Liese and Aaron T Beck provide critical tools for understanding and treating the full range of addictive behaviors. They explain how to systematically develop case conceptualizations and support clients in achieving their recovery goals. Vivid case examples are used to illustrate CBT techniques, structure, psychoeducation, motivational interviewing, group treatment, relapse prevention, and other effective therapeutic components. Several reproducible forms can be downloaded and printed in a convenient 8 1/2 x 11 size.

Addiction Medicine Bankole A. Johnson, 2010-10-10. The spectrum of addiction disorders presents practitioners with numerous challenges, among them the widening gap between a growing evidence base and the translation of this knowledge into treatment outcomes. *Addiction Medicine* addresses this disconnect clearly, explaining the role of brain function in drug taking and other habit-forming behaviors and applying this biobehavioral framework to the delivery of evidence-based treatment. Its state-of-the-art coverage provides clinically relevant details on not only traditional sources of addiction such as cocaine, opiates, and alcohol, but also more recently recognized substances of abuse, e.g., steroids, inhalants, as well as behavioral addictions, e.g., binge eating, compulsive gambling, hoarding. Current behavioral and medical therapies are discussed in depth, and the book's close attention to social context gives readers an added lens for personalizing treatment. An international panel of expert contributors offers the most up-to-date information on diagnosis and classification, neurobiological and molecular theories of addiction, behavioral concepts of addiction, clinical aspects of addiction to a wide range of substances including opiates, stimulants, sedatives, hallucinogens, alcohol, nicotine, and caffeine. Science-based treatment options, pharmacotherapy, pharmacogenetics, potential vaccines, brief and compliance-enhancing interventions, cognitive behavioral treatment, behavioral management, and other psychosocial interventions. Behavioral addictions including compulsive eating, Internet messaging, and hypersexuality and their treatment. Addiction in specific populations including adolescents, the elderly, pregnant women, and health care professionals. Legal disability and rehabilitation issues. At once comprehensive and integrative, *Addiction Medicine* is an essential text and a practice-expanding tool for psychiatrists, health psychologists, pharmacologists, social workers, drug counselors, trainees, and general physicians, family practitioners.

Treating Addictive Behaviors William R. Miller, Nick Heather, 2013-06-29. About a decade ago, psychologists began exploring the commonalities among alcohol and drug abuse, smoking, and obesity. The term substance abuse evolved into the current concept of addictive behaviors, which recognizes similarities with other behaviors that do not involve consummatory responses, e.g., pathological gambling, compulsions, sexual deviations. Professional societies and journals now have been founded in both Britain and the United States with the purpose of focusing on research and treatment in the area of addictive behaviors. As the field has evolved, new models have emerged to address the questions and puzzles that face professionals. This volume examines some of these current issues and, in particular, explores common processes of change that seem to cut across the addictive behaviors. The chapters are based on papers presented at the Third International Conference on Treatment of Addictive Behaviors, which was held at North Berwick, Scotland, in August of 1984. The conference

was organized around an integrative model of stages and processes of change that has been useful in organizing new knowledge about how to intervene with addictive behaviors. This model is set forth by its authors Jim Prochaska and Carlo DiClemente in Chapter 1. In Chapter 2, Fred Kanfer expounds his own model of self-regulation which overlaps nicely with the Prochaska DiClemente framework and provides a behavioral theoretical context.
