Reinventing Hospitals On Target For The 21st Century:

Reinventing Hospitals Nancy Cybulski,1997 **Doing Good** J.T.H. Connor,2000-12-15 A history of Toronto's general hospital offers a window on a broader history of Upper Canada and Ontario over the last two centuries In this lively and authoritative account J T H Connor traces the hospital's two hundred year evolution as its mandate to do good forced constant adjustment to changing social medical and government attitudes Doing Good presents the hospital's history in three phases roughly speaking the first and second halves of the nineteenth century and the twentieth century From its conception in 1797 to the mid 1850s it did not actually acquire a home until 1819 nor occupy it until 1829 it functioned as a charitable institution catering to the sick poor It acted initially as a clearing station for sick immigrants it later was deeply affected by political events and became embroiled in the medical turmoil of Toronto in the 1840s and early 1850s In the second era from the mid 1850s it was a public charity receiving stable government funding and constructing a new home in eastern Toronto By the 1870s it was winning praise as a model hospital In the twentieth century it early on established close links with the University of Toronto building a vast and up to date new facility adjacent to the university which opened in 1913 Its international reputation as an academic hospital grew over the decades to include a high profile in research most notably in cancer and medical technology By the 1960s the institution was being run as a public hospital and the late 1990s saw its absorption into a hospital mega corporation the University Health Network along with three other nearby hospitals This work is the most comprehensive analysis of any Canadian hospital or health care institution yet to appear Using trustees minutes medical journals newspapers and government reports along with correspondence photographs and reminiscences of trustees nurses doctors and patients Connor offers acute observation and detailed analysis as well as compelling character studies and revealing anecdotes Broad in scope and meticulously executed Doing Good brings vividly to life the day to day routines the behind the scenes intrigue and the people and politics of a great urban hospital *Bibliotheca Medica Canadiana* ,1998

Health Care Administration Lawrence F. Wolper,2004 Health Care Administration continues to be the definitive guide to contemporary health administration and is a must have reference for students and professionals This classic text provides comprehensive coverage of detailed functional technical and organizational matters *Reinventing the Good Life* Jeannette Pols ,2023-12-04 Ever since Adam Smith's musings on the invisible hand became more famous than his work on moral sentiments social theorists have paid less attention to everyday ethics and aesthetics Smith's metaphor of the invisible hand posits that social outcomes emerge by dint of the behaviours of individuals rather than their intentions or virtues Modernist and scientific approaches to determining the common good or good forms of governance have increasingly relied on techniques of generalisation and rationalisation This shift has meant that we no longer comprehend why and how people display a deep concern for everyday life values in their social practices People continue to enact these values and live by them while academics lack the vocabulary and methods to grasp them By reconstructing the history of ideas about everyday

life values and by analysing the role of such values in contemporary care practices for patients with chronic disease in the Netherlands *Reinventing the Good Life* explores new ways to study the values of everyday life particularly in situations where the achievement of a clear cut or uniform good is unlikely The book presents a practice based epistemology and methodology for studying everyday care practices and supporting their goodness This analytical approach ultimately aims to generate ideas that will allow us to relate in more

Reinventing Depression Christopher M. Callahan, German E. Berrios, 2005 By tracing the history of depression in primary care over the past half century in the US and UK this book opens a pathway for future improvements in the treatment of depressed patients The authors argue for a public health perspective that will place more emphasis on the roles of society and culture in causing depression and will help close the gap between primary care practice and psychiatric knowledge

Reinventing Care David Barton Smith, 2003 The recent growth of assisted living facilities and programs has shaken the foundations of the system of long term care for the elderly in the United States Fueled by consumer frustrations with the available options notably nursing homes the assisted living model emerged during the 1990s to promise shelter health care control of one's own life less government involvement and a real home But how well have the advocates and developers of assisted living delivered on such promises And what are the model's implications for public policy and the future of caregiving In *Reinventing Care* David Barton Smith offers brilliant insights into those questions by examining the realities of assisted living in New York City Encompassing the largest most concentrated population of elderly in the United States New York spends more per person caring for its seniors than any other urban center Yet while the size of the city's care system boggles the mind it nevertheless contains the same elements that exist in other metropolitan areas and thus provides valuable lessons for the nation as a whole Smith's study draws on twenty five years of research including hundreds of interviews and visits to representative facilities He provides a succinct overview of how care is presently organized for New York's aging population and traces the history of the system up to the present Among the key issues he addresses are the role of market forces and government regulation the impact of class differences on access to quality care and the ways in which perceptions of community affect the creation and management of assisted living programs At the heart of the book are ten fascinating case studies half of them focused on private pay facilities and the other half on public pay institutions While finding that the actualities of assisted living rarely match the rhetoric of its proponents Smith sees much to admire in its goals He suggests tactics and strategies such as promoting family and community based models of assisted living and adopting a standard of licensure for certain facilities that could point the way to a better future

The Public-private Health Care State Rosemary A.

Stevens,2017-07-28 The distinctive mixing and continuous remixing of public and private roles is a defining feature of health care in the United States The Public Private Health Care State explores the interweaving of public and private enterprise in health care in the United States as a basis for thinking about health care in terms of its history and its continuing evolution today Historian and policy analyst Rosemary Stevens has selected and edited seventeen essays from both her published and unpublished work to illustrate continuing themes such as the flexible meanings of the terms public and private and how useful their ambiguity has been and is the role of ideology as ratifying rather than preordaining change and the common behavior of public leaders and corporate entities in the face of fiscal opportunity The topics covering the period of 1870

through the twenty first century represent Stevens research interests in hospital history and policy the medical profession government policy and paying for health care The volume also considers her involvement with policy questions which include health services research health maintenance organizations and physician workforce policy Section I demonstrates the long history of state government involvement with private not for profit hospitals from the 1870s through the 1930s Section II examines the federal role in health care from the 1920s through the 1970s including the establishment of veterans hospitals and the implementation of Medicaid Section III shows how shifting governmental roles require constantly changing organizing rhetoric whether for inventing a federal role for health services research and HMOs regionalization in the 1970s or defining civil rights and equity as mobilizing vehicles in the 1980s Section IV examines growing concerns from the 1970s through the present about the traditional public role of the largely private medical profession Section V returns to the ambiguous public priv
