Reinterpreting Revolution In Twentieth Century Europe:

Reinterpreting Revolution in Twentieth-Century Europe Moira Donald, Tim Rees, 2017-03-14 Until the dramatic fall of Communist regimes in the East placed the possibility of revolution on the agenda once again sudden and decisive political change had appeared a largely anachronistic phenomenon in Europe Looking back over the twentieth century it is plausible to argue that the twentieth rather than the nineteenth has been the most revolutionary of centuries In this volume leading specialists from a variety of disciplines examine the changing and conflicting meanings of revolution in modern and contemporary Europe Contributions include both broad essays on the global and historical context of European revolution and specific case studies reinterpreting a variety of revolutionary experiences

Revolution in the Making of the Modern World John Foran, David Lane, Andreja Zivkovic, 2007-11-05 This volume questions whether ideas of revolution are still relevant in the postmodern and globalized world of the twenty first century Featuring contributions from some of the world s leading sociological and political thinkers on revolution it combines theoretical concerns with a variety of detailed case studies of individual revolutions Subjects covered include democracy and revolution from 1789 to 1989 twentieth century revolutions and theories of revolution including Marxism modernization and structuralist theories revolution in the Third World and the variable geometry of the paths to modernity Islamic revolutions and modernity the 1989 revolutions as democratic revolutions or elite led transitions globalization the nation state and revolution empire and democratic revolution network society and revolution Islamic fundamentalism international terrorism and revolution democratic revolution as a new form of revolution postmodern theories of revolution new social movements identities and new figures of revolution Revolution in the Making of the Modern World will be essential reading for students and scholars of comparative politics political theory revolution and political sociology

Twisted Paths Robert Gerwarth, 2007-08-09 A concise introduction to European history between 1914 and 1945 this series of succinct interpretations written by leading scholars offers a new introduction to the period Covering historical developments in all areas within Europe s natural borders from the Atlantic to the Arctic Ocean from the Bosphorus to the Urals and the Mediterranean the book moves beyond the view that the history of this period can only be understood in terms of catastrophe Instead it argues for a more balanced perspective suggesting that both darker and lighter elements in Europe s history were capable of evolving simultaneously Without neglecting the more familiar stories of war genocide and economic depression each chapter demonstrates that political stability and regime collapse social progress and mass poverty the crisis of European civilization and remarkable cultural achievements existed alongside each other Emphasising the histories of the smaller states and the multi faceted nature of the period Twisted Paths illuminates the diversity of Europe s experiences in the first half of the twentieth century

Bourgeois Liberty and the Politics of Fear Marc Mulholland, 2012-10-04 In 1842 Heinrich Heine the German poet wrote that the bourgeoisie obsessed by a nightmare apprehension of disaster and an instinctive dread of communism were driven against their better instincts

into tolerating absolutist government. There was a politics motivated by fear. Over the next 150 years the middle classes were repeatedly accused of betraying liberty for fear of red revolution. The failure of the revolutions of 1848, conservative nationalism from the 1860s, fascist victories in the first half of the twentieth century and repression of national liberation movements during the Cold War, these fateful disasters were all explained by the bourgeoisie's fear of the masses. For their part, conservatives insisted that demagogues and fanatics exploited the desperation of the poor to subvert liberal revolutions leading to anarchy and tyranny. Only evolutionary reform was enduring. From the 1970s, however, liberal revolution revived on an unprecedented scale. With the collapse of communism, bourgeois liberty once again became a crusading force but now on a global scale. In the twenty-first century the armed forces of the United States, Britain and NATO became instruments of regime change seeking to destroy dictatorship and build free market democracies. President George W. Bush called the invasion of Iraq in 2003 a watershed event in the global democratic revolution. This was an extraordinary turn around with the middle classes now hailed as the truly universal class which in emancipating itself emancipates all society. The debacle in Iraq and the Great Recession from 2008 revealed all too clearly that hubris still invited nemesis. *Bourgeois Liberty and the Politics of Fear* examines this remarkable story and the fierce debates it occasioned. It takes in a span from the seventeenth century to the twenty-first covering a wide range of countries and thinkers. Broad in its scope it presents a clear set of arguments that shed new light on the creation of our modern world. [The Return of Eurasia](#) Glenn Diesen, Alexander Lukin, 2021-07-23. This book defines Eurasianism, a political idea with a long tradition for a new century. Historically, Eurasia was depicted as a third continent with a geographical and historical space distinctively different from both Europe and Asia. Today the concept is mobilized by the Russian foreign policy elite to imagine a close relationship with China and indirectly inspires the Chinese Belt and Road Initiative. A Russian-Chinese partnership forms the core of a new Eurasian region yet Turkey, India, Hungary, Central Asia and the other parts of the supercontinent are also embracing Eurasian concepts. This book is of interest to scholars of Russian and Chinese foreign policy, to economists and to scholars of political thought.

