Reindeer People Living With Animals And Spirits In Siberia:

The Reindeer People Piers Vitebsky, 2006 Cambridge anthropologist Piers Vitebsky the first westerner to live with the Eveny of Siberia since the Russian revolution brings readers an extraordinary case of survival in one of the most inhospitable places on Earth of photos Hoofprints on the Land Ilse Köhler-Rollefson, 2023-01-05 Perfect for fans of English Pastoral and Wilding Hoofprints on the Land shows that herding cultures are not a thing of the past but a regenerative model for our future Hoofprints on the Land is a fascinating and lyrical book exploring the deep and ancient working partnerships between people and animals UN advocate and camel conservationist Ilse Köhler-Rollefson writes a passionate rallying cry for those invisible and forgotten herding cultures that exist all over the world and how by embracing these traditional nomadic practises we can help restore and regenerate the Earth Ilse has spent the last 30 years living with and studying the Raika camel herders in Rajasthan India and she shows how pastoralists can address many of the problems humanity faces Whether it be sheep cattle reindeer camels alpacas goats or yaks this ancient and natural means of keeping livestock challenges the myth that animal free agriculture is the only way forward for a healthy planet From the need to produce food more sustainably and equitably to the consequences of climate change land degradation and loss of biodiversity we can learn from pastoralists to help repair the human relationship with livestock to return to a model of intelligent cooperation rather than dominance As Ilse writes Herding is therapy not just for the planet but also for our souls Historical Dictionary of Shamanism Graham Harvey, Robert J. Wallis, 2015-12-15 A remarkable array of people have been called shamans while the phenomena identified as shamanism continues to proliferate This second edition of the Historical Dictionary of Shamanism contains with examples from antiquity up to today and from Siberia where the term shaman originated to Amazonia South Africa Chicago and many other places Many claims about shamans and shamanism are contentious and all are worthy of discussion In the most widespread understandings terms seem to refer particularly to people who alter states of consciousness or enter trances in order to seek knowledge and help from powerful other than human persons perhaps spirits But this says only a little about the artists community leaders spiritual healers or hucksters travelers in alternative realities and so on to which the label shaman has been applied This second edition contains a chronology an introduction and extensive bibliography The dictionary contains over 500 cross referenced dictionary entries on individuals groups practices and cultures that have been called shamanic This book is an excellent access point for students researchers and anyone wanting to know more about Shamanism **Animalkind** Jean Kazez, 2009-12-01 By exploring the ethical differences between humans and animals Animalkind establishes a middle ground betweenegalitarianism and outright dismissal of animal rights A thought provoking foray into our complex and contradictoryrelationship with animals Advocates that we owe each animal due respect Offers readers a sensible alternative to extremism by speakingof respect and compassion for animals not rights Balances philosophical analysis with intriguing facts andengaging tales *Humans and Other Animals*

Prof. Samantha Hurn, 2012-04-20 What are our attitudes towards other animals and how does this affect our humanity This work of anthrozoology explores the myriad and evolving ways in which humans and animals interact the divergent cultural constructions of humanity and animality found around the world and individual experiences of other animals This book looks at case studies covering blood sports such as hunting fishing and bull fighting pet keeping and petism eco tourism and wildlife conservation working animals and animals as food It addresses the idea of animal exploitation raised by the animal rights movements as well as the anthropological implications of changing attitudes towards animal personhood and the rise of a posthumanist philosophy in the social sciences more generally *Nature and Bureaucracy* David Jenkins, 2022-09-08 This book questions how bureaucracies conceive of and consequently interact with nature and suggests that our managed public landscapes are neither entirely managed nor entirely wild and offers several warnings about bureaucracies and bureaucratic mentality One prominent challenge facing scientists policymakers environmental activists and environmentally concerned citizens is to recognize that human influence in the natural world is pervasive and has a long history How we act or choose not to act today will continue to determine the future of the natural world Western style management of nature mediated by economic rationality and state bureaucracies may not be the best strategy to maintain environmental integrity The question is what kinds of human influence conceived of in the widest possible sense will produce ideal environments for future generations The related question is who gets to choose The author approaches the problem of analyzing the mutual influence of human and natural systems from two perspectives as an objective scholar investigating bureaucracies and natural systems from the outside and over the last decade as an inside practitioner working in various roles in federal land management agencies developing policies and regulations involved in the control of natural systems This book will be of great interest to students and scholars of natural resource management policy and politics and professionals working in environmental management roles as well as policymakers involved in public policy and administration Natural Resource Extraction and Indigenous Livelihoods Emma Gilberthorpe, Gavin Hilson, 2016-04-22 This book provides an extended analysis of how resource extraction projects stimulate social cultural and economic change in indigenous communities Through a range of case studies including open cast mining artisanal mining logging deforestation oil extraction and industrial fishing the contributors explore the challenges highlighted in global debates on sustainability Corporate Social Responsibility CSR and climate change The case studies are used to assess whether and how development processes might compete and conflict with the market objectives of multinational corporations and the organizational and moral principles of indigenous communities Emphasizing the perspectives of directly affected parties the authors identify common patterns in the way in which extraction projects are conceptualized implemented and perceived The book provides a deeper understanding of the dynamics of the human environments where resource extraction takes place and its consequent impacts on local livelihoods Its in depth case studies underscore the need for increased social accountability in the planning and development of natural

