Reinventing Cities for People and the Planet Molly O'Meara Sheehan, 1999 Introduction An urbanizing world Closing the water and waste circuits Toward greater self reliance in food and energy Linking transportation and land use Financing the sustainable city Building political strength Appendix

**Reinventing cities for people and the planet**, 1999 *Cities* Ian Douglas, 2013-05-30 Cities are amongst our greatest creations Yet with cities now home to over half the world's population there is increasing concern over their unchecked expansion and the detrimental effect this is having on the planet This unfettered growth is affecting every ecosystem on Earth from the deepest oceans to the highest mountains as induced climate change and ever increasing demands upon the world's resources take effect As the pace of urbanisation quickens how can we make the world's cities more sustainable Ian Douglas tells the story of cities He shows why they exist how they have evolved and the problems they have encountered revealing how from the very beginning environmental management played a key role in urban life He addresses specific problems such as noise and air pollution water supply and waste management as well as the vulnerability of cities to hazards such as earthquakes and flooding And he considers strategies to make cities more sustainable and help them adapt to climate change such as waste recycling energy conservation dual water systems sustainable housing as well as initiatives to retrofit existing cities Written by an acknowledged international authority this unique volume will be welcomed by students and specialists in environment planning geography ecology and the built environment

**Cities in a Globalizing World** Un-Habitat, 2012-06-25 The world has entered the urban millennium Nearly half the world's people are now city dwellers and the rapid increase in urban population is expected to continue mainly in developing countries This historic transition is being further propelled by the powerful forces of globalization The central challenge for the international community is clear to make both urbanization and globalization work for all people instead of leaving billions behind or on the margins Cities in a Globalizing World Global Report on Human Settlements is a comprehensive review of conditions in the world's cities and the prospects for making them better safer places to live in an age of globalization I hope that it will provide all stakeholders foremost among them the urban poor themselves with reliable and timely information with which to set our policies right and get the machinery of urban life moving in a constructive direction From the Foreword by Kofi Annan Secretary General United Nations Cities in a Globalizing World presents a comprehensive review of the world's cities and analyses the positive and negative impacts on human settlements of the global trends towards social and economic integration and the rapid changes in information and communication technologies In this Global Report the United Nations Centre for Human Settlements Habitat draws on specially commissioned and contributed background papers from more than 80 leading international specialists The report focuses on recent trends in human settlements and their implications for poverty inequity and social polarization It develops advance knowledge for urban planning and management policies in support and promotion of inclusive cities and good urban

governance This major and influential report is the most authoritative and up to date assessment of human settlements conditions and trends Written in clear non technical language and supported by informative graphics case studies and extensive statistical data it should be an essential tool and reference for academics researchers planners public authorities and civil society organizations around the world Cities, Disaster Risk and Adaptation Christine Wamsler,2014-01-23

Worldwide disasters and climate change pose a serious risk to sustainable urban development resulting in escalating human and economic costs Consequently city authorities and other urban actors face the challenge of integrating risk reduction and adaptation strategies into their work However related knowledge and expertise are still scarce and fragmented Cities Disaster Risk and Adaptation explores ways in which resilient cities can be built and sustainable urban transformations achieved The book provides a comprehensive understanding of urban risk reduction and adaptation planning exploring key theoretical concepts and analysing the complex interrelations between cities disasters and climate change Furthermore it provides an overview of current risk reduction and adaptation approaches taken by both city authorities and city dwellers from diverse contexts in low middle and high income nations Finally the book offers a planning framework for reducing and adapting to risk in urban areas by expanding on pre existing positive actions and addressing current shortfalls in theory and practice The importance of a distributed urban governance system in which institutions and citizens adaptive capacities can support and complement each other is highlighted This book takes a holistic approach it integrates perspectives and practice from risk reduction and climate change adaptation based on a specific urban viewpoint The text is richly supplemented with boxed case studies written by renowned academics and practitioners in the field and test yourself scenarios that integrate theory into practice Each chapter contains learning objectives end of chapter questions suggested further reading and web resources as well as a wealth of tables and figures This book is essential reading for undergraduate and postgraduate students of geography urban studies and planning architecture environmental studies international development sociology and sustainability studies

**Public Perception of Climate Change** Bjoern Hagen,2015-11-06 Despite the findings on global climate change presented by the scientific community there remains a significant gap between its recommendations and the actions of the public and policy makers So far scientists and the media have failed to successfully communicate the urgency of the climate change situation in such a way that long term comprehensive and legally binding policy commitments are being made on the national and international level This book examines the way the public processes information how they perceive threats and other perceptual factors that have a significant effect on how and to what degree climate change mitigation and adaptation strategies are supported Understanding public risk perception plays a vital role in communicating the challenges of global climate change Using a diverse range of international case studies this book explores the nature of public perceptions of climate change and identifies the perception factors which have a significant impact on the public s willingness to support global climate change policies or commit to behavioral changes to reduce greenhouse gas emissions

and improve urban resiliency The comparative study of social and cultural factors beliefs attitudes and trust provides an international overview of best practices regarding the design implementation and generation of public support for climate change policies at a global level Offering valuable insight into climate change and risk communication the book should be of interest to students and scholars of environment studies politics urban planning and media and cultural studies

