The Living Classroom, Second Edition Christopher M. Bache, 2024-12-01 A pioneering work in teaching and transpersonal psychology The Living Classroom explores the dynamics of collective consciousness in the classroom In this second edition Bache has in his own words come out of the psychedelic closet speaking candidly about the role that psychedelics played in the development of his integral holistic pedagogy Combining scientific research with personal accounts collected over thirty years Bache examines the subtle influences that radiate invisibly around teachers as they work unintended cognitive resonances that spring up between teachers and students in the classroom While these kinds of synchronistic connections are often overlooked by traditional academics Bache demonstrates that they occur too frequently and are too pointed to be dismissed as mere coincidence Drawing upon Rupert Sheldrake's theory of morphic fields Bache proposes that well taught courses generate learning fields around them forms of collective consciousness that can trigger new insights and startling personal transformations Moving beyond theory this book is rich with student stories and offers practical hands on strategies for teachers who want to begin working with these learning fields to take their teaching to a more conscious level

Facets of Buddhist Thought K.N. Jayatilleke, 2009-01-01 This book presents a brilliant account of

of Theravada Buddhism and embraces a wide variety of themes ranging from the birth of Buddhism to the Buddha's prophetic teachings regarding the future of mankind. Topics covered include among many others the background of early Buddhism, the significance of the Buddha's birthday, the Buddhist doctrines of karma and reincarnation, the Buddhist conception of truth, good and evil, Nirvana, the individual, the universe, and the material world, the Buddhist view of nature and destiny, Buddhism and the caste system, Buddhism and international law, and the contemporary relevance of the Buddha's teachings to the modern world. Professor Jayatilake always writes with both the scholar and the lay reader in mind. As a result, this is a highly readable and extremely penetrating book, and one that explores the roots and nature of the Buddha's teachings and examines them in the light of contemporary knowledge. The present collection contains all essays earlier published in the book *The Message of the Buddha* edited by Ninian Smart, as well as essays that were published in the Wheel Publication series.

Love, Life and Death Chattopadhyaya D. P., 2010

The mysteries of love, life, and death claim the perennial fascination of the human mind. Religious and secular thinkers throughout history have grappled with shifting notions about these human experiences. But since our modes of enquiry, the language we employ, and our conventions of reasoning keep us bound to specific patterns of thought, we continue to be alienated from each other individually, communally, and civilizationally. In this book, eminent philosopher and scholar D. P. Chattopadhyaya asks anew the fundamental question: What is it to live, love, and die? Exploring the lives, writings, and actions of some of the world's most influential poets, philosophers, and scientists from Copernicus to Keats and from Sankara to Aurobindo, he wades through the stream of human consciousness and encounters traces of cultural universals.