Revolution, Rebellion, Resistance Professor Eric Selbin, 2013-04-04. Why do revolutions happen? Decades of social science research have brought us little closer to understanding where, when and amongst whom they occur. In this groundbreaking book, Eric Selbin argues that we need to look beyond the economic, political and social structural conditions to the thoughts and feelings of the people who make revolutions. In particular, he argues we need to understand the stories people relay and rework of past injustices and struggles as they struggle in the present towards a better future. Ranging from the French Revolution to the Battle for Seattle via Russia, China, Cuba, Vietnam and Nicaragua, Selbin makes the case that it is myth, memory and mimesis which create, maintain and extend such stories. *Revolution, Rebellion, Resistance* identifies four kinds of enduring revolutionary story: Civilizing and Democratizing, The Social Revolution, Freedom and Liberation, and The Lost and Forgotten, which do more than report on events; they catalyse changing the world. **Political and Social Thought in**

Post-Communist Russia Axel Kaehne, 2007-11-13 This is the first comprehensive study of Russian political and social thought in the post Communist era The book portrays and critically examines the conceptual and theoretical attempts by Russian scholars and political thinkers to make sense of the challenges of post communism and the trials of economic political and social transformation It brings together the various strands of political thought that have been formulated in the wake of the collapsed communist doctrine It engages constructively with the numerous attempts by Russian political theorists and social scientists to articulate a coherent model of liberal democracy in their country The book investigates critical as well as favourable voices in the Russian debate on liberal democracy a debate often marked by eclecticism and at times little conceptual discipline As such the book will be of great interest both to Russian specialists and to all those interested in political and social thought more widely 'The Politics' and 'The Political' of the Eastern Partnership Initiative

Elena Korosteleva, Igor Merheim-Eyre, Eske Van Gils, 2019-10-23 The Special Issue consolidates new approaches to the study of the EU's role in the eastern neighbourhood and beyond informed by post structuralist traditions in international relations More specifically by revisiting the European Neighbourhood Policy's agenda from the conceptual perspective of the political and redefining the notions of othering differentiation and normalisation this volume renders a new and much needed theoretical and empirical outlook onto the policy developments and their practices By unpacking and connecting security regional institutional normative and sector thematic policy dimensions the book seeks to re politicise the agenda and re focus policy revision on understanding the fundamentals of power relations when applied to the EU external relations In light of the compounding crises external and internal one can no longer afford to simply tinker around the edges of the policy content and instruments A more radical theoretical undertaking is overdue to re shape re define and re centre the EU relations with the eastern region especially put in the context of the new EU's Global Security Strategy and the new aspirations for the 2017 European Neighbourhood summit The chapters originally published as a special issue in East European Politics Resistance

Shane Moran, 2021-04-19 In Resistance Sol Plaatje and South Africa Shane Moran studies Sol Plaatje the founding secretary of what was to become the African National Congress ANC and his work within the context of colonial politics and resistance Arguing for a return to the study of one of the founders of anti racism Moran explores issues of land reform human rights and the legacy of colonialism Through an in depth analysis of Plaatje's resistance to racial domination Moran examines the nature of the struggles that continue within and beyond South Africa today In particular Moran analyzes events from the beginning of the previous century that shaped post 1994 South Africa such as the resolution of the ANC to expropriate land without compensation Tudor England and its Neighbours

Glenn Richardson, Susan Doran, 2017-09-16 This new study of Tudor international relations is the first in nearly thirty years Adopting a fresh approach to the subject this lively collection presents the work of a team of established and younger scholars who discuss how the Tudor monarchs made sense of the world beyond England's shores Taking account of recent developments in cultural gender

and institutional history the contributors analyse the important changes and continuities in England's foreign policy during the Tudor age Tudor England and its Neighbours addresses key questions such as Did Henry VII break with the past by pursuing peace with France What was the impact of the break with Rome and the introduction of Protestantism on England's relations with other countries Was war between Elizabethan England and Spain inevitable Using new evidence and reinterpreting traditional narratives these essays illuminate the complexities and the sometimes surprising subtleties of England's international relations between 1485 and 1603

