russia and Eastern Europe North America and 20 a lot more Relevant to professionals experts scholars general readers researchers policy makers and manger and students worldwide this work will serve as the most viable global reference source for those looking for an introduction and advance knowledge to the field **Foreign Service Journal** ,2010

Laser Information Age , **Understanding Global Social Policy** Nicola Yeates,2014-03-01 This book written by an international team of leading social policy analysts is the first student aimed textbook that comprehensively engages with the field of global social policy **Falling Friends** Martin Staniland,2018 Furry Fandom , Catastrophic Success Alexander B. Downes,2021-12-15 In Catastrophic Success Alexander B Downes compiles all instances of regime change around the world over the past two centuries Drawing on this impressive data set Downes shows that regime change increases the likelihood of civil war and violent leader removal in target states and fails to reduce the probability of conflict between intervening states and their targets As Downes demonstrates when a state confronts an obstinate or dangerous adversary the lure of toppling its government and establishing a friendly administration is strong The historical record however shows that foreign imposed regime change is in the long term neither cheap easy nor consistently successful The strategic impulse to forcibly oust antagonistic or non compliant regimes overlooks two key facts First the act of overthrowing a foreign government sometimes causes its military to disintegrate sending thousands of armed men into the countryside where they often wage an insurgency against the intervener Second externally imposed leaders face a domestic audience in addition to an external one and the two typically want different things These divergent preferences place imposed leaders in a quandary taking actions that please one invariably alienates the other Regime change thus drives a wedge between external patrons and their domestic prot g s or between prot g s and their people Catastrophic Success provides sober counsel for leaders and diplomats Regime change may appear an expeditious solution but states are usually better off relying on other tools of influence such as diplomacy Regime change Downes urges should be reserved for exceptional cases Interveners must recognize that absent a rare set of promising preconditions regime change often instigates a new period of uncertainty and conflict that impedes their interests from being realized Making Waves Kurt Weyland,2014-04-07 This book examines three waves of contention in Europe and Latin America across the nineteenth and twentieth centuries

The Ethics of Foreign Policy David B. MacDonald,Robert G. Patman,2016-03-23 This ground breaking volume considers the ethical aspects of foreign policy change through five interrelated dimensions conceptual security economic normative and diplomatic Defining ethics and what an ethical foreign policy should be is highly contested The book includes many very different viewpoints to reflect the strong divergence of opinion on such issues as humanitarian intervention free trade the doctrine of preemption political corruption and human rights The thematic approach provides this volume with a clear organizational structure giving readers a balanced overview of a number of important conceptual and practical issues central to the ethical analysis of states conduct and foreign policy making An impressive group of international scholars and

practitioners including a New Zealand Foreign Minister a US National Security Advisor and an ICJ Justice makes this volume ideally suited to courses on international relations security studies ethics and human rights philosophy media studies and international law

Arab Revolutions in Context Benjamin Isakhan, Fethi Mansouri, Shahram Akbarzadeh, 2012-08-01

From late 2010 a series of dramatic and unprecedented events swept across the Middle East and North Africa toppling several autocratic regimes that had held power for decades and ushering in a new climate of dissent and democratisation The Arab Revolutions in Context seizes a unique opportunity to reflect on these seismic events their causes and consequences and the core issues facing the region as it moves forward This volume is more than a collection of detailed thematic essays It situates the Arab Revolutions within their broader contextual backgrounds showing that a unique set of historical events as well as local regional and global dynamics has converged to provide the catalyst that triggered the recent revolts and also within a new conceptual framework The argument here is that the Arab Revolutions pose a very specific challenge to conventional wisdom concerning democracy and democratisation in the Middle East The Arab Revolutions in Context is the first volume of its kind to address the Arab Revolutions and the varying analyses debates and discussions that they have stimulated
