Regionalism Among Developing Countries:

Regionalism among Developing Countries S. Page, 1999-11-09 In the last decade regionalism appears to have emerged as a major new force in the world This book puts it in its historical context Regions have emerged before few are old because they either evolve into federal systems or break up The current regions imply more integration than a simple view that they are about liberalising trade

Regional Integration and Food Security in Developing Countries Alan Matthews, Food and Agriculture Organization of the United Nations, 2003-01-01 Developing countries are active participants in the formation of regional trade arrangements RTAs but viewpoints differ on the desirability and on the efficient design of regional integration The first objective of this paper is to review the regional integration debate for those involved in the preparation of food security strategies among developing countries The paper concentrates primarily on the economic arguments while acknowledging that political motivations may often be the primary driving force behind RTAs The second objective of the paper is to identify the potential role which regional integration arrangements might make to promoting food security among their members

Economic Integration and Development Mordechai Elihu Kreinin, Michael G. Plummer, 2003-01-01 The intriguing and provocative results on the effects of the single European market and NAFTA make this short book worth a read even if one is concerned only with how developing countries have been affected by regional trade agreements that do not include them Peter J Montiel Journal of Regional Science This book is an excellent attempt to pin down the effects of regional economic integration on developing countries it will prove to be a good guide for researchers and students of development economics working in the area of regional trading arrangements and policymakers and governments which are in the process of exploring the possibilities of forming free trade areas Pravakar Sahoo Development Policy Review Students interested in either the methodological issues inherent in research on trade or on the economics of trading blocs in general would profit from the book James J Hentz The European Journal of Development Research Questions related to the economics of regionalism became increasingly important beginning in the late 1980s when regional groupings started to become very popular as a tool of commercial policy The goal of this book is to address the question of whether or not regionalism in developed countries has truly benefited developing countries and to what degree regionalism among developing countries and between developed and developing countries will improve economic development prospects Mordechai Kreinin and Michael Plummer consider the implications of the emerging global trend of economic regionalism for developing countries The analysis focuses on the trade and investment effects of integration in developed countries on developing countries as well as the ramifications of regional integration in the latter After an extensive review of the theoretical and empirical literature pertinent to the economics of regionalism the book considers the ex post trade and direct foreign investment effects of the Single Market Program in Europe and NAFTA followed by chapters on ASEAN and economic integration in Latin America primarily MERCOSUR The study suggests three salient conclusions First in designing

preferential trading arrangements developed countries should recognize and attempt to minimize the possible discriminating effect on developing countries Second the developing countries have an abiding interest in the success of WTO negotiations that would minimize the discrimination against them of regional groupings in Europe and North America And third any customs unions or free trade areas among the developing countries themselves should be outward looking if they are to enhance the welfare of developing countries Economists and policy scholars as well as readers interested in regionalism and economic development will find this book a great resource *Revisiting Regionalism and the Contemporary World Order* Élise Féron, Jyrki Käkönen, Gabriel Rached, 2019-10-28 The book critically analyzes the ongoing changes in the regional intra regional and global dynamics of cooperation from a multi disciplinary and pluralist perspective It is based on the insight that in a post hegemonic world the formation of regions and the process of globalization can be largely disconnected from the orbit of the US and that a plurality of power and worldviews has replaced US hegemony In spite of these changes most existing analyses of current changes in the world order still rely upon Western centered approaches and Westphalian thinking Against this backdrop the book proposes to advance a truly global IR understanding of the post hegemonic world and weaves together the pluralist and multi disciplinary perspectives of scholars located all around the world New Regionalisms in the Global Political Economy Shaun Breslin, 2002 Following the financial crisis at the end of the twentieth century regionalisms in the global political economy have evolved in a number of ways This informative book brings together the leading scholars in the field to provide cutting edge analyses of contemporary regions and regionalist projects Providing an innovative integration of theoretical issues with sophisticated analyses of a wide range of international case studies the chapters systematically consider the relationship between globalization financial crisis and regional projects In combination the contributions to this volume provide the widest possible base within the literature for a truly comparative study of contemporary regionalism *The European Union and Interregionalism* Mr Mathew Doidge, 2013-03-28 The European Union and Interregionalism is the most comprehensive study of interregionalism to date providing a vigorous analysis of its role and functions in the architecture of global governance and of the place of qualitative differences between regional actors in shaping interregional relationships Regionalism itself is an established phenomenon with regional politics becoming increasingly institutionalised As a result with the EU as forerunner regions have begun to exert themselves in the external policy space developing networks of relations including prominently interregional relations We have thus seen the emergence of a new governance space at the interregional level banded on one side by sites of global governance and on the other by governance at the regional level Important questions challenging the current literature of these interregional structures include do interregional relationships conform to theoretical expectations and what patterns of engagement and interaction are emerging within the EU s core interregional partnerships and are these replicated elsewhere Exploring interregionalism beyond the core Europe Asia partnerships including the network of relations centred on ASEAN this book

should be read by all those engaged in consideration of interregional structures to understand how patterns of EU centred interregional engagement rather than being sui generis are increasingly evident in the broader network of interregional relationships

projects without considering the serious hurdles that lie in the way of their success Regional and European integration topics are discussed including credibility of commitments delegation of powers bargaining and influence activities adverse selection and moral hazard The author also offers a deeper examination of the specific crisis of monetary integration arguing that it might be more effectively achieved with inter jurisdictional competition and suggesting how integration should be managed in the globalized world

International Crimes Caroline Fournet,2006 International Crimes Theories Practice and Evolution is unique in that it proposes a theory of international criminal law by questioning the law itself The analysis focuses on particular definitional aspects of international crimes in order to highlight their similarities as well as the defects of the relevant instruments and to ultimately stress the need for change and the feasibility of such a proposal The recurring theme of the book is the idea that international criminal law is not and should not be considered as a static legal corpus Rather it should be acknowledged that the different crimes it covers interact greatly and could and should influence one another in order to reinforce or enforce the implementation and effectiveness of international criminal law By exploring methods of improvement of international criminal law this book addresses both theoretical issues as well as practical matters and in that respect will be of interest to both academics and practitioners
