**Implications of Chronic Illness and Disability in Eastern Europe and the Former Soviet Union** Cem Mete, 2008-01-01 A significant portion of the population in the Eastern Europe and Central Asia region are either in poor health or disabled. This research shows that the linkages between disability and economic and social outcomes of interest tend to be stronger in transition countries when compared with industrialized countries. Reasons for this trend include the prevalence of a large informal sector in many developing countries, relatively weak targeting performance of social assistance programs especially in poor transition countries, and unavailability of broad based insurance mechanisms to protect individuals against loss of income due to unexpected illness. Chronic Illness and Disability Esther Chang, Amanda Johnson, 2014 This text provides evidence based principles for practice for chronic illness and disability. It provides a solid theoretical and practical foundation for students in their 2nd and 3rd years. The book includes a holistic framework for major and common chronic illness and disability.

*Relating Difficulty* D. Charles Kirkpatrick, Steven Duck, Megan K. Foley, 2013-09-13 *Relating Difficulty* offers insight into the nature of difficulty in relationships across a broad range of human experience. Whether dealing with in laws or ex spouses, long distance relationships or power and status in the workplace, difficulty is an all too common feature of daily life. *Relating Difficulty* brings the academic understanding of relational processes to the everyday problems people face at home and at work. These essays represent a groundbreaking collection of the multidisciplinary conceptual and empirical work that currently exists on the topic. Along with issues such as chronic illness and money problems, contributors investigate contexts of relational difficulty ranging from everyday gossip, the workplace and shyness to more dangerous sexual hookups and partner abuse. Drawing on evidence presented in the volume, editors D. Charles Kirkpatrick, Steve Duck and Megan K. Foley explain how relational problems do not emerge solely from individuals or even from the relationship itself. Instead, they arise from

triangles of connection and negotiation between relational partners contexts and outsiders The volume challenges the simple notion that relating difficulty is just about problems with difficult people and offers some genuinely novel insights into a familiar everyday experience This exceptional volume is essential reading for practitioners researchers and students of relationships across a wide range of disciplines as well as anyone wanting greater understanding of relational functioning in everyday life and at work