resource extraction projects Spirit Possession and Trance Bettina E. Schmidt, Lucy Huskinson, 2011-11-03 Spirit possession is a phenomenon that often elicits a response of fear particular in those who are ignorant of its meaning and role within its particular religious and cultural traditions Possession by divine beings such as spirits or gods is however a key practice in religions worldwide It is therefore important to gain an understanding of this practice in its cultural context before trying to develop a wider theory about it This fascinating book contains several case studies that present new interpretations of spirit possession worldwide The authors show the diversity of possible interpretations and methodological approaches that provide a new insight into the understanding of possession and trance Redefining Shamanisms David Gordon Wilson, 2013-01-31 Spiritualism and mediumship are often regarded as the product of lingering superstition in the Victorian era and as having limited relevance in modern Anglo American society Scholarship to date which has considered Spiritualism as a distinct religious tradition has focussed on analysing the phenomenon in terms of spirit possession only This volume analyses the development of shamanism communication with the spiritual world as a concept within North American English speaking scholarship with particular focus on Mircea Eliade s influential cross cultural presentation of shamanism By re examining the work of Sergei Shirokogoroff one of Eliade s principal sources the traditional Evenki shamanic apprenticeship is compared and identified with the new Spiritualist apprenticeship The author demonstrates that Spiritualism is best understood as a traditional shamanism as distinct from contemporary appropriations or neo shamanisms He argues that shamanism is the outcome of an apprenticeship in the management of psychic experiences and which follows the same pattern as that of the apprentice medium In doing so the author offers fresh insights into the mechanisms that are key to sustaining mediumship as a social institution *How Animals Heal Us* Jay Griffiths, 2025-06-05 A moving essential book Nobody writes about Nature with more beauty and grace than Jay Griffiths Brian Eno From celebrated author Jay Griffiths comes a unique and heartfelt insight into the healing nature of our relationship with animals Pet owners and animal lovers instinctively know that animals heal This book offers the evidence drawing widely on scientific discoveries history and Indigenous knowledge We meet a pot bellied pig who saved her owner s life lions who guarded a girl from kidnappers dolphins and whales rescuing people in danger and dogs who can smell cancer and phone the Emergency Services Animal sounds from insects to birdsong and the purring of cats are directly medicinal and their presence can heal the pain of loneliness Animals including donkeys can be natural therapists for the hurt psyche alleviating trauma fear and depression In this original revelatory and exuberant book Jay Griffiths explores how animals can have a role in every level of healing from the individual to the collective guiding us in how we might create societies that are healthier fairer and kinder Wolves may be teachers of ethics monkeys and dogs can object to unfairness and bees take collective decisions Animals are irresistible medicine for a healthy culture animating the arts with spectacular vitality and verve as poetry knows Open hearted playful and wise *How Animals Heal Us* puts animals at the heart of a restorative vision of health A wild and vital treasure trove of

The A to Z of Shamanism Graham Harvey, Robert J. Wallis, 2010-04-01 Few religious traditions have generated such diversity and stirred imaginations as shamanism In their engagements with other worlds shamans have conversed with animals and ancestors and have been empowered with the knowledge to heal patients advise hunters and curse enemies Still other shamans aided by rhythmic music or powerful plant helpers undertake journeys into different realities where their actions negotiate harmony between human and other than human communities Once relegated to paintings on cave walls today Shamanism can be seen in performances at rave clubs and psychotherapeutic clinics The *A to Z of Shamanism* has the dual task of exploring the common ground of shamanic traditions and evaluating the diversity of both traditional indigenous communities and individual Western seekers This is done in an introduction a bibliography a chronology and hundreds of cross referenced dictionary entries which explore the consistent features of a variety of shamans the purposes shamanism serves the function and activities of the shaman and the cultural contexts in which they make sense

