Regional Analysis

WATCH Lecture Topic 1.7: Regional Analysis Defining regions on the basis of one or more unifying characteristics or on patterns of activity, including formal (uniform), functional (nodal), and perceptual (vernacular) regions; Regional Analysis The transitional and often contested overlapping boundaries of regions; the application of regional analysis at local, national, and global scales

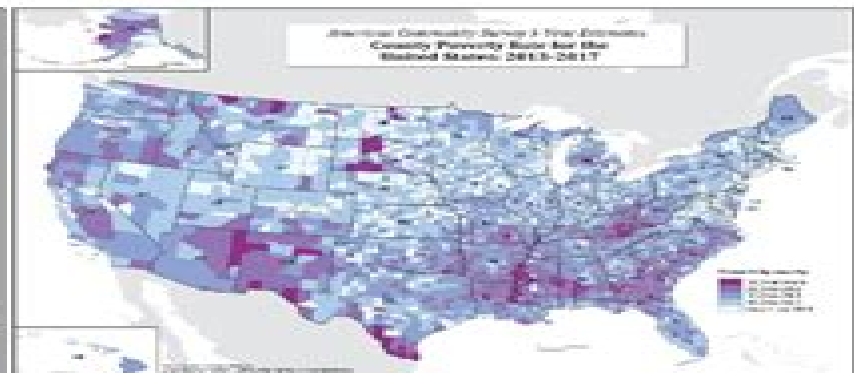

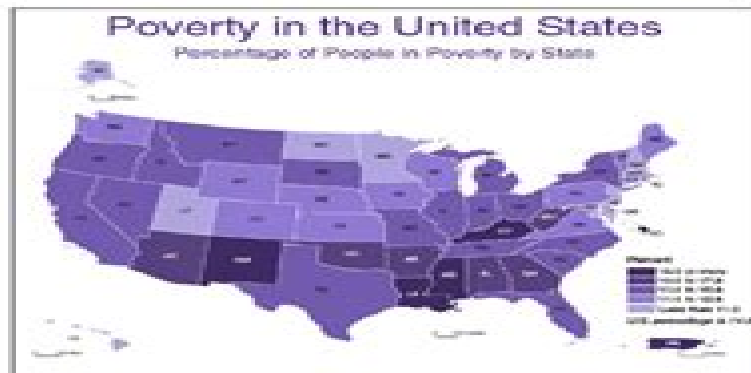

Notes:

Formal region: An area defined by one predominant or universal characteristic throughout its entire area.

Part 1: Check Your Understanding- Identify each of the following regions as formal (uniform), function (nodal), perceptual (vernacular).

- | | |
|----------------------------------------------------|----------------------------------------------------|
| 1. <u>formal</u> _____ Congressional District | 6. <u>perceptual</u> _____ Newspaper delivery area |
| 2. <u>function</u> _____ Area served by an airport | 7. <u>formal</u> _____ South America |
| 3. <u>formal</u> _____ The American West | 8. <u>formal</u> _____ The United States |
| 4. <u>formal</u> _____ The Mojave Desert | 9. <u>formal</u> _____ Southern Ohio |
| 5. <u>formal</u> _____ The Middle East | 10. <u>perceptual</u> _____ Radio station's market |

Part 2: Map Analysis- Use the maps below to complete the following.

- Are the regions displayed on these maps formal, functional, or perceptual? Explain your reasoning.
Formal because defined by facts.
- Which map is more helpful for combating poverty in the United States? Explain your reasoning.
Second because its more detailed.
- How might federal or state officials use these maps to combat poverty?
They can use this to know who need the most help.

Part 3: Video Analysis- Watch the video *"The conflict in Kashmir explained"* and complete the following.

- According to the video, why is Kashmir often cited as an example of a contested boundary?
Its had 3 wars and has half a million troops, and a lot of terrorist groups.

Regional Analysis:

Regional Analysis and Regional Policy William H. Miernyk, 1982 **Regional Analysis** Carol A. Smith, 2014-05-10
Regional Analysis Volume II Social Systems consists of studies on the general applications of the regional framework for analyzing socioeconomic systems as they exist and develop in territorial environmental systems This volume is concerned with social systems emphasizing the interrelationships among the institutional components of complex societies Marriage and kinship political organization formation of ethnic and cultural territorial groups and stratification systems that are affected by regional environmental variables are also covered This publication is beneficial to social and regional scientists geographers economists social anthropologists archeologists sociologists and political scientists intending to acquire knowledge of the implications of rural urban relations and regional settlement patterns **Methods of regional analysis** Walter Isard, 1966 **Regional analysis** United States. Department of the Interior, 1978 Methods of Interregional and Regional Analysis Walter Isard, Iwan J. Azis, Matthew P. Drennan, Ronald E. Miller, Sidney Saltzman, Erik Thorbecke, 2017-07-05 This landmark textbook introduces students to the principles of regional science and focuses on the key methods used in regional analysis including regional and interregional input output analysis econometrics regional and spatial programming and industrial and urban complex analysis gravity and spatial interaction models SAM and social accounting welfare analysis and applied general interregional equilibrium models The coherent development of the materials contained in the set of chapters provides students with a comprehensive background and understanding of how to investigate key regional problems For the research scholar this publication constitutes an up to date source book of the basic elements of each major regional science technique More significant it points to new directions for future research and ways interregional and regional analytic approaches can be fused to realise much more probing attacks on regional and spatial problems a contribution far beyond what is available in the literature **Spatial and Regional Analysis Methods in Forestry Economics** Alex Obiye, 1986 **Defining the Spatial Scale in Modern Regional Analysis** Esteban Fernández Vázquez, Fernando Rubiera Morollón, 2013-01-11 This book explores different approaches to defining the concept of region depending on the specific question that needs to be answered While the typical administrative spatial data division fits certain research questions well in many cases defining regions in a different way is fundamental in order to obtain significant empirical evidence The book is divided into three parts The first part is dedicated to a methodological discussion of the concept of region and the different potential approaches from different perspectives The problem of having sufficient information to define different regional units is always present This justifies the second part of the book which focuses on the techniques of ecological inference applied to estimating disaggregated data from observable aggregates Finally the book closes by presenting several applications that are in line with the functional areas definition in regional analysis Regional Analysis of Time-Fractional Diffusion Processes Fudong Ge, YangQuan Chen, Chunhai Kou, 2018-01-08 This monograph