Frontiers in Question Daniel Power, Naomi Standen, 1999-04-19 We are used to the idea that each state has clearly defined borders which cleanly separate different nationalities from one another What though were frontiers like before the evolution of the modern nation state The nine essays in this book seek to answer this question across a thousand years of Eurasian history

The Middling Sort of People Jonathan Barry, Christopher Brooks, 1994-10-26 This volume of essays seeks to offer a radical re-evaluation of most of our preconceptions about the early modern English social order The majority of people who lived in early modern England were neither very rich nor very poor yet a disproportionate amount of historiography has been directed towards precisely these groups This book intends to define the term middle classes and treat them as active participants of history rather than as a simple by-product rising and falling according to others activities

The Politics of the Excluded, c. 1500-1850 Tim Harris, 2017-03-14 This collection of essays seeks to shed light on the politics of those people who are normally thought of as being excluded from the political nation in early modern England If by political nation we mean those who sat in parliament the governors of counties and towns and the enfranchised classes in the constituencies then the excluded would be those who were neither actively involved in the process of governing nor had any say in choosing those who would rule over them the bulk of the population at this time Yet this volume shows that these people were not in fact excluded from politics Not only did the masses possess political opinions which they were capable of articulating in a public forum but they were also often active participants in the political process themselves and taken seriously in that capacity by the governmental elite The various essays deal with topics as wide-ranging as riots rumours libels seditious words public opinion the structures of local government and the gendered dimensions of popular political participation and cover the period from the eve of the Reformation to the Industrial Revolution They challenge many existing assumptions concerning the nature and significance of public opinion and politics out of doors in the early modern period and show us that the people mattered in politics and thus why we as historians cannot afford to ignore them Politics was more participatory in this undemocratic age than one might have thought The contributors to this volume show that there was a lively and engaged public sphere throughout this period from Tudor times to the Georgian era

AntiFascism and Memory in East Germany Josie McLellan, 2004-10-07 AntiFascism and Memory in East Germany is a book about remembering and about forgetting about war and about the peace which eventually followed In the unlikely setting of the German Democratic Republic GDR the Spanish Civil War became the subject of a debate which both predated and outlasted the Cold War involving historians veterans politicians censors artists writers and Church activists Examining these multiple memories and interpretations of Spain casts new and unexpected light on the legacy of the Spanish Civil War and the relationship between history and memory under state socialism The ruling Socialist Unity Party made full use of the antifascist legacy as legitimation for a non democratic state But despite dogged attempts at control and censorship the state was unable to silence competing voices All over East Germany International Brigade veterans preserved their version of events in letters to each other in communications with the party in discussions with friends and family around the kitchen table and in memoirs written for the desk drawer For younger East Germans the war retained an undeniably romantic aura From their perspective Spain was a far away land to which they were forbidden to travel the stuff of camp fire singalongs and fantasies of adventure This book dissects the relationship between state sponsored history the lobbying of veterans cultural interpretations of war and the memory traces left behind by marginalised or politically oppositional groups and individuals It is a cultural history of memory under state socialism a social history of veteran groups and their relationship with the state and a political history of communist culture Above all it is the story of how post war Europeans came to terms with the heavy burden of their pre war past

Russia Against the Rest Richard Sakwa, 2017-10-12 In this book Richard Sakwa provides a new analysis of the end of the Cold War and the subsequent failure to create a comprehensive and inclusive peace order in Europe The end of the Cold War did not create a sustainable peace system Instead for a quarter of a century a cold peace reflected the tension between cooperative and competitive behaviour None of the fundamental problems of European security were resolved and tensions accumulated In 2014 the crisis exploded in the form of conflict in Ukraine provoking what some call a new Cold War Russia against the Rest challenges the view that this is a replay of the old conflict explaining how the tensions between Russia and the Atlantic community reflect a global realignment of the international system Sakwa provides a balanced and carefully researched analysis of the trajectory of European and global politics since the late 1980s

Breaking Boundaries Agnes Horvath, Bjørn Thomassen, Harald Wydra, 2015-05-01 Liminality has the potential to be a leading paradigm for understanding transformation in a globalizing world As a fundamental human experience liminality transmits cultural practices codes rituals and meanings in situations that fall between defined structures and have uncertain outcomes Based on case studies of some of the most important crises in history society and politics this volume explores the methodological range and applicability of the concept to a variety of

concrete social and political problems
