Reinhard Heydrich Enigma The Biography Volume 2:

Extra Life Steven Johnson, 2021-05-11 Offers a useful reminder of the role of modern science in fundamentally transforming all of our lives President Barack Obama on Twitter An important book Steven Pinker The New York Times Book Review The surprising and important story of how humans gained what amounts to an extra life from the bestselling author of How We Got to Now and Where Good Ideas Come From In 1920 at the end of the last major pandemic global life expectancy was just over forty years Today in many parts of the world human beings can expect to live more than eighty years As a species we have doubled our life expectancy in just one century There are few measures of human progress more astonishing than this increased longevity Extra Life is Steven Johnson's attempt to understand where that progress came from telling the epic story of one of humanity's greatest achievements How many of those extra years came from vaccines or the decrease in famines or seatbelts What are the forces that now keep us alive longer Behind each breakthrough lies an inspiring story of cooperative innovation of brilliant thinkers bolstered by strong systems of public support and collaborative networks and of dedicated activists fighting for meaningful reform But for all its focus on positive change this book is also a reminder that meaningful gaps in life expectancy still exist and that new threats loom on the horizon as the COVID 19 pandemic has made clear How do we avoid decreases in life expectancy as our public health systems face unprecedented challenges What current technologies or interventions that could reduce the impact of future crises are we somehow ignoring A study in how meaningful change happens in society Extra Life celebrates the enduring power of common goals and public resources and the heroes of public health and medicine too often ignored in popular accounts of our history This is the sweeping story of a revolution with immense public and personal consequences the doubling of the human life span
