Rehabilitation Medicine Core Competencies Curriculum Adrian Cristian,2014-09-04 Built around the six core competencies for physicians practicing rehabilitation medicine as required by the ACGME Physical Medicine and Rehabilitation Patient Centered Care Mastering the Competencies is a unique self directed text for residents Covering all aspects of patient centered care in the practice of physical medicine and rehabilitation the book provides a competency based approach to topics and conditions commonly encountered in this specialty Thoughtfully organized chapters offer easy to access clinical content for all major

practice areas and the book's competency based goals and objectives also serve as a clear platform for educating physiatrists in training during their clinical rotations. The first part of the book presents the foundations of the core competencies: medical knowledge, professionalism, patient care, practice based learning and improvement, system based practice, and interpersonal and communication skills, with basic principles for application and also includes chapters on implementing educational milestones, core professional education principles, and building leadership skills. In the second part, experts in the field apply these core competencies to the management of common conditions including stroke, spinal cord and brain injury, amputation and prosthetics, musculoskeletal disorders, multiple sclerosis, and much more. Each of these chapters identifies goals and objectives for each competency and concludes with a representative case study and self-assessment questions with answers and explanations. The book also provides references to key articles and links to internet based educational materials. Practical tips, how to and where to guides, key points, tables, and charts also help to maintain current knowledge and competency in the many areas that comprise the field of PM/R. The book will be a valuable asset to physiatrists in training, program directors, and teaching faculty in rehabilitation medicine training programs, and for continuing professional development. **Key Features:** Addresses core competencies for rehabilitation medicine physicians as required by the ACGME. Covers all major physiatric practice areas with facts, concepts, goals, and objectives following the competency model. Grounded in a holistic, patient centered approach. Presents sample case studies with discussion points and self-assessment questions with answer key and explanations for each area to track progress and build clinical acumen.

Rao Poduri, 2017-03-16. Geriatric Rehabilitation addresses the fact that this is an age in which individuals have increasing longevity, better health care, education, and expectations of health care, which present new, increasing, and even radical challenges to health care providers. The care of our older patients in rehabilitation settings demands the broad understanding of the key differences in strategies to care for older adults. The combined skills embraced in rehabilitation and geriatrics are presenting unprecedented opportunities for both fields to make substantive and even ground breaking improvements in the lives of millions of older adults who entrust their lives to us. Rarely in one's medical career are such opportunities so evident and achievable. Geriatric Rehabilitation, edited by Dr. K. Rao Poduri, MD, FAAPMR, draws on a distinguished group of authors who are the front line providers of care to the older adults. This book presents the full spectrum of the unique care needs of older patients who need the combined skills of physical medicine and geriatrics. It provides an easily accessible means of acquiring and improving these new skills for all those involved in geriatric care. Rehabilitation of Persons with
