**Contract and Regulation** Roger Brownsword, Rob A.J. van Gestel, Hans-W. Micklitz, 2017-09-29 Contract and Regulation A Handbook on New Methods of Law Making in Private Law sheds light on the darker side of contracts It begins by exploring the regulatory space in which projects are planned deals are done and goods and services are consumed then shows how a bottom up approach can be adopted in order to view this transactional space through the eyes of contractors The expert contributors explore modes of governance that do not fit nicely into traditional contract theory paying special attention to three key examples governance and codes of conduction networks and relations compliance and use **Financial**

*Electronic Consumer Contracts in the Conflict of Laws* Zheng Sophia Tang, 2009-09-09 The application of private international law to electronic consumer contracts raises new complex and controversial questions It is new because consumer protection was not a private international law concern until very recently and e commerce only became an important commercial activity within the last ten years E consumer contracts generate original questions which have not been considered under traditional private international law theories It is complex because it has to deal both with difficulties raised by consumer contracts and the challenges of e commerce Reasonable resolutions to consumer contracts may prove inappropriate in e commerce while effective approaches to resolving private international law problems in e commerce may be improper for consumer contracts It is controversial because it concerns the conflicting interests of consumers and businesses in a fast moving commercial environment a fair balance is therefore hard to achieve Without proper solutions provided by private international law consumers will not be confident about purchasing online and businesses will face unreasonable risk and participation costs in e commerce Updated and properly designed private international law rules are essential to the further development of e commerce This book aims to provide an answer to the urgent requirement for legal certainty security and justice in e consumer contracts It is primarily concerned with existing approaches to jurisdiction and choice of law issues in e consumer contracts in the European Community and England but some typical approaches in other jurisdictions are also examined Based on the analysis and the comparative study of the existing law the book seeks to provide a proposal as to what the law should be in order to provide certainty to both parties to provide reasonable protection to consumers and to promote the development of e commerce International Construction Law Wolfgang Breyer, 2024-03-29 The construction industry routinely operates across international borders which means that construction professionals need

to have a good understanding of how legislation in different jurisdictions might affect their work This book is an in depth analysis of international construction law from all the major jurisdictions of the world alongside their relevant contract law principles helping the reader to prepare for the complexity of an international construction project The book begins by introducing the major families of law before looking at individual jurisdictions Each chapter is written by an experienced legal professional operating in that region and covers subjects such as taking over defects liabilities warranties design issues termination bonds and guarantees limitation of liability and more The systems included are German civil system Germanic code French civil system Napoleonic code English common law system GCC countries civil law system with emphasis on UAE Qatar Saudi Arabia and Egypt Nordic legal system Chinese civil system Finally the book will discuss the national standard construction contracts used in the differing legal systems and the widely used FIDIC contracts The combination of truly international coverage with the practical insight of experienced practitioners means that this book will be invaluable to any professional involved in the construction industry including lawyers project managers contractors and investors as well as academics in the field