provides an accessible introduction to the regional analysis of fractional diffusion processes. It begins with background coverage of fractional calculus, functional analysis, distributed parameter systems, and relevant basic control theory. New research problems are then defined in terms of their actuation and sensing policies within the regional analysis framework. The results presented provide insight into the control theoretic analysis of fractional order systems for use in real life applications such as hard disk drives, sleep stage identification and classification, and unmanned aerial vehicle control. The results can also be extended to complex fractional order distributed parameter systems, and various open questions with potential for further investigation are discussed. For instance, the problem of fractional order distributed parameter systems with mobile actuators, sensors, optimal parameter identification, optimal locations, trajectory of actuators, sensors, and regional actuation/sensing configurations are of great interest. The book's use of illustrations and consistent examples throughout helps readers to understand the significance of the proposed fractional models and methodologies and to enhance their comprehension. The applications treated in the book run the gamut from environmental science to national security. Academics and graduate students working with cyber physical and distributed systems or interested in the applications of fractional calculus will find this book to be an instructive source of state of the art results and inspiration for further research.

Development of Coal Resources in Southern Utah: Regional analysis United States. Department of the Interior, 1979 Regional Analysis and the New International Division of Labor F. Moulaert, P.W. Salinas, 2013-03-09

Throughout the world a sense of crisis has settled in like a nightmare that refuses to leave. We look towards the horizon with apprehension. Major changes are afoot. Older industrial regions once rich and powerful stand by helplessly as factories close down. Poor countries are sliding into bankruptcy, unable even to feed their populations. In a few scattered enclaves called export platforms, new manufacturing plants spring up overnight; they employ predominantly young unmarried women and ship their products to unknown destinations overseas. Small companies are eaten up by bigger ones which in turn are absorbed by still larger conglomerates. Some industrial sectors are wiped out altogether. Tensions between states are increasing. More and more countries are coming under military rule. Torture and terrorism are turned into tools of official state policy. Civil wars are fought in Central America, Northern Africa, and Southeast Asia. International conflict flares up between Britain and Argentina, Iraq and Iran, Ethiopia and Somalia. Economic growth has slowed to a crawl. Inflation undercuts the livelihood of the poor. The small producer is ruined. It appears that we are involved in a major restructuring of the capitalist world. The problems are profits, capital accumulation, and efficiency in production. To make the indicators point up, whole regions are sacrificed, new technologies are put in place, and new locational patterns are created as the world is carved up into a new international division of labor.

Urban And Regional Analysis For Development Planning Richard Rhoda, 2019-03-20

Dr Rhoda concisely presents the wide range of analytical methods available to urban and regional development planners. Focusing on the needs of the practitioner in each chapter, he concentrates on a particular analytical issue, describing several

types of relevant analyses and offering guidelines for selecting appropriate techniques to solve specific problems. *Regional analysis of the nationally determined contributions in Asia* Food and Agriculture Organization of the United Nations ,2020-04-01 The regional analysis provided in this report reflects the dynamism and diversity existing within Asia Asia is experiencing dramatic demographic changes high population growth urbanization and growing economic inequities The food system in the region varies significantly between and within its many sub regions in terms of climate landscapes ecosystems and farming systems All of these factors provide the context for climate action at the national level and have shaped to some extent how agriculture is reflected in countries respective National Determined Contributions This report provides a unique sector specific synthesis of the NDCs from Asia It summarizes the substantial contributions already put forward by countries opportunities for further action and the gaps barriers and needs that will need to be addressed if the agriculture sector in Asia is to raise mitigation and adaptation ambitions The findings of this report will help member countries to reflect on their progress in advancing toward NDC priorities for agriculture and associated national climate goals including related targets under the Sustainable Development Goals SDGs The analysis also helps to make clear the links between the NDCs from the region and the ongoing work of the United Nations Framework Convention on Climate Change in support of the Koronivia Joint Work on Agriculture KJWA
