Rekindling The Movement Labors Quest For Relevance In The Twenty :

Rekindling the Movement Lowell Turner, Harry C. Katz, Richard W. Hurd, 2018-05-31 From gloomy times in the 1980s the American labor movement has returned to apparent prominence through the efforts of a new generation of energetic and progressive leaders A distinguished group of authors examines this resurgence and the potential of American unions with sympathetic yet critical eyes Experts from a wide variety of disciplines industrial relations political science economics and sociology identify the central developments analyze the strengths and weaknesses of the new initiatives and assess the progress made and the prospects for the future Though all agree on the importance of unions their opinions of the success of current renewal efforts diverge greatly The interdisciplinary and comparative approach of *Rekindling the Movement* is both challenging and enlightening Rather than merely trumpeting pet opinions contributors provide hard evidence and causal analysis grounded in realistic perspectives to back up suggestions for the improvement of the new labor movement Their straightforward observations about what is and is not possible what does and does not work will be of great practical value for policymakers and union leaders

Making Feminist Politics Suzanne Franzway, Mary Margaret Fonow, 2000-02-01 In this timely and detailed examination of the intersections of feminism labor politics and global studies Suzanne Franzway and Mary Margaret Fonow reveal the ways in which women across the world are transforming labor unions in the contemporary era Situating specific case studies within broad feminist topics Franzway and Fonow concentrate on union feminists mobilizing at multiple sites issues of wages and equity child care campaigns work life balance and queer organizing demonstrating how unions around the world are broadening their focuses from contractual details to empowerment and family and feminist issues By connecting the diversity of women s experiences around the world both inside and outside the home and highlighting the innovative ways women workers attain their common goals *Making Feminist Politics* lays the groundwork for recognition of the total individual in the future of feminist politics within global union movements

Labor, Business, and Change in Germany and the United States Kirsten S. Wever, 2001 Comprises five papers which compare industrial relations in Germany and the USA Focuses on the intersection between the strategies and practices of employers unions and employer associations and the cultural and institutional frameworks within which they operate Includes a general comparison of employment relations in the two countries

Social Movement Studies in Europe Olivier Fillieule, Guya Accornero, 2016-03-01 Bringing together over forty established and emerging scholars this landmark volume is the first to comprehensively examine the evolution and current practice of social movement studies in a specifically European context While its first half offers comparative approaches to an array of significant issues and movements its second half assembles focused national studies that include most major European states Throughout these contributions are guided by a shared set of historical and social scientific questions with a particular emphasis on political sociology thus offering a bold and uncommonly unified survey that will be essential for scholars and students of European social movements

Out of Sight

Erik Loomis, 2016-03-01 A provocative analysis of labor globalization and environmental harm by the award winning historian and author of *A History of America in Ten Strikes* In the current state of our globalized economy corporations have no incentive to protect their workers or the environment Jobs moves seamlessly across national borders while the laws that protect us from rapacious behavior remain bound by them As a result labor exploitation and toxic pollution remain standard practice In *Out of Sight* Erik Loomis a historian of both the labor and environmental movements follows a narrative that runs from the 1911 Triangle Shirtwaist Factory fire in New York City to the collapse of the Rana Plaza factory outside of Dhaka Bangladesh in 2013 He demonstrates that our modern systems of industrial production are just as dirty and abusive as they were during the Industrial Revolution and the Gilded Age The only difference is that the ugly side of manufacturing is now hidden in faraway places where workers are most vulnerable In this Choice Outstanding Academic Title Loomis shows that the great environmental victories of twentieth century America the Clean Water Act the Clean Air Act the EPA were actually union victories Using this history as a call to action *Out of Sight* proposes a path toward regulations that follow corporations wherever they do business putting the power back in workers hands The story told here is tragic and important Bill McKibben Erik Loomis prescribes how activists can take back our country for workers and those who care about the health of our planet Senator Sherrod Brown D OH *Suburban Sweatshops* Jennifer GORDON, 2009-06-30 In 1992 Gordon founded the Workplace Project to help immigrant workers in the underground suburban economy of Long Island New York In a story of gritty determination and surprising hope she weaves together Latino immigrant life and legal activism to tell the unexpected tale of how the most vulnerable workers in society came together to demand fair wages safe working conditions and respect from employers **On the Picket Line** Mary Triece, 2024-04-22 Bonnie Ritter Book Award National Communication Association s Feminist and Women Studies Division 2008 *On the Picket Line* uncovers the voices of working class women particularly those active in the Communist Party U S A in order to examine how these individuals confronted the tensions between their roles as workers wives mothers and consumers Combining critical analysis Marxist and feminist theory and labor history Mary E Triece analyzes the protest tactics employed by working class women to challenge dominant ideologies surrounding domesticity She details the rhetorical strategies used by women to argue for their rights as workers in the paid labor force and as caregivers in the home Their overtly coercive tactics included numerous sit ins strikes and boycotts that won tangible gains for working poor and unemployed women The book also gives voice to influential figures in the 1930s labor movement many of whom were members of the Communist Party U S A such as Ella Reeve Bloor Margaret Cowl Anna Damon Ann Burlak and Grace Hutchins Triece ultimately argues that these confrontational protest tactics of the 1930s remain relevant in today s fights for more humane workplaces and better living conditions **Sick and Tired** Stephanie Premji, 2019-01-09T00:00:00Z Bringing together a multidisciplinary group of experts from the fields of labour studies public health ergonomics epidemiology sociology and law *Sick and Tired* examines the inequalities in workplace

