Relatively Speaking Language Thought And Kinship Among The Mopan Maya:

Relatively Speaking Eve Danziger, 2001 Based upon 14 months of ethnographic fieldwork among the Mopan Maya in Belize Eve Danziger examines the semantic complexity of particular kinship terms used among Mopan women and children and shows that a culture specific analysis of their terms is superior to other non ethnographically based methods In doing so she contributes not only to theoretical semantics and the ethnography of that area but to the cross cultural study of child development and language acquisition

Relatively Speaking Eve Danziger, 2001-04-12 Based upon 14 months of ethnographic fieldwork among the Mopan Maya in Belize Eve Danziger examines the semantic complexity of particular kinship terms used among Mopan women and children and shows that a culture specific analysis of their terms is superior to other non ethnographically based methods In doing so she contributes not only to theoretical semantics and the ethnography of that area but to the cross cultural study of child development and language acquisition

A Vocabulary of Kinship Terms in New West Iranian Dialects Alireza Korangy, Behrooz Mahmoodi-Bakhtiari, 2024-10-17 This book is the first of its kind in providing a lexicon of kinship terms prevalent in the Western dialects of Iran with a parallel glossary in English It engages the dialects and their terminology in the English language to bring to purview how language imitates life particularly in rural settings Subsequently it gives a glimpse into the irrefutable relation that exists between culture and word usage In doing so it serves as a cultural manifesto as it pertains to Persian language poetics and applied linguistics and is relevant to linguists cultural scholars Anthropologists and students in Persian language literature and culture and certainly all Iranian languages

The Genius of Kinship German Valentinovich Dziel, 2007 Dziel has doctorates in both history and anthropology and is currently both advisor to the Great Russian Encyclopedia and senior anthropologist at Crispin Porter Bogusky advertising agency His extremely dense work is actually three books in one The first is a history of kinship studies from the early 19th century to the present The second is a comparative study of kinship terminology among non Indo European languages for which he has also prepared a data base published on the internet The third section highly controversial as he admits uses anthropology mitochondrial studies and linguistics to suggest that the out of Africa model of human origins may be in error and that the first humans actually came from the Americas and spread from there to the rest of the world

Semantics - Typology, Diachrony and Processing Klaus Heusinger, Claudia Maienborn, Paul Portner, 2019-02-19 Now available in paperback for the first time since its original publication the material in this book provides a broad accessible guide to semantic typology crosslinguistic semantics and diachronic semantics Coming from a world leading team of authors the book also deals with the concept of meaning in psycholinguistics and neurolinguistics and the understanding of semantics in computer science It is packed with highly cited expert guidance on the key topics in the field making it a bookshelf essential for linguists cognitive scientists philosophers and computer scientists working on natural language

The Psychology of Cultural Experience Carmella C. Moore, Holly F. Mathews, 2001-09-06 The essays in this volume first published in 2001

focus upon the relationship of individual experience to culture and chart a research agenda for psychological anthropology in the twenty first century Drawing upon fieldwork in diverse cultural settings the authors use a range of contemporary perspectives in the field including person centred ethnography activity theory attachment theory and cultural schema theory to describe the ways in which people think feel remember and solve problems Fascinating insights emerge from these fine grained accounts of personal experience The research demonstrates that it is possible to identify cross cultural universals in psychological development and mental states and that individual psychology is not determined solely by unique cultural patterns

Ecologies of Participation Zayin Cabot,2018-04-30 In this daring debut Zayin Cabot challenges the wise homebodies of academia A profoundly interdisciplinary approach to comparative scholarship Ecologies of Participation offers a methodology whereby we can face our shared planetary predicament It is grounded in process philosophy and asserts the importance of a new ontology of agency It traces the importance of L vy Bruhl and L vi Strauss s early work while offering new insight into the ontological turn in anthropology This book sets out to destabilize modern reductionist trends toward scientific materialism without falling into postmodern cultural constructivism It does not assume the givenness of nature or culture By advancing a multi ontology approach this work offers robust interventions into decolonial and critical studies Cabot takes contemporary scholarship in new and exciting directions offering an unstable ground from which to examine our shared worlds both human and other Throughout the last chapters of the book these threads are illuminated through a detailed ethics of comparison and participation

