Decisions of the World Court relevant to the UN Convention on the Law of the Sea [electronic resource] Barbara Kwiatkowska, 2002-05-07 This pioneering publication provides A Reference Guide to the significant contributions of decisions of the World Court as the principal judicial organ of the United Nations and the world s most senior Court with the broadest material jurisdiction to the development of the law of the sea as a part of the global system of peace and security The Guide

is dedicated to the Court's former President Stephen M. Schwebel in appreciation of his belief that it is important for the Court to further explore its pre-eminently unique role throughout the Third Millennium. Whereas the format of specific entries covered by this Reference Guide largely corresponds to the Parts and Annexes of the 1982 UN Law of the Sea Convention (UNCLOS) and the 1994 Part XI Agreement, the heading of each entry also contains as appropriate references to the 1930 League of Nations Hague Draft, the four 1958 UN Geneva Conventions and the 1995 UN Straddling Stocks Agreement as well as to the 1972 UN Stockholm Convention, the 1992 Rio UNCED and the 2002 Johannesburg instruments. This will enable the reader to relate the Court's decisions to the respective UNCLOS provisions as originated from and as implemented by these global framework instruments at various stages of codification and progressive development of the law of the sea. The entries cover principally Judgments and Orders including the related pleadings of the PCIJ and the ICJ and those decisions of Arbitral Tribunals and other third party fora as well as national courts which have been relied upon in the Court's jurisprudence. In addition, the recent decisions of the ITLOS and some other fora such as the Annex VII Southern Bluefin Tuna, Singapore v Malaysia, Barbados, Trinidad and Tobago, Guyana, Suriname and the Mox Plant Arbitral Tribunals as well as references to treaties are also listed under specific entries as appropriate. Tables of Cases and Treaties will importantly facilitate the use of A Reference Guide. It has proven to be an indispensable tool for the Judges and governmental and other practitioners in furthering the coherent development of the law of the sea by international courts and tribunals on the one hand and for international community of academics in the adequate assessing of this development on the other hand.

Global Environment Outlook 2000 United Nations Environment Programme (Unep), 2013-11-05. The continued poverty of the majority of the planet's inhabitants and excessive consumption by the minority are the two major causes of environmental degradation. The present course is unsustainable and postponing action is no longer an option. Inspired political leadership and intense cooperation across all regions and sectors will be needed to put both existing and new policy instruments to work. From the Synthesis. Global Environment Outlook 2000. GEO 2000 is a comprehensive and authoritative review and analysis of environmental conditions around the world. It is the flagship publication of the world's leading environmental organization, the United Nations Environment Programme (UNEP), and is based on information provided by more than 30 regional and international collaborating centres. The book presents a region by region analysis of the state of the world's environment, highlighting key global concerns and making recommendations for policy action. The regions covered include Africa, Asia and the Pacific, Europe and Central Asia, Latin America and the Caribbean, North America, West Asia and the Polar Areas. Chapter 1: Global Perspectives describes the main drivers of environmental change such as the economy, population growth, political organization and regionalization as well as potential impacts of recent global developments including the growth of the consumer culture, trade and international debt. Chapter 2: The State of the Environment provides a global and region by region overview of the environment at the end of the second millennium. The

chapter covers global issues such as ozone climate change El Nifio and nitrogen loading and universal issues of land and food forests biodiversity freshwater marine and coastal areas atmosphere and urban areas Chapter 3 Policy Responses reviews the broad range of policy instruments and responses being used to address environmental issues including multilateral environmental agreements and analyses the difficulties of compliance implementation and assessment Chapter 4 Future Perspectives looks at environmental issues that will require priority attention in the 21st century and some alternative policy options that could be used in the regions Chapter 5 Outlook and Recommendations makes recommendations for future action based on the environmental legacy left by past and present policy and management systems GEO 2000 will be the benchmark reference and guide to the state of the global environment Written in clear non technical language and supported throughout by informative graphics and tables it is essential reading for all those involved in environmental policy making implementation and assessment and for researchers and students of regional and global environmental issues Originally published in 1999

Vanishing Borders Hilary French, 2013-11-05 National governments are ill equipped for tackling transnational environmental problems from ozone depletion to soaring trade in commodities like timber and shrimp As these issues climb higher on the political agenda industrial and developing countries are on a collision course over climate change and water shortages Goods money microbes pollution people and ideas are crossing global boundaries evermore frequently The implications for our future and for the health of the planet are profound This text describes what we need to do to cope with the challenge