health and safety Using an anti oppressive framework chapters interrogate a wide range of issues including links between precarious employment and mental health the inverse relationship between power and occupational health through the experiences of women immigrants and older workers and the need for creative strategies that promote health and safety in ways that support empowerment and equity

Invisible Hands, Invisible Objectives Stephen F. Befort, John W. Budd, 2009-06-01 The global financial crisis and recession have placed great strains on the free market ideology that has emphasized economic objectives and unregulated markets The balance of economic and noneconomic goals is under the microscope in every sector of the economy It is time to re think the objectives of the employment relationship and the underlying assumptions of how that relationship operates Invisible Hands Invisible Objectives develops a fresh holistic framework to fundamentally reexamine U S workplace regulation A new scorecard for workplace law and public policy that embraces equity and voice for employees and economic efficiency will reveals significant deficiencies in our current practices To create one the authors a legal scholar and an economics and industrial relations scholar blend their expertise to propose a comprehensive set of reforms tackling such issues as regulatory enforcement portable employee benefits training programs living wages workplace safety and health work family balance security and social safety nets nondiscrimination good cause dismissal balanced income distributions free speech protections for employees individual and collective workplace decision making and labor unions Invisible Hands Invisible Objectives is not just another book that sketches a reform agenda The book provides the much needed rubric for how we think about employment policy specifically but also economic policy more generally It is a must read in these most critical times

Migration and Agriculture Alessandra Corrado,Carlos de Castro,Domenico Perrotta,2016-07-28 In recent years Mediterranean agriculture has experienced important transformations which have led to new forms of labour and production and in particular to a surge in the recruitment of migrant labour The Mediterranean Basin represents a very interesting arena that is able to illustrate labour conditions and mobility the competition among different farming models and the consequences in terms of the proletarianization process food crisis and diet changes Migration and Agriculture brings together international contributors from across several disciplines to describe and analyse labour conditions and international migrations in relation to agri food restructuring processes This unique collection of articles connects migration issues with the proletarianization process and agrarian transitions that have affected Southern European as well as some Middle Eastern and Northern African countries in different ways The chapters present case studies from a range of territories in the Mediterranean Basin offering empirical data and theoretical analysis in order to grasp the complexity of the processes that are occurring This book offers a uniquely comprehensive overview of migrations territories and agro food production in this key region and will be an indispensable resource to scholars in migration studies rural sociology social geography and the political economy of agriculture

Another Production Is Possible Boaventura de Sousa Santos,2020-05-05 This is the second volume after Democratizing Democracy of the collection Reinventing Social Emancipation Towards New Manifestoes Here the author

examines alternative models to capitalist development through case studies of collective land management cooperatives of garbage collectors and women's agricultural cooperatives. He also analyzes the changing capital labor conflict of the past two decades and the way labor solidarity is reconstituting itself under new forms from Brazil to Mozambique and South Africa.

Globalization in the 21st Century B. Berberoglu, 2010-04-12 This book examines the development and transformation of global capitalism in the late 20th and early 21st century. It analyzes the dynamics and contradictions of the global political economy through a comparative historical approach based on class analysis. After providing a critical overview of neoliberal capitalist globalization over the past three decades, the book examines the emergence of new forces on the global scene and discusses the prospects of change in the global economy in a multi-polar direction in the decades ahead. The book concludes by focusing on the mass movements that are playing a central role in bringing about the transformation of global capitalism.

Building Power, Breaking Power Jesse Chanin, 2024-04-05 From 1965 to 2005 the United Teachers of New Orleans (UTNO) defied the South's conservative anti-union efforts to become the largest local in Louisiana. Jesse Chanin argues that UTNO accomplished and maintained its strength through strong community support, addressing a Black middle-class political agenda, internal democracy, and drawing on the legacy and tactics of the civil rights movement by combining struggles for racial and economic justice all under Black leadership and with a majority women and Black membership. However, the devastating effects of Hurricane Katrina provided the state government and local charter school advocates with the opportunity to remake the school system and dismantle the union. Authorities fired 7,500 educators, marking the largest dismissal of Black teaching staff since *Brown v. Board of Education*. Chanin highlights the significant staying power and political, social, and community impact of UTNO, as well as the damaging effects of the charter school movement on educators.

