Regional Problems And Policies In The Czech Republic And The Slovak Republic:

Regional Problems and Policies in the Czech Republic and the Slovak Republic, 1996 *Integration and Transition in Europe* Grzegorz Gorzelak, Gunther Maier, George Petrakos, 2013-01-11 With the harmonization of the EU economies and issues of EU enlargement and integration with Europe's transition economies topping the political agenda the economic geography of Europe is being recast. This important volume analyses the spatial implications of the integration transition process and examines key issues such as north-south and east-west divides, regional cooperation and cross-border dynamics.

Report on the Foreign Policy of the Czech Republic, 2004-01-01 **Economic Geographies of Globalisation** Martin Sokol, 2011 This introductory text is about economic geography and globalization in all their different stripes and colours. It introduces clearly the subject matters in economic geography through a wide range of important conceptual lenses and theoretical perspectives. It does so without a facts-based rendition of what globalization actually is. Instead, Sokol offers a refreshingly light touch on the various approaches in understanding contemporary economic geographies and applies these conceptual insights in a helpful and straightforward manner to our appreciation of such key challenges of globalization as inequality, instability and uneven development. It is both wide in coverage and contemporary in relevance. The text will be well adopted in courses on economic geography, global studies, development studies and international political economy. Henry Yeung, National University of Singapore. Telling it like it is in a direct and engaging style, this is a book without preconceptions. It is a vital intervention that makes sense of the sorry state of the contemporary global economy and its formative geographies and shows what is involved in constructing an alternative. Roger Lee, Queen Mary University of London, UK. This well-researched book provides a concise contribution to a large-scale debate on economic globalisation. Martin Sokol introduces key theoretical approaches that help us to understand how economies work, why they suffer recessions and crises and why economic inequalities at various levels are growing in the context of globalisation. He introduces key economic geography concepts and theories demonstrating their application to our contemporary globalising world. The role that economic geography may play in informing policymaking is highlighted and debates surrounding the recent global financial and economic crisis are expounded. This highly accessible book will prove an essential reference tool for academics, students and researchers focusing on geography, economics, planning and regional development, development studies, international politics and international business. Policymakers and practitioners in local, regional and national authorities, international bodies and non-governmental organisations will also find this book to be an invaluable resource. **European Integration, Regional Policy, and Growth** Bernard Funck, Lodovico Pizzati, 2003 This publication contains a number of papers presented by leading academics, policy makers and practitioners from existing and new EU member countries at a conference in Barcelona in October 2002. These papers discuss key issues regarding the effectiveness of attempts to reduce regional disparities with the EU and the implications of current enlargement, including the trade-offs between promoting national

growth and reducing relative disparities the role of growth poles the investment climate and labour market flexibility the role of the EU and regional policy overall *Environmental Problems in Eastern Europe* Francis W. Carter, David Turnock, 1996 Providing a comprehensive descriptive analysis of a wide range of Central and East European countries this updated paperback edition offers an invaluable study of pollution problems and effects on the quality of life Revisions include new chapter on Slovakia demonstrating the implementation of a number of practical measures which have made a considerable impact on environmental problems that arose under communism and have been tackled during the transition new concluding chapter which provides an important overview of recent developments in Eastern Europe and discusses topical issues such as health hazards and methods of charging polluters for environmental damage *The Future of U.S. Foreign Policy: Regional issues* United States. Congress. House. Committee on Foreign Affairs, 1993

Minority Rights Protection in International Law Helen O'Nions, 2016-04-22 There are approximately ten million Roma in Europe making them the continent's largest non territorial minority Despite this fact the Roma continue to experience routine discrimination and marginalization in European countries As a result they are seldom engaged in national political activism and are frequently at the bottom of the economic and social ladder The severity of exclusion experienced by the Roma in societies which have long paid heed to the notion of individual universal human rights combined with their geographical dispersal and heterogeneous nature makes the study of the Roma highly informative This book examines the theoretical debate concerning the most appropriate way of protecting the fundamental human rights of the Roma which also illuminates ways in which the rights of minority groups can be protected more generally As a result this work will be a valuable resource for social scientists and practitioners in the field of human rights

Development Issues in Marginal Regions R.B. Singh, 2019-03-04 Rapid population growth demand for increased food resources and other political economic and social stresses have all contributed to building up pressure for development of marginal regions in both developed and developing countries Ecological issues are also adding up to and increasing marginalization of regions and social groups due to the pressure on natural resources Broadly speaking marginal regions are perceived in concepts of centre periphery fringes and boundaries and frontiers In developing countries marginal regions are the combined effects of ecological economic and social factors For understanding the above complex issues the Study Group on Development Issues in Marginal Regions was established in August 1992 at the Washington International Geographical Congress
