Regional Innovation Systems The Role Of Governance In A Globalized World:

Regional Innovation Systems Philip N. Cooke, Martin Heidenreich, Hans-Joachim Braczyk, 2004 Since the first edition was published in 1998 there has been a worldwide innovation led boom subsequent slump This new edition registers this change offers an interesting test of the robustness of the original arguments

Regional Innovation Systems Hans-Joachim Braczyk, Philip Cooke, Martin Heidenreich, 2024-11-01 Since the first edition of this book in 1995 there has been a worldwide innovation led economic boom and a subsequent slump meaning enormous change has also occurred at the level of regional economies The new edition registers this change and provides an interesting test of the robustness of the original arguments in the book Not least more industrial policy making is influenced by the RIS analysis and many national and regional governments have adopted RIS approaches along with related instruments like promotion of industry clusters academic entrepreneurship regional venture capital and science led development strategies

Innovation Governance in an Open Economy Annika Rickne, Staffan Laestadius, Henry Etzkowitz, 2012-05-04 In an increasingly globalised world paradoxically regional innovation clusters have moved to the forefront of attention as a strategy for economic and social development Transcending international success cases like Silicon Valley and Route 128 as sources of lessons successful high tech clusters in niche areas have had a significant impact on peripheral regions Are these successful innovation clusters born or made If they are subject to planning and direction what is the shape that it takes top down bottom up or lateral

New Avenues for Regional Innovation Systems - Theoretical Advances, Empirical Cases and Policy Lessons Arne Isaksen, Roman Martin, Michaela Trippel, 2018-03-01 This book discusses the latest theoretical advances in regional innovation research presents empirical cases involving the development of regional innovation systems RISs and explores regional innovation policy approaches Grounded in the extensive literature on RISs it addresses state of the art developments in light of recent theoretical advances in economic geography and related disciplines Written in honor of Bjørn Asheim's seventieth birthday the book includes novel and carefully selected chapters prepared by collaborators colleagues and former PhD students of one of the founding fathers of RIS research Further it makes a significant contribution to the academic debate on regional innovation and growth and offers valuable insights for scholars and policymakers alike

Innovation Drivers and Regional Innovation Strategies M. Davide Parrilli, Rune Dahl Fitjar, Andrés Rodríguez-Pose, 2016-02-05 In the global economy regional development and innovation are increasingly an imperative to increase the competitive edge of EU economies While European regions are different in many ways the innovation capacity of regions clusters and firms is what makes them capable of building up new and diversified pathways for sustainable growth For this reason *Innovation Drivers and Regional Innovation Strategies* looks to analyze different knowledge drivers e.g. entrepreneurial or policy orientation scientific and practice based knowledge modes institutional innovation support that influence the innovative and competitive capacity of regions clusters and firms in Europe The aim of this volume is to develop an in depth understanding of these

drivers and their implications for the way in which regional and cluster growth may be upgraded Innovation Drivers and Regional Innovation Strategies examines the construction of new innovation pathways for regions and clusters in different geographical contexts The main themes are cluster evolution regional innovation systems and business innovation modes and capabilities The objectives are centred on exploring the logic and mechanisms that can be activated as a means to promote innovation and competitiveness within regions and within these across and within firms Aimed at researchers and academics in the field this is a thoughtful and innovative new volume that helps define the academic debate **Towards a Dynamic**

Regional Innovation System Wenying Fu,2015-01-05 Embedding the theoretical discussion on the framework of evolutionary regional innovation systems RIS this book reveals the informal nature of the emerging RIS in China within which interactive learning is organized on the basis of social networks Furthermore in a comparative study in the Pearl River Delta China demonstrates that dirigiste governance in the initial industrialization phase leads to a more mature and developed RIS than does grassroots governance The theoretical developments and empirical investigation presented in this book will grant readers a deeper understanding of the specific features of RIS within the transitional context of emerging economies **The**

Planning Imagination Mark Tewdwr-Jones,Nicholas Phelps,Robert Freestone,2013-10-01 Knighted in 1998 for services to the Town and Country Planning Association and in 2003 named by Her Majesty Queen Elizabeth II as a Pioneer in the Life of the Nation Peter Hall is internationally renowned for the breadth and depth of his studies and writings on urban and regional planning For the last 50 years he has captured and helped to create the planning imagination Here the editors have brought together in five themes a series of critical reflections on Peter s vast and diverse contributions Those reflections are provided by colleagues familiar with his work The five parts are devoted to Peter Hall s breadth of academic work covering the history of cities and planning London spatial planning connectivity and mobility and urban globalization Finally as a sixth part the editors have asked Peter Hall himself to reflect on his career and the sources of his imagination The story this book tells is not one of a singular totally consistent theoretical and philosophical view elaborated over several decades Rather it covers a set of views that necessarily admits signs of Peter s inconsistency and imperfection over the years the insights and imperfections that inevitably accompany the exercise of a nonetheless remarkably fertile restless and inspiring planning imagination