**The Social Construction of Ancient Cities** Monica L. Smith, 2013-04-09 What made ancient cities successful What are the similarities between modern cities and ancient ones The Social Construction of Ancient Cities offers a fresh perspective on ancient cities and the social networks and relations that built and sustained them marking a dramatic change in the way archaeologists approach them Examining ancient cities from a bottom up perspective the authors in this volume explore the ways in which cities were actually created by ordinary inhabitants They track the development of urban space from the point of view of individuals and households providing new insights into cities roles as social centers as well as focal points of political and economic activities Analyzing various urban communities from residences and neighborhoods to marketplaces and ceremonial plazas the authors examine urban centers in Africa Mesoamerica South America Mesopotamia the Indian subcontinent and China Collectively they demonstrate how complex networks of social relations and structures gave rise to the formation of ancient cities contributed to their cohesion and sustained their growth much as they do in modern urban centers The authors analyses draw from ancient texts as well as archaeological surveys and excavations of urban architecture and other material remains including portable objects for daily use and comestibles They show clearly how early urban dwellers consciously developed dense interdependent social networks to satisfy their needs for food housing and employment forged their own urban identities and generally managed to thrive in the crowded bustling and competitive environment that characterized ancient cities Not least of all they suggest how urban leaders and urban dwellers negotiated a consensus that enabled them to achieve both mundane and extraordinary goals in the process establishing their unique ritual legal and social status

*Development and Social Change* Philip McMichael, 2012 Explores development through historical narrative and examines the globalization development paradox through in depth case studies In his Fifth Edition of *Development and Social Change A Global Perspective* author Philip McMichael examines the project of globalization and its instabilities climate energy food financial crises through the lens of development and its origins in the colonial project The book continues to help students make sense of a complex world in transition and explains how globalization became part of public discourse Filled with case studies this text makes the intricacies of globalization concrete meaningful and clear for students and moves them away from simple social evolutionary views encouraging them to connect social change development policies global inequalities and social movements The book challenges students to see themselves as global citizens whose consumption decisions have real social and ecological implications Key Features a world historical perspective that situates globalization in the declining fortunes of the postwar development project and considers current global limits and possibilities a political perspective that views development and globalization as discursive practices managed by historic elite groupings as mechanisms of power and world ordering an ecological perspective drawing attention to the environmental consequences of development and attempts to reintegrate social life in ecological cycles an emphasis on resistance and social movements as actors shaping the meaning and direction of these projects in addition to building alternatives a series of case studies that allow in depth examination of development globalization dilemmas and paradoxes to interrupt the idea of a linear process New to the Fifth Edition developmental impacts of the rise of the BRICS structural adjustment and new inequalities come to the global North de growth philosophies the re centering of agriculture in light of the food energy and climate crises land grabbing and biofuels green technologies and climate proofing transition towns and re localization new democratic movements **The**

**Great Transition: Shifting from Fossil Fuels to Solar and Wind Energy** Lester R. Brown, 2015-04-20 The great energy transition from fossil fuels to renewable sources of energy is under way As oil insecurity deepens the extraction risks of fossil fuels rise and concerns about climate instability cast a shadow over the future of coal a new world energy economy is emerging The old economy fueled by oil natural gas and coal is being replaced with one powered by wind solar and geothermal energy The Great Transition details the accelerating pace of this global energy revolution As many countries become less enamored with coal and nuclear power they are embracing an array of clean renewable energies Whereas solar

energy projects were once small scale largely designed for residential use energy investors are now building utility scale solar projects Strides are being made some of the huge wind farm complexes under construction in China will each produce as much electricity as several nuclear power plants and an electrified transport system supplemented by the use of bicycles could reshape the way we think about mobility

**Public Health in the 21st Century** Madelon L. Finkel, 2010-12-13 This extensive cutting edge compilation of essays on key public health topics is a must read for professionals students and researchers with topics focusing on the effects of climate change on health global issues including treatment and prevention of diseases health care policy issues health care needs of special populations gender based violence and current issues in ethics and human rights The three volumes of Public Health in the 21st Century are comprised of timely essays on a wide variety of public health issues that affect the world today and those that may do so tomorrow The essays gathered here are the work of a team of top researchers that includes behavioral scientists medical officials environmental scientists administrators educators and health education experts Volume one covers history developments and current issues in public health Volume two is about disease treatment and prevention and volume three discusses health disparities and policies that affect public health The last volume also looks at cutting edge research to show what the future may hold discussing how we will deal with for example emerging threats to public health stemming from global warming the mismanagement of natural resources multidrug resistant diseases and the explosion of chronic disease Each chapter presents an up to date scholarly review of a specific issue and discusses the challenges that nations communities and individuals must address to create a healthier world