A Fractured North Erich Kasten, Igor Krupnik, Gail Fondahl, 2025-03-03 The volumes of the *Fractured North* series address research collaborations in Siberia and the Russian North that are now at risk or frozen and how partnerships might be restored under the evolving political situation The first two volumes explored ethical and moral dilemmas of continuing collaborative studies in the fractured North and the ramifications of ceasing such collaborations While many scholars have pivoted their attention to other regions others have maintained their focus on the Russian North striving to sustain the circumpolar approach of the past decades Contributions in this third volume deal with how we might move forward despite the many fissures in our field Moving forward includes a variety of approaches adopting new er

methodologies for carrying out studies from afar e g netography establishing new connection hubs at Western institutions maintaining already established collaborations via joint meetings on neutral territory and more We anticipate that these volumes together will provide a record of the reflections concerns anguish and inspirations of over fifty social scientists who chose the Russian North as their locus of research We also dearly hope that it will serve as a historic account of a period of fracture that will before long heal

Relational Archaeologies Christopher Watts, 2014-04-11 Many of us accept as uncontroversial the belief that the world is comprised of detached and disparate products all of which are reducible to certain substances Of those things that are alive we acknowledge that some have agency while others such as humans have more advanced qualities such as consciousness reason and intentionality So deeply seated is this metaphysical belief along with the related distinctions we draw between subject object mind body and nature culture that many of us tacitly assume past groups approached and apprehended the world in a similar fashion Relational Archaeologies questions how such a view of human beings other than human creatures and things affects our reconstruction of past beliefs and practices It proceeds from the position that in many cases past societies understood their place in the world as positional rather than categorical as persons bound up in reticular arrangements with similar and not so similar forms regardless of their substantive qualities Relational Archaeologies explores this idea by emphasizing how humans animals and things come to exist by virtue of the dynamic and fluid processes of connection and transaction In highlighting various counter Modern notions of what it means to be and how these can be teased apart using archaeological materials contributors provide a range of approaches from primarily theoretical historicized treatments of the topic to practical applications or case studies from the Americas the UK Europe Asia and Australia

Empire Speaks Out Ilya Gerasimov, Jan Kusber, Alexander Semyonov, 2009-06-02 Historians habitually write about empires that expand wage wars and collapse as if empires were self evident and self conscious entities with a distinct and clear sense of purpose The stories of empires are told in the language of modern nation centred social sciences multi cultural and heterogeneous empires of the past appear either as huge nations with a common language culture and territory or as amalgamations of would be nations striving to gain independence Empire Speaks Out reconstructs the historical encounter of the Russian Empire of the seventeenth through the early twentieth centuries with the complex challenge of modernity It does so by taking the self awareness of empire seriously and by looking into how bureaucrats ideologues politicians scholars and modern professionals described the ethnic cultural and social diversity of the empire Empire then reveals itself not through deliberate and well conceived actions of some mysterious political body but as a series of imperial situations that different people encounter and perceive in common categories The rationalization of previously intuitive social practices as imperial languages is the central theme of the collection This book is published with support from Volkswagen Foundation within the collective research project Languages of Self Description and Representation in the Russian Empire

A History of the Arctic John McCannon, 2013-02-15. Bitter cold and constant snow. Polar bears, seals and killer whales. Victor Frankenstein chasing his monstrous creation across icy terrain in a dogsled. The Arctic calls to mind a myriad of different images. Consisting of the Arctic Ocean and parts of Canada, the United States, Russia, Greenland, Finland, Norway and Sweden, the Arctic possesses a unique ecosystem. Temperatures average negative 29 degrees Fahrenheit in winter and rarely rise above freezing in summer and the indigenous peoples and cultures that live in the region have had to adapt to the harsh weather conditions. As global temperatures rise, the Arctic is facing an environmental crisis with melting glaciers causing grave concern around the world. But for all the renown of this frozen region, the Arctic remains far from perfectly understood. In *A History of the Arctic*, award winning polar historian John McCannon provides an engaging overview of the region that spans from the Stone Age to the present. McCannon discusses polar exploration and science, nation building, diplomacy, environmental issues and climate change and the role indigenous populations have played in the Arctic's story. Chronicling the history of each Arctic nation, he details the many failed searches for a Northwest Passage and the territorial claims that hamper use of these waterways. He also explores the resources found in the Arctic: oil, natural gas, minerals, fresh water and fish, and describes the importance they hold as these resources are depleted elsewhere as well as the challenges we face in extracting them. A timely assessment of current diplomatic and environmental realities as well as the dire risks the region now faces. *A History of the Arctic* is a thoroughly engrossing book on the past and future of the top of the world.

Landscape and Culture in Northern Eurasia Peter Jordan, 2016-06-16. This unique volume aims to break down the lingering linguistic boundaries that continue to divide up the circumpolar world to move beyond ethnographic "thick description" to integrate the study of northern Eurasian hunting and herding societies more effectively by encouraging increased international collaboration between archaeologists, ethnographers and historians and to open new directions for archaeological investigation of spirituality and northern landscape traditions. Authors examine the life ways and beliefs of the indigenous peoples of northern Eurasia. Chapters contribute ethnographic, ethnohistoric and archaeological case studies stretching from Fennoscandia through Siberia and into Chukotka and the Russian Far East.