Industry 4.0 and Digitization Ulrich Hilpert,2022-06-15 This book includes studies on regions industries and tendencies of industrial change and spatial concentration of competences and industrial potentials The chapters in this volume provide for discussions concerning a wider understanding of situations related to Industry 4 0 and digitization It also reaches out further than towards technology and economy because it includes regional and metropolitan societies workforces and the divergencies of effects and opportunities Industry 4 0 and digitization are new transformations for regions and metropolises where technologies are applied but regionally can appear as a continuation of innovative processes where it is developed The divergent presence of competences creates a selectivity process among regions There are individual industry

location nexuses formed out of competences of industries labour force and research which are complemented by public policies providing support towards such adaptation of innovation and change Regional societies formed from skilled and educated labour become an important basis for participation in innovation and supply chains Since smart factories widely can be managed remotely this also shows a concentration of decision making Simultaneously it forms a polycentric de concentration indicating some more important locations as central within the networks These systematic changes continue to deepen over time While public policies may match innovative opportunities at the appropriate moment they also contribute to a continuation of uneven development and divergent societal tendencies Industry 4.0 and digitization indicate a wide and selective change of organization associated with new technologies and innovation While some regions and metropolises can continue to build both innovative competences and innovative societies based on innovative labour force others will participate because of their position in supply chains The chapters in this book were originally published as a special issue of the journal *European Planning Studies*

Rethinking Clusters Luciana Lazzeretti, Francesco Capone, Annalisa Caloffi, Silvia Rita Sedita, 2021-05-13 Research on the topic of clusters and industrial districts is very extensive However most of it has focused more on understanding the past than on trying to map out the future The aim of this book is to fill this gap by identifying and discussing the main research topics that populate the current scientific debate and highlight the emergent lines of research that will constitute the future research agenda It does so by drawing on the debate started with the rethinking clusters workshops which in a short time have become a rich place for discussion among cluster scholars around the world *Rethinking Clusters Towards a New Research Agenda for Cluster Research* collects contributions from authoritative colleagues who cover a number of relevant and timely issues such as the territorial roots of radical innovation processes new ways of understanding and measuring the role of place in economic development path renewal internationalization and entrepreneurship The final section is devoted to the critical analysis of policies that support smart specialization The chapters in this book were originally published as a special issue of the journal *European Planning Studies*

Advanced Introduction to Regional Innovation Systems Bjørn T. Asheim, Arne Isaksen, Michaela Trippl, 2019 Over the past 25 years the regional innovation system RIS approach has become a powerful framework for explaining the uneven geographical distribution of innovation in space as well as for developing policies geared towards boosting the innovation capability of regional economies This *Advanced Introduction* provides a critical review and discussion of research on RIS to answer a set of core questions covering the origins of the concept and its theoretical underpinnings to the challenges for future scholarly work on RIS

Bargaining with Multinationals H. Loewendahl, 2001-07-19 In *Bargaining with Multinationals* Loewendahl scrutinises the relationship between multinational companies regional development and governments using an international political economy framework of bargaining between government and multinationals He critically analyses the role of foreign investment in economic development and examines how governments can link inward

investment to regional economic development Based on extensive use of data interviews and case studies of Siemens and Nissan s UK investment the book shows why MNCs have invested in the UK in the past how they bargained with the government and what the impact was on the national and regional economies In particular through linking the strategy of multinationals to the location advantages of the UK it is argued that labour flexibility and incentives were crucial to investment decisions Loewendahl recommends a framework to integrate endogenous and exogenous approaches to developments and proposes a greater role for the region and the EU to control incentives and monitor multinationals

Learning Åge Mariussen,Seija Virkkala,2013-05-02 Systems of innovation that are conducted within national borders can preserve inefficient solutions and prevent development This has led to a feeling that transnational learning strategies are more and more desirable In practice the field of transnational learning has been dominated by various policy making institutions such as the OECD and European Union working through different types of policy instruments and programs such as structural funds open methods of coordination as well as international research institutions and networks set up by cooperating national governments working on comparative analysis benchmarking and indicators This book lays out a set of methods which can further enhance the experience of transnational learning starting from the sociological ideas promoted by Charles Sabel of learning through monitoring and by Marie Laure Djelic and others of the translation of experiences between different countries Case studies and examples are collected from three fields industrial development tourism and local government **Tourism Destination Evolution** Patrick Brouder,Salvador Anton Clavé,Alison Gill,Dimitri