Staircases or Treadmills? Chris Benner, Laura Leete, Manuel Pastor, 2007-04-13 Globalization, technological change, and deregulation have made the American marketplace increasingly competitive in recent decades, but for many workers, this new economy has entailed heightened job insecurity, lower wages, and scarcer benefits. As the job market has grown more volatile, a variety of labor market intermediaries—organizations that help job seekers find employment—have sprung up, from private temporary agencies to government One Stop Career Centers. In *Staircases or Treadmills*, Chris Benner, Laura Leete, and Manuel Pastor investigate what approaches are most effective in helping workers to secure jobs with decent wages and benefits, and they provide specific policy recommendations for how job matching organizations can better serve disadvantaged workers. *Staircases or Treadmills* is the first comprehensive study documenting the prevalence of all types of labor market intermediaries and investigating how these intermediaries affect workers' employment opportunities. Benner, Leete, and Pastor draw on years of research in two distinct regional labor markets: old economy Milwaukee and new economy Silicon Valley, including a first-of-its-kind random survey of the prevalence and impacts of intermediaries and a wide range of interviews with intermediary agencies, staff, and clients. One of the main obstacles that disadvantaged workers face is that

social networks of families and friends are less effective in connecting job seekers to stable quality employment. Intermediaries often serve as a substitute method for finding a job. Which substitute is chosen, however, matters. The authors find that the most effective organizations, including many unions, community colleges, and local nonprofits, actively foster contacts between workers and employers, tend to make long-term investments in training for career development, and seek to transform as well as satisfy market demands. But without effective social networks to help workers locate the best intermediaries, most rely on private temporary agencies and other organizations that offer fewer services. Statistical analysis shows they often channel their participants into jobs with low wages and few benefits. Staircases or Treadmills suggests that to become more effective intermediary organizations of all types need to focus more on training workers, teaching networking skills, and fostering contact between workers and employers in the same industries. A generation ago, rising living standards were broadly distributed and coupled with relatively secure employment. Today, many Americans fear that heightened job insecurity is overshadowing the benefits of dynamic economic growth. Staircases or Treadmills is a stimulating guide to how private and public job matching institutions can empower disadvantaged workers to share in economic progress. *Transnational Trade Unionism* Peter Fairbrother, Christian Lévesque, Marc-Antoine

Hennebert, 2013-08-22 Transnational trade union action has expanded significantly over the last few decades and has taken a variety of shapes and trajectories. This book is concerned with understanding the spatial extension of trade union action and, in particular, the development of new forms of collective mobilization, network building, and forms of regulation that bridge local and transnational issues. Through the work of leading international specialists, this collection of essays examines the process and dynamic of transnational trade union action and provides analytical and conceptual tools to understand these developments. The research presented here emphasizes that the direction of transnational solidarity remains contested, subject to experimentation and negotiation, and includes studies of often overlooked developments in transition and developing countries, with original analyses from the European Union and NAFTA areas. Providing a fresh examination of transnational solidarity, this volume offers neither a romantic or overly optimistic narrative of a borderless unionism, nor does it fall into a fatalistic or pessimistic account of international union solidarity. Through original research conducted at different levels, this book disentangles the processes and dynamics of institution building and challenges the conventional national-based forms of unionism that prevailed in the latter half of the twentieth century. **Getting the Goods** Edna Bonacich, Jake

B. Wilson, 2011-03-15 In *Getting the Goods*, Edna Bonacich and Jake B. Wilson focus on the Southern California ports of Los Angeles and Long Beach, which together receive 40 percent of the nearly 2 trillion worth of goods imported annually to the United States, to examine the impact of the logistics revolution on workers in transportation and distribution. Built around the invention of shipping containers and communications technology, the logistics revolution has enabled giant retailers like Wal-Mart and Target to sell cheap consumer products made using low-wage labor in developing countries. The goods are shipped

through an efficient low cost intermodal freight system in which containers are moved from factories in Asia to distribution centers across the United States without ever being opened Bonacich and Wilson follow the flow of imports from Asian factories exploring the roles of importers container shipping companies the ports railroad and trucking companies and warehouses At each stage Getting the Goods raises important questions about how the logistics revolution affects logistics workers Drawing extensively on interviews with workers and managers at all levels of the supply chain on industry reports and on economic data Bonacich and Wilson find that in general conditions have deteriorated for workers But they also discover that changes in the system of production and distribution provide new strategic opportunities for labor to gain power A much needed corrective to both uncritical celebrations of containerization and the global economy and pessimistic predictions about the future of the U S labor movement Getting the Goods will become required reading for scholars and students in sociology political economy and labor studies
