Law and Regulation of Mobile Payment Systems Joy Malala,2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya *The Politics of the Financial Services Revolution* M. Moran,1990-11-15 The financial services revolution has transformed what was once a backwater into a glamorous and dangerous part of modern economies Intense competition and ferocious struggles for advantage in world markets are the signs of revolutionary change Michael Moran s book breaks new ground by examining the politics of that revolution Moran compares the struggles between private interests and public agencies in three great world financial centres New York London and Tokyo The Governance of Macroprudential Policy Tracy C Maguze,2024-01-11 This book critically examines the theoretical foundations and legal framework for macroprudential policy its tools and governance in the UK the US and the EU It goes deeper into a normative discussion of the legitimacy of macroprudential policy in these jurisdictions where the mandate for maintaining financial stability has been delegated to independent authorities The Global Financial Crisis of 2007 2008 reopened debates regarding legitimacy of the independent regulatory state given its democratic deficit

The response to a perceived legitimacy gap has been to increase political oversight in financial policymaking and regulation. The book posits that the real problem is not a lack of democracy but rather a lack of social justice. Across the globe there is growing dissatisfaction with a financial system and regulatory process that appear depersonalised and perpetuate inequalities. Citizens are calling for more socially just systems of governance and the future success of financial policymakers and regulators will hinge on this. Given the marked distributional effects that have been noted in some macroprudential policy tools, the book questions whether macroprudential policy should be solely based on highly rationalised and strongly quantitative reasons. By proposing that macroprudential policymakers should have a social justice mandate alongside their financial stability mandate as well as legal mechanisms for operationalising the added authority, the book contributes to the growing discourse on the role of social justice in public policy.

Neoliberalism 2.0: Regulating and Financing

Globalizing Markets L. Nijs, 2016-01-26 In today's increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace. One such consideration is the failing dynamics of the international tax infrastructure. Neoliberalism 2.0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model. The book considers the impact neoliberalism had and will have on regulatory infrastructure, democracy in an era of globalization, and reduced legitimization of the national state. The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere, macro economics, and the political philosophical context in which law and economics emerge. The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example. This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies. Neoliberalism 2.0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future, the implications of globalization, and the changing relationship between citizens and their state.

The Regulation of Financial Planning in Australia Angelique Nadia Sweetman McInnes, 2019-08-20 This book investigates the legitimacy of the current Australian Financial Services Licensee Authorised Representative (AFSL AR) licensing model as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It takes into account theories in agency legislation, legitimacy, and the independent individual regulatory regimes in other professions, thereafter integrating this framework with the financial planning theory to examine the legitimacy or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning licensing model in Australia.
