Regulatory Reform And Labor Markets:

Regulatory Reform and Labor Markets James Peoples,1997-11-30 Regulatory reform represents a major shift in the government's role toward price determination in the transportation and telecommunication industries. The resulting policy emphasizes dependence on market forces to set prices and to encourage efficient production techniques. While extensive research investigates the influence of deregulation on prices, profits, and productivity, the effect on labor markets has not received the same scrutiny. Firms in these industries are of major importance to business operations in other industries because they provide the critical services of transporting goods and transmitting information. This may partly explain such extensive research on the product market aspects of regulatory reform. Examining labor markets in the transportation and telecommunications industries is also highly warranted as historically these industries represented some of the most heavily unionized sectors in the economy. The extent to which regulatory reform has encouraged product market competition may not necessarily result in the same degree of competition across industries. Regulatory Reform and Labor Markets debates the notion that research on regulatory reform and labor markets should develop within the framework of the competitive model. This is achieved by presenting diverging views on wage and employment determination in distinctly different deregulated industries.

Transportation Labor Issues and Regulatory Reform James H Peoples, Wayne K Talley,2004-08-24 Regulatory reform in the late 1970s and early 1980s vastly transformed the labor market for transportation workers. Most research in this area focuses on the effect of deregulation on the earnings of nonmanagement company workers in airline, trucking, and rail. Deregulation of transportation industries though has had a broader effect on workers. For instance, deregulation also influences workers' hours worked per week, working conditions, worker safety, and a

host of other labor issues Deregulation might also influence the earnings of managers and self employed workers in transportation industries Examining these issues is valuable because such analysis provides a more complete assessment of labor market changes following the shift to a more market oriented business environment Transportation Labor Issues and Regulatory Reform adds to the debate on deregulation s influence on transportation labor markets by presenting empirical evidence on an array of labor market outcomes in transportation industries Contributions to this volume are categorized by their analysis on worker safety working conditions and employment opportunities and by their analysis on managerial and self employed earnings

World Economic Outlook, April 2025 International Monetary,International Monetary Fund. Research Dept,2025-04-22 The latest World Economic Outlook reports a slowdown in global growth as downside risks intensify While policy shifts unfold and uncertainties reach new highs policies need to be calibrated to rebalance growth inflation trade offs rebuild buffers and reinvigorate medium term growth thereby reducing both internal and external imbalances Policies that promote healthy aging bridge gender disparities and enhance the alignment of migrants skills with local labor market demands can play a crucial role in countering slow economic growth and fiscal pressures especially when coupled with infrastructure investment The movement of migrants and refugees has become a fixture of public debate Chapter 3 examines how changes in the stringency of migrant and refugee policies can alter the journeys and legal pathways people choose to take within and between economies For example stricter policies can deflect flows of people to new destinations Those economies can experience short term challenges from strains on local services but ultimately benefit in the longer term Costs are likely to be

more severe where challenges to integrate newcomers are larger notably in emerging market and developing economies and their skills are not well matched with local labor market needs Benefits can materialize sooner by boosting infrastructure investment and promoting private sector development International cooperation can also help by more evenly distributing short term costs across economies

Employment Regulations Through the Eyes of Employers Gaëlle Pierre,2004 Pierre and Scarpetta present evidence on how employers perceive labor regulations and react when these are perceived to constrain the operation of their firm They draw from harmonized surveys of up to 17 000 firms around the world and compare employers responses with actual labor legislation The authors find that employers concerns about labor regulations are closely matched by the relative stringency of de jure labor laws Countries that have from an international perspective tight labor regulations tend to have higher proportions of employers reporting these regulations as severe constraints

Marketcraft Steven K. Vogel,2018-02-01 Modern day markets do not arise spontaneously or evolve naturally Rather they are crafted by individuals firms and most of all by governments Thus marketcraft represents a core function of government comparable to statecraft and requires considerable artistry to govern markets effectively Just as real world statecraft can be masterful or muddled so it is with marketcraft In Marketcraft Steven Vogel builds his argument upon the recognition that all markets are crafted then systematically explores the implications for analysis and policy In modern societies there is no such thing as a free market Markets are institutions and contemporary markets are all heavily regulated The free market revolution that began in the 1980s did not see a deregulation of markets but rather a re regulation Vogel looks at a wide range of policy issues to support this concept focusing in particular on the US and Japan He examines how the US the freest market economy is actually among the most heavily regulated advanced economies while Japan s effort to liberalize its economy counterintuitively expanded the government s role in practice Marketcraft demonstrates that market institutions need government to function and in increasingly complex economies governance itself must feature equally complex policy tools if it is to meet the task In our era and despite what anti government ideologues contend governmental officials regardless of party affiliation should be trained in marketcraft just as much as in statecraft
