The Regulation of Membrane Lipid Metabolism, Second Edition Guy A. Thompson, Jr., 1992-03-10 This book provides a concise description of the metabolic pathways by which lipids of animal and plant membranes are formed The book emphasizes modulation of these pathways by hormones diet environmental stress and other factors This new edition is extensively revised containing new material on topics such as lipid mediated signal transduction and lipid induced protein translocation The new edition also features an entirely new chapter on lipids covalently bound to proteins The book is excellent for all researchers and students interested in membrane lipid metabolism Regulation of Membrane Lipid Metabolism

Guy A. Thompson, 1980-04-03 Summarizes the current knowledge on the metabolism of membrane lipids emphasizing the regulatory interactions Somewhere between a general textbook and a comprehensive review article for students who want to apply their learning from a basic biochemistry course to problems involving membranes Also useful to researchers in related fields whose work sometimes involves membranes Extensively updated from the 1980 edition Annotation copyrighted by Book News Inc Portland OR *Regulation of Membrane Lipid Metabolism and Immune Cell Function by the Nuclear Receptor LXR* Kirsty Elizabeth Waddington, 2018 **Biomedical Index to PHS-supported**

Murray, 2012-12-06 The present volume contains the edited transcript of a Totts Gap Colloquium held May 19 21 1980 sponsored by the Muscular Dystrophy Association The aim of the colloquium was to bring into focus data relating to cell membranes that might contribute to understanding the pathogenic mechanism of Duchenne muscular dystrophy A major impediment to progress in understanding the pathogenesis of muscular dystrophy has been the failure so far to identify the basic genetic defect Pending the identification of the genetic lesion in Duchenne dystrophy and in view of scattered but persistent indications of a basic membrane disturbance it seemed worthwhile to explore in open dialogue the current state of knowledge of membrane morphology and chemistry with an eye to possible leads for further investigation The participants drawn from a variety of interested disciplines attempted to synthesize and reconcile their findings and to identify crucial areas of ignorance in need of exploration For the most part they avoided specialized jargon and spoke in a language that could be understood by the rest of the group Apart from providing a review of widely varying approaches to the study of the composition and behavior of cell membranes the discussions brought together current thinking on strategies and approaches to the study of the pathogenesis of muscular dystrophy Already the personal contacts made at the colloquium have led to new inter institutional collaborative investigations **Temperature Adaptation of Biological Membranes** Andrew R.
