*The Dynamics of Black Sea Subregionalism* Panagiota Manoli,2016-03-23 Conflict and cooperation are two dynamics that have shaped the political economy and international relations around the Black Sea since the early nineties Despite the negative structural environment and the persistence of a high security dilemma cooperative efforts among Black Sea actors primarily state elites but increasingly non state actors have been advancing even though slowly Representing a new development in the study of contemporary regionalism Panagiota Manoli examines the process of institutionalized subregional cooperation and casts new light on the factors influencing the reconfiguration of subregional structures in the region Focusing on the primary initiative in the region Black Sea Economic Cooperation BSEC Manoli traces how subregionalism has evolved since the early nineties and what has been driving and conditioning this process Questioning whether there is a definitive nature to subregionalism Manoli then discusses Black Sea subregionalism within the European integration process examining the impact of the European Union Contributing to the conceptualization of the subregional phenomenon this book should be read by scholars and policy makers alike unclear on how local elements interface with extra regional forces in the shaping of a subregion **The European Union and Global Financial Regulation** Lucia

Quaglia,2014-06-26 The European Union and Global Financial Regulation examines the influence of the European Union EU in regulating global finance addressing several inter related questions Why does the EU upload international financial regulation in some cases download it in other cases and cross load either actively or passively in other instances Has this changed over time especially after the third stage of Economic and Monetary Union and the completion of the single financial market or after the global financial crisis Under what conditions is the EU more or less likely to upload download or cross load rules Through which mechanisms does this take place Overall does the EU act as a pace setter in regulating global finance or is it mainly a follower Why The key explanatory variable used in this research is the concept of regulatory capacity applied to the EU and the US distinguishing between strong and weak regulatory capacity The influence of the EU in global financial regulation depends on the combinations of EU and US regulatory capacities When EU regulatory capacity is weak and US regulatory capacity is strong the US will mainly upload its domestic rules internationally and or actively cross load

them to the EU whereas the EU will mainly download international rules When the EU regulatory capacity is strong and US regulatory capacity is weak the EU is able to upload its rules internationally and or actively cross load them to third countries When the EU and the US regulatory capacities are weak private sector governance prevails When the EU and US regulatory capacities are strong both jurisdictions seek to upload and cross load their domestic rules      *Britain and Canada and Their Large Neighboring Monetary Unions* Amy Verdun,2006 Britain is confronted with the EU and its Economic and Monetary Union or the eurozone an area of 12 EU Member States in which the Euro is the single currency At a time in which the discussion revolves around the future of national currencies this work looks at the question of monetary integration for the cases of Britain and Canada      **Asia and Europe** Lay Hwee Yeo,2004-03-01 This book provides a systematic and thorough examination of the Asia Europe Meeting ASEM process which brings together the fifteen EU member states the European Commission and ten East and Southeast Asian countries The author not only traces the actual development of the ASEM process but also contextualises ASEM within three different international relations theoretical frameworks as viewed by realists social constructivists and institutionalists      **The Political Importance of Regional Trading Blocs** Bart Kerremans,Bob Switky,2018-02-06 This title was first published in 2000 This text addresses concerns about regional trade agreements From a variety of political and economic angles it explains the emergence of trade blocs their internal policies and politics and their effects on global trade It does not provide sequential descriptions and analyses of each of the world s major trading blocs The focus here is on a number of causal factors that help explain the emergence of trading blocs and the development of their relations to and effects on the multilateral trading system In each chapter attempts have been made to draw theoretical and case based generalizations that may apply to other trade blocs than the used in the empirical analyses

**New Regionalisms in the Global Political Economy** Shaun Breslin,2002 Following the financial crisis at the end of the twentieth century regionalisms in the global political economy have evolved in a number of ways This informative book brings together the leading scholars in the field to provide cutting edge analyses of contemporary regions and regionalist projects Providing an innovative integration of theoretical issues with sophisticated analyses of a wide range of international case studies the chapters systematically consider the relationship between globalization financial crisis and regional projects In combination the contributions to this volume provide the widest possible base within the literature for a truly comparative study of contemporary regionalism      *Constructing a European Market* Michelle Egan,2001-06-14 Efforts to tackle the trade impeding effects of divergent standards and regulations are at the core of European economic relations This volume draws on literature from several disciplines to develop a comprehensive account of the regulatory strategies and institutional arrangements adopted by the EU in promoting the single market in goods It provides a historical overview and detailed cases studies of the various policy initiatives that have altered the boundaries between the public and private sector in fostering market integration Tackling interstate barriers to trade has relied heavily on European law to shape the framework of