*Climate Change, Culture, and Economics* Donald C. Wood, 2015-09-22 It is becoming increasingly difficult to deny that human activity is a factor in global climate change This special volume of REA facilitates readers to better understand the ways in which people around the world have adapted or failed to adapt culturally to changing economic conditions caused by climate change

Vanishing Borders Hilary French, 2016-06-11 The world is shrinking faster than ever Goods money microbes pollution people and ideas are crossing boundaries ever more frequently The implications for our future and for the health of the planet are profound Vanishing Borders outlines the ecological challenges posed and then goes on to define the necessary strategies for tackling them Presently national governments are singularly ill equipped for tackling transitional environmental problems from ozone depletion to soaring trade in commodities such as timber problems which are climbing ever higher on the international political agenda Industrial and developing countries are on a collision course over climate change and water shortages are creating tensions in several parts of the world The author argues that only a worldwide commitment to strengthening treaties and institutions needed to integrate ecological considerations into the rules of global commerce holds out hope Over 200 international environmental treaties exist but most need more stringent conditions and enforcement and continuing support from NGO and business communities Significantly the digital revolution integral in itself to processes to globalization offers channels through which powerful coalitions can effect change

The book provides a compelling and accessible analysis and a clear plan of action in pursuit of environmental stability Originally published in 2000      **Urban Research Monitor** ,1998      *The Tourism and Leisure Industry* Klaus Weiermair,Christine Mathies,2004 An essential read for all leisure and tourism experts this educational book analyzes and explains demographics global supply and demand globalization intercultural behavior and mobility to help you forecast future consumer needs      The Tourism and Leisure Industry Kaye Sung Chon,2012-10-12 Find out how the ways we live and work are changing the ways in which we play As populations grow and urbanization increases social class income and ethnicity are influencing where and when people travel The Tourism and Leisure Industry Shaping the Future gives you the knowledge and skills you need to keep your business on top of this competitive field An essential read for all leisure and tourism experts this book analyzes and explains demographics global supply and demand globalization intercultural behavior and mobility to help you forecast future consumer needs This insightful book also predicts new markets and products to help you tailor your business to the tourism and leisure trends of the next generation The Tourism and Leisure Industry Shaping the Future evaluates traditional leisure time activities such as theme parks and sporting events as well as the fastest growing activities such as leisure based wellness resorts Find out what the populations of different countries are expecting from their free time in terms of temporal aspects benefits and location Get up to date advice on information technology and see how it will be changing the way you do business The Tourism and Leisure Industry Shaping the Future focuses on a variety of factors impacting tourism today including changes in social values intercultural technology races changed economic market conditions changing lifestyle trends population growth networked economies the growing market for senior travelers The Tourism and Leisure Industry Shaping the Future is your contemporary guide to the next steps in the evolution of tourism and leisure Filled with tables and figures to help you organize and understand the information it presents this book is easy to read yet suitable for any expert in the leisure field With case studies research reports and extensive bibliographies it is a vital resource for destination managers consultants and teachers alike      **Plan B 4.0: Mobilizing to Save Civilization (Substantially Revised)** Lester R. Brown,2009-10-05 Brown s ability to make a complicated subject accessible to the general reader is remarkable Katherine Salant Washington Post As fossil fuel prices rise oil insecurity deepens and concerns about climate change cast a shadow over the future of coal a new energy economy is emerging Wind solar and geothermal energy are replacing oil coal and natural gas at a pace and on a scale we could not have imagined even a year ago For the first time since the Industrial Revolution we have begun investing in energy sources that can last forever Plan B 4 0 explores both the nature of this transition to a new energy economy and how it will affect our daily lives      Global Environmental Health Institute of Medicine,Board on Population Health and Public Health Practice,Roundtable on Environmental Health Sciences, Research, and Medicine,2009-07-08 The issues surrounding water services are some of the most critical challenges facing not only the United States but also the global community today The Roundtable on Environmental Health Sciences

Research and Medicine of the Institute of Medicine convened a workshop in October 2007 summarized in this volume to address objectives related to Sustainable Water Sanitation and Hygiene Services One of the objectives of the workshop was to think about the interdependence of environmental health and human health as connected through water Organizations cannot discuss water without considering the interrelationship of sanitation and hygiene It is the convergence of these strategies that promotes healthy outcomes for both individuals and the environment A second objective of the workshop was to consider how planning management and interdisciplinary approaches including technology social behavioral issues gender health environment economic and political aspects can be integrated to arrive at sustainable solutions Many organizations and agencies are trying to forge a path toward sustainable practices in water but the various sectors utilizing and governing water services are not interconnected More integration and a greater understanding of holistic approaches are needed