Ioannides,2016-07-15 Outlining the need for fresh perspectives on change in tourism this book offers a theoretical overview and empirical examples of the potential synergies of applying evolutionary economic geography EEG concepts in tourism research EEG has proven to be a powerful explanatory paradigm in other sectors and tourism studies has a track record of

embracing adapting and enhancing frameworks from cognate fields EEG approaches to tourism studies complement and further develop studies of established themes such as path dependence and the Tourism Area Life Cycle The individual chapters draw from a broad geographical framework and address distinct conceptual elements of EEG using a diverse set of tourism case studies from Europe North America and Australia Developing the theoretical cohesion of tourism and EEG this volume also gives non specialist tourism scholars a window into the possibilities of using these concepts in their own research Given the timing of this publication it has great potential value to the wider tourism community in advancing theory and leading to more effective empirical research

The Entrepreneurial Discovery Process and Regional

Development Åge Mariussen, Seija Virkkala, Håkon Finne, Tone Merethe Aasen, 2018-12-20 There is a broad and long standing debate on possible solutions to the regional vulnerabilities of globalisation In 2014 the European Commission began implementing Smart Specialisation Strategy a place based strategy of growth regional transformation and new industrial policy with collective entrepreneurial discovery processes EDP at its core This volume approaches the mystery of entrepreneurial discovery that is how relevant knowledge is created converted and shared in a process of discovery These essays bring together scholars from economics geography sociology organisation studies innovation studies and complexity theory offering new approaches to overcome the limitations of place based development and suggesting improved methods leading to growth

The Life Cycle of Clusters Dirk Fornahl, Robert Hassink, 2017-04-28 One size fits all cluster policies have been rightly criticized in the literature One promising approach is to focus cluster policies on the specific needs of firms depending on the stage of development emergence growth sustainment or decline their cluster is in In this highly insightful book these stage specific cluster policies are analysed and evaluated Moreover several chapters also focus on smart specialization policies to promote regional development by taking into account the emergence and adaptation of clusters and industries

Dynamics of Economic Spaces in the Global Knowledge-based Economy Sam Ock Park, 2014-09-19 This book addresses how economic spaces dynamically change within the context of the global knowledge based economy Specifically it centers the discussion on integrated views of understanding and conceptualizing dynamic changes of global economy under the global megatrends of globalization knowledge based economy information society service world climate change and population aging Focusing on East Asia especially on Korea it deals with case studies regarding the processes and patterns of these global dynamics looking at economic spaces of various spatial scales and types of economic actors This book develops a theoretical model for understanding and analysing the dynamics of economic spaces that are being reshaped within the larger global economy It also emphasizes the analysis of empirical studies at the level of firm region and state by considering an evolutionary perspective over time In developing its theoretical framework this book examines regional resilience intangible assets service innovation path dependence and other notions related to the evolution of economic spaces and incorporates these elements into real world case studies The integrated theoretical framework examined here

contributes a new perspective on spatial disparities in the global economy An integral model of service innovation the integration of path dependence and regional resilience the interaction between firm and region for the accumulation of intangible assets and the roles of governments and global firms these are all essential to understanding the dynamics of economic spaces in East Asia The theoretical model and case studies in this book suggest policy implications for developing countries especially in the Asian and African regions with regard to regional development and innovation policies

Capacity Building in Technology Transfer Massimiliano Granieri, Andrea Basso, 2018-07-12 This book tells the story of capacity building in Europe with respect to technology transfer offices and organizations TTOs The traditional underdevelopment of technology markets in Europe has often been explained in terms of lack of capacity and skills among technology transfer professionals both as individuals and as part of TTOs Because of the severe consequences for economic development and industrial growth this situation has been repeatedly addressed by policy makers until the European Commission within the framework of Horizon 2020 decided to initiate a pan European pilot project on capacity building This book builds on the experience gained through that project and tries to reconnect it with current scholarly works on technology management by focusing on the new methodology developed In addition the authors present a series of case studies that may be used as a benchmark and as examples that will help high potential TTOs to improve their performance Both practitioners and researchers will benefit from the holistic perspective of the book which goes beyond the traditional approach and attempts to reconcile the theory and practice of organizing for technology transfer

Controversies in Local Economic Development Martin Perry, 2010-07-02 This book will discuss seven controversies in local economic development including knowledge and learning the provision of resources to nurture entrepreneurial talent innovation clusters of enterprise and inward investment

Europe and World Society Chris Rumford, Didem Buhari-Gulmez, 2017-10-02 Europe and World Society offers a distinctive critical approach to understanding European transformations exploring both the progress and limitations of integration on various key policy areas such as agricultural policy education reform migration and external relations as well as the relationship between European regionalism and globalization Due to its innovative theoretical framework based on macro perspectives including World Polity Theory developed by Stanford sociologist John W Meyer this collection contributes to both the recent sociological turn in European studies and to the constructivist critiques of rational choice accounts of modern Europe At a time when the European integration project has been severely challenged by multiple economic political and social crises this book offers a timely global perspective that sheds light on the dynamism and multiplicity of the actors discourses and processes which underlie contemporary Europe The book's distinctive global approach allows it to move the debate beyond state and EU centrism and establish the missing link between Europe and its global context This book was published as a special issue of the Journal of Contemporary European Studies