relations between states and trade liberalization has been facilitated by legal rulings resolving territorial conflicts over regulatory jurisdiction and authority The European Court of Justice has actively shaped markets acting as a free trade umpire in balancing the goals of market liberalization and market regulation while fostering market compliance Although markets are absolutely dependent on public authority the institutional innovation of the EU has been to use the private sector in an ancillary role to the state By delegating responsibility to set standards for market access the EU has chosen to draw on the resources of private actors resulting in a system of governance that is a distinctive hybrid model of regulation composed of state and non state actors Though the outsourcing of public sector regulatory activity was expected to be more effective than the process of regulatory harmonization progress has been difficult The current deficit in setting standards for European wide market access raises concerns about the efficiency and effectiveness of such a regulatory regime Egan provides a detailed evaluation of that process highlighting regulatory gaps in the single market and the need to focus not only on the process of market integration but also its outcome and impact on European business Comparisons with American efforts to create a national market are made throughout to demonstrate the difficulties of constructing and maintaining a single market American and European efforts to devise a uniform market for commerce and trade have involved both public and private authorities though with different degrees of coordination and centralization as many of the strategies undertaken by the EU echo earlier American market building efforts

**The Southern Cone Model** Nicola Phillips,2004-08-02 Developing an original blend of perspectives from the fields of international and comparative political economy this book presents an innovative and in depth account of the contemporary political economy of the southern cone of Latin America Argentina Brazil Chile Paraguay and Uruguay It identifies a new and distinctive model of regional capitalist development emerging in the southern cone and a complex relationship with both the global political economy and the five distinctive national political economies in the region Ranging across the contours of labour business states and regionalist processes Phillips assesses the significance of the Southern Cone Model for the ways in which we understand contemporary capitalist development at both national and transnational levels

**Straits of Malacca** Donald B. Freeman,2003 For centuries the Straits of Malacca a narrow waterway between the Malay peninsula and the island of Sumatra has been both a major conduit for long distance trade between Asia and the West and one of the most dangerous areas for commercial shipping Casting a broad net across several disciplines particularly geography and political economy Donald Freeman examines the significance of the Straits as both a trade gateway and a choke point that has forced generations of sailors to run the gauntlet Rather than the more conventional historical narrative approach he offers an innovative adoption of an interdisciplinary analytical perspective through his use of detailed case studies of trading systems and shipping hazards

Theories of New Regionalism F. Söderbaum,T. Shaw,2003-11-11 Theories of New Regionalism represents the first systematic attempt to bring together leading theories of new regionalism Major theorists from around the world develop their own distinctive theoretical

perspectives spanning new regionalism world order approaches along with regional governance liberal institutionalism neoclassical development regionalism to regional security complex theory RSCT and the region building approach The Future of the Welfare State Francis G. Castles, 2004-07-08 Written by one of the world's leading policy researchers this book seeks to assess the threat posed to modern welfare states by globalization and demographic change Using empirical methods and bringing together insights from across the social sciences Castles interrogates a range of theories suggesting that the welfare state is in crisis Systematically using data for 21 advanced OECD nations he distinguishes crisis myths from crisis realities locating in the process likely trajectories of welfare state development in coming decades The findings of this book confront many of the basic assumptions of contemporary scholarship Economic globalization has not led to a race to the bottom Analogous processes within the European Community have not led to a downward harmonization of social spending There is no new politics of the welfare state with the Left still outspending the Right Over the past two decades spending has been increasing and converging across the OECD Rather than being in a state of crisis western welfare states have achieved a steady state The supposed impact of population ageing on social welfare budgets also turns out to be myth with differences in spending actually being a function of the structure of welfare systems not of any demographic imperative The only potentially real threat is of rapidly declining fertility but Castles argues that welfare state spending in the form of family friendly public policy is in fact our best defence against this problem This is a book with significant policy implications It identifies the factors likely to mould welfare state growth and decline in future years and the diverse problems and challenges confronting welfare state policy makers in different families of nations It is a book for those who like assessing evidence before jumping to unwarranted conclusions and a book for those who wish to see the shape of things to come
