Relationships Of The Protoceratid Artiodactyls And Description Of A New Genus:

Relationships of the Protoceratid Artiodactyls Ruben Arthur Stirton, 1967 *The Evolution of Artiodactyls* Donald R. Prothero, Scott E. Foss, 2007-12-17 Artiodactyls are diverse and successful hoofed mammals represented by nearly two hundred living species of pigs peccaries hippos camels deer sheep cattle giraffes and other even toed ungulates In the recent years a tremendous amount of research has been conducted on this important order The Evolution of Artiodactyls synthesizes this research into a single volume The authors explore a variety of topics including molecular phylogeny of terrestrial artiodactyls phylogenetic relationships of cetaceans to terrestrial artiodactyls and the earliest artiodactyls Diacodexidae Dichobunidae Homacodontidae Leptochoeridae and Raoellidae **Evolution of Tertiary Mammals of North America: Volume 1, Terrestrial Carnivores, Ungulates, and Ungulate Like Mammals** Christine M. Janis, Kathleen M. Scott, Louis L. Jacobs, 1998-05-28 This book is designed as a source and reference for people interested in the history and fossil record of North American tertiary mammals Each chapter covers a different family or order and includes information on anatomical features systematics the distribution of the genera and species at different fossil localities and a discussion of their paleobiology Many of these groups have never been covered in this fashion before **The Rise of Placental Mammals** Kenneth D. Rose, 2005-03-29 Publisher description *Encyclopedia of Paleontology* Ronald Singer, 2019-06-04 The Encyclopedia of Paleontology is designed to address the shortage of general reference works on both vertebrate and invertebrate paleontology and to serve the needs of students and lay persons interested in the field As the encyclopedia aims to provide basic information the majority of the 350 entries are devoted to explanations of paleontological concepts and techniques examinations of the evolutionary development of particular organisms and biological features profiles of major discoveries and biographies of leading scientists Each entry includes an essay and a further reading list An international team of 200 leading experts in the field has prepared the illustrations and the essays which range from concise descriptions to comprehensive discussions **Eocene Artiodactyla of Southern California** David J. Golz, 1976 **Journal of Vertebrate Paleontology**, 2010 **The Beginning of the Age of Mammals** Kenneth D. Rose, 2006-09-26 Publisher description **Bulletin of the American Museum of Natural History** Joel Asaph Allen, 2003 Comprises articles on geology paleontology mammalogy ornithology entomology and anthropology **The Phylogeny of Hornless Ruminants and a Description of the Cranium of Archaeomeryx** Sawney David Webb, Beryl E. Taylor, 1980 We analyze the interrelationships of the several groups of hornless ruminants and show which of them lie nearest the higher ruminants The phylogenetic progression within Ruminantia proceeds from Hypertragulidae through Tragulidae to Leptomerycidae to Gelocidae to Moschidae and thence to the horned ruminants Archaeomeryx of the late Eocene is recognized as a primitive member of the Leptomerycidae the living Tragulidae actually represent a more primitive ruminant stock We introduce the name Moschina for the Gelocidae and the Moschidae and the term Eupecora for the higher ruminant groups bearing horns

antlers and ossicones We also propose Neoselenodontia above the subordinal level to include both the Ruminantia and their sister group the Tylopoda The stratigraphic records of the five lower ruminant families appear relatively complete with the exception of the Tragulidae which are poorly known prior to the Miocene The exclusively North American distribution of the family Hypertragulidae and many of the Tylopoda suggests that the Ruminantia may have originated in North America The Tragulidae exclusively Old World and predominantly subtropical presumably originated by colonization and isolation in the Old World Thereafter ruminant evolution centered in the Old World but representatives of every major group reached North America P 121 **University of Kansas Paleontological Contributions** ,1978 *Annals of the Carnegie Museum* Carnegie Museum of Natural History,2006 **Catalog of the United States Geological Survey Library** U.S. Geological Survey Library,1972 **Fenestrate, Pinnate, and Ctenostome Bryozoans and Associated Barnacle Borings in the Wreford Megacyclothem (Lower Permian) of Kansas, Oklahoma, and Nebraska** A.