The Mayan Languages Judith Aissen,Nora C. England,Roberto Zavala Maldonado,2017-05-12 The Mayan Languages presents a comprehensive survey of the language family associated with the Classic Mayan civilization AD 200 900 a family whose individual languages are still spoken today by at least six million indigenous Maya in Mexico Guatemala Belize and Honduras This unique resource is an ideal reference for advanced undergraduate and postgraduate students of Mayan languages and linguistics Written by a team of experts in the field The Mayan Languages presents in depth accounts of the linguistic features that characterize the thirty one languages of the family their historical evolution and the social context in which they are spoken The Mayan Languages provides detailed grammatical sketches of approximately a third of the Mayan languages representing most of the branches of the family includes a section on the historical development of the family as well as an entirely new sketch of the grammar of Classic Maya as represented in the hieroglyphic script provides detailed state of the art discussions of the principal advances in grammatical analysis of Mayan languages includes ample discussion of the use of the languages in social conversational and poetic contexts Consisting of topical chapters on the history sociolinguistics phonology morphology syntax semantics discourse structure and acquisition of the Mayan languages this book will be a resource for researchers and other readers with an interest in historical linguistics linguistic anthropology language acquisition and linguistic typology

Society of Others Rupert Stasch,2009 In this timely commentary on the ideas of difference strangeness and Western contact Stasch

weaves ethnographic materials together with theoretical framing in an exceptionally clear and compelling way A highly original important and in fact astonishing piece of scholarship Bambi Schieffelin author of *The Give and Take of Everyday Life* In this remarkable ethnography Rupert Stasch takes us to the lowlands of West Papua and into the lives of people who have built a social world out of their relationships with strange and potentially dangerous others The Korowai are classic inhabitants of the savage slot still dogged by their designation as Stone Age primitives Instead of flipping the script and arguing that the Korowai are just like everyone else Stasch draws far reaching lessons from the particularities of Korowai life Stasch writes with grace and clarity on the ambivalent ways in which the Korowai confront evade and embrace an otherness that resides not just in words food places and human bodies but also in the pasts and futures brought to mind by these material signs Analyzing Korowai sign use as a concrete historical process he charts the passage between intimacy and alterity that Korowai undergo in their encounters not only with spirits and Indonesian soldiers but also with children husbands and wives Some of what Stasch describes may seem strange and even disturbing But in pondering Stasch's findings one gradually comes to see the making of persons and relationships in an entirely new light Gone is the old debate between biological determination and cultural freedom in its place is an approach that affirms the multiple histories that converge in and flow from a life Erudite empathetic and unremittingly smart *Society of Others* recasts the very meaning of kinship and makes a case for the power of what anthropologists do Danilyn Rutherford author of *Raiding the Land of the Foreigners The Limits of the Nation on an Indonesian Frontier*

Roots of Human Sociality Stephen C. Levinson, Nicholas J. Enfield, 2020-08-21 This book marks an exciting convergence towards the idea that human culture and cognition are rooted in the character of human social interaction which is unique in the animal kingdom *Roots of Human Sociality* attempts for the first time to explore the underlying properties of social interaction viewed from across many disciplines and examines their origins in infant development and in human evolution Are interaction patterns in adulthood affected by cultural differences in childhood upbringing Apes unlike human infants of only 12 months fail to understand pointing and the intention behind it Nevertheless apes can imitate and analyze complex behavior how do they do it Deaf children brought up by speaking parents invent their own languages How might adults deprived of a fully organized language communicate This book makes the case that the study of these sorts of phenomenon holds the key to understanding the foundations of human social life The conclusion our unique brand of social interaction is at the root of what makes us human

