## **Religion And Ethics For A New Age Evolutionist Approach:**

**Religion & Ethics for a New Age** Emmanuel K. Twesigye, 2001 In Religion Ethics for a New Age the problems of traditional Christian dogmas of evil death the fall violence sexuality patriarchal theological language and symbols are discussed within a global evolutionary context as well as that of the existential reality of cultural moral and religious pluralism Agape as the central commandment of Christ is adopted as the new universal grounding for true global Christian ethics sound religion humane moral and cultural values God's supernatural activities of creation and redemption are presented as coextensive with evolutionary history and life in the world as God's unfolding kingdom **Evolutionary History** Edmund Russell, 2011-04-11 We tend to see history and evolution springing from separate roots one grounded in the human world and the other in the natural world Human beings have however become probably the most powerful species shaping evolution today and human caused evolution in other species has probably been the most important force shaping human history This book introduces readers to evolutionary history a new field that unites history and biology to create a fuller understanding of the past than either can produce on its own Evolutionary history can stimulate surprising new hypotheses for any field of history and evolutionary biology How many art historians would have guessed that sculpture encouraged the evolution of tuskless elephants How many biologists would have predicted that human poverty would accelerate animal evolution How many military historians would have suspected that plant evolution would convert a counter insurgency strategy into a rebel subsidy With examples from around the globe this book will help readers see the broadest patterns of history and the details of their own life in a new light **AFER.**, 2003 **Bioethical and Evolutionary Approaches to Medicine and the Law** W. *Kevin Macdonald's Metaphysical Failure: a Philosophical, Historical, and Moral Critique of Evolutionary Psychology, Sociobiology, and Identity Politics* Jonas E. Alexis, 2022-04-25

In Kevin MacDonald's *Metaphysical Failure* Jonas E. Alexis offers a thoroughly researched nuanced and lucid analysis of Kevin MacDonald's thought in particular MacDonald's belief in biological and philosophical Darwinism. It is an important book that fills a critical gap in the literature on the history of revolutionary movements and Darwinism both in the West and in Asia. It is also a study that adds many significant strands to the densely interwoven history of ideas such as Malthusianism and Eugenics. Alexis's book engages debates in the history of ideas going back to Madison Grant and beyond and the history of Darwinism. It challenges many of the life long prevailing assumptions about identity politics and produces a powerful critique of how scientific theories have been misused to uphold misguided and faulty categorizations. Powerfully reasoned and backed with a startling array of documented studies Kevin MacDonald's *Metaphysical Failure* presents an in depth look at key beliefs behind many mistaken and consequently destructive actions taken by numerous writers and thinkers particularly Darwin's ardent enthusiasts and devoted disciples. The book presents eye opening insights into the historical development of Darwin's ideological project and how that project ended up crippling Darwin's intellectual children from Richard Dawkins Francis Crick James Watson Daniel Dennett Ernst Mayr and E O Wilson to Kevin MacDonald Richard Spencer David Duke and Jared Taylor. **Oxford**