Words and Processes in Mambila Kinship David Zeitlyn, 2005-01-01 *Words and Processes in Mambila Kinship* presents a set of studies of the way that Mambila speakers in Cameroon talk about themselves and their kin Author David Zeitlyn employs conversational analytic methods to further the study of kinship terminologies This book takes an important step toward a new synthesis between the practice of ethnography and the study of language while presenting African natural language data still rare in mainstream linguistics in an accessible format

American Indian Languages Lyle Campbell, 2000-09-21 Native American

languages are spoken from Siberia to Greenland and from the Arctic to Tierra del Fuego they include the southernmost language of the world Yaghan and some of the northernmost Eskimoan Campbell's project is to take stock of what is currently known about the history of Native American languages and in the process examine the state of American Indian historical linguistics and the success and failure of its various methodologies There is remarkably little consensus in the field largely due to the 1987 publication of *Language in the Americas* by Joseph Greenberg He claimed to trace a historical relation between all American Indian languages of North and South America implying that most of the Western Hemisphere was settled by a single wave of immigration from Asia This has caused intense controversy and Campbell as a leading scholar in the field intends this volume to be in part a response to Greenberg Finally Campbell demonstrates that the historical study of Native American languages has always relied on up to date methodology and theoretical assumptions and did not as is often believed lag behind the European historical linguistic tradition

Governing Maya Communities and Lands in Belize Laurie Kroshus Medina, 2024-05-17 Confronting a debt crisis the Belizean government has strategized to maximize revenues from lands designated as state property privatizing lands for cash crop production and granting concessions for timber and oil extraction Meanwhile conservation NGOs have lobbied to establish protected areas on these lands to address a global biodiversity crisis They promoted ecotourism as a market based mechanism to fund both conservation and debt repayment ecotourism also became a mechanism for governing lands and people even state actors themselves through the market Mopan and Q'eqchi' Maya communities dispossessed of lands and livelihoods through these efforts pursued claims for Indigenous rights to their traditional lands through Inter American and Belizean judicial systems This book examines the interplay of conflicting forms of governance that emerged as these strategies intersected state performances of sovereignty over lands and people neoliberal rule through the market and Indigenous rights claiming which challenged both market logics and practices of sovereignty

Non-Canonical Gender Systems Sebastian Fedden, Jenny Audring, Greville G. Corbett, 2018-03-09 This book explores the boundaries of the category of gender and their theoretical significance within the framework of Canonical Typology Grammatical gender is a famously puzzling category although it has been widely explored from a typological perspective studies are constantly identifying exciting and unexpected patterns in gender systems many of which cannot be easily classified or straightforwardly analysed Some of these patterns stretch or even threaten to cross the largely unexplored outer boundaries of the category In the canonical approach morphosyntactic features like gender are established in terms of a canonical ideal the clearest instance of the phenomenon The canonical ideal is a clustering of properties that serves as a baseline to measure the actual examples observed In this volume international experts use this approach to analyse a range of gender systems that diverge from the canonical ideal and to determine to what extent each component property of these systems can be considered canonical Chapters explore a wide range of typologically diverse languages from all over the world from South America to Melanesia and from Central Italy to Northern Australia The book

will be of interest to all linguists working in the field of typology from graduate level upwards as well as to morphologists and syntacticians of all theoretical stripes who have an interest in grammatical gender **Empires of the Maya** Jill

Rubalcaba,2009 Long before European boats reached the shores of the Americas sophisticated civilizations had already developed throughout the continents The empire of the Maya located in modern Mexico and Central America influenced civilization there for centuries The ancient Maya had fully developed the idea of the calendar detailed a writing system pioneered new ideas in agriculture and built towering palaces and temples that still stand today Empire of the Ancient Maya gives a brief summary of the history of the empire placing it within the context of its time period and geographical location and then explores the evolution of Maya civilization from its origin through the classic period to the Spanish conquest Delving into daily life the book includes Maya achievements in mathematics astronomy technology political organization commerce architecture and the arts **Indigenous Peoples, Poverty, and Development** Gillette H. Hall,Harry Anthony

Patrinos,2012-04-30 This book documents poverty systematically for the world s indigenous peoples in developing regions in Asia Africa and Latin America The volume compiles results for roughly 85 percent of the world s indigenous peoples It draws on nationally representative data to compare trends in countries poverty rates and other social indicators with those for indigenous sub populations and provides comparable data for a wide range of countries all over the world It estimates global poverty numbers and analyzes other important development indicators such as schooling health and social protection Provocatively the results show a marked difference in results across regions with rapid poverty reduction among indigenous and non indigenous populations in Asia contrasting with relative stagnation and in some cases falling back in Latin America and Africa *Language Diversity and Cognitive Representations* Catherine Fuchs,Stéphane Robert,1999 Significant new developments in brain activity research have revived the debate on the universality of language and its neural basis Within this debate the question of language diversity and its implications for cognition remains central and controversial It is here investigated in an original multimodal approach covering various aspects of cross linguistic variation differences between spoken signed and drum languages between normal speech and pathological speech and also between language and music as revealed in electric brain activity associated with language processing The various contributions linguistic anthropological psychological and neurophysical on the nature and status of variation and invariants in language provides evidence for complex interactions between language specific processes and general cognitive faculties This overview of some recent trends in cognitive linguistics opens up a promising new research area in the humanities as well as in the cognitive sciences

Bridging Cultural Concepts of Nature Rani-Henrik Andersson,Boyd Cothran,Saara Kekki,2021-12-16 National parks and other preserved spaces of nature have become iconic symbols of nature protection around the world However the worldviews of Indigenous peoples have been marginalized in discourses of nature preservation and conservation As a result for generations of Indigenous peoples these protected spaces of nature have meant dispossession treaty violations of hunting

and fishing rights and the loss of sacred places Bridging Cultural Concepts of Nature brings together anthropologists and archaeologists historians linguists policy experts and communications scholars to discuss differing views and presents a compelling case for the possibility of more productive discussions on the environment sustainability and nature protection Drawing on case studies from Scandinavia to Latin America and from North America to New Zealand the volume challenges the old paradigm where Indigenous peoples are not included in the conservation and protection of natural areas and instead calls for the incorporation of Indigenous voices into this debate This original and timely edited collection offers a global perspective on the social cultural economic and environmental challenges facing Indigenous peoples and their governmental and NGO counterparts in the co management of the planet s vital and precious preserved spaces of nature From Daēnā to Dīn Christine Allison, Anke Joisten-Pruschke, Antje Wendtland, 2009 Die Festschrift enthält insgesamt 30 Beiträge zu verschiedenen Bereichen der Iranistik Es handelt sich sowohl um Artikel zu Forschungsschwerpunkten von Ph G Kreyenbroek wie dem Zoroastrismus der kurdischen Literatur und Religion insbesondere die der Yeziden und Ahl e Haqq aber auch um Beiträge zur iranischen Philologie der Zeit der Achameniden sowie der Geschichte und Kultur Irans in islamischer Zeit Die Aufsätze umfassen so unterschiedliche Themen wie z B Sinn und Zweck von Ritualen aus der Sicht von Parsi Priestern eine Gegenüberstellung von Tawusi Melek und dem Pfau in der Mandaischen Tradition Zeitkonzepte des Yezidismus einen Überblick über die persische Presse der letzten Jahrzehnte jüdische Gesandte im Achamenidenreich Ohrmazd in der soghdischen Überlieferung Modalitätstypologie im Kurdischen und Hawrami oder baktrische Demonstrativpronomina Ein Überblick über das Werk Kreyenbroeks sowie ein Verzeichnis seiner Schriften ergänzen den Band **Wellness Beyond Words** T.S. Harvey, 2013-03-15 This anthropological account of Maya language use in health care in highland Guatemala explores some of the cultural and linguistic factors that can complicate communication in the practice of medicine Bringing together the analytical tools of linguistic and medical anthropology T S Harvey offers a rare comparative glimpse into Maya intra cultural therapeutic and cross cultural biomedical interactions
