Religion And Creation:

Religion and Creation Keith Ward, 1996-06-20 This book is the second part of a major project of comparative theology begun with *Religion and Revelation* Clarendon Press 1994 which looks at major concepts of faith in all four of the main scriptural religions of the world In *Religion and Creation* the author explores the idea of a creator God in the work of twentieth century writers from Judaism Islam Hinduism and Christianity He develops a positive concept of God which stresses God's dynamic and responsive relation to the temporal structure of the universe and the importance of that structure to the self expression of the divine being Professor Ward goes on to present a Trinitarian doctrine of creation drawing inspiration from a wider set of theistic traditions and recent discussions in physics in the realm of cosmology

Evolution and Religious Creation Myths : How Scientists Respond Paul F. Lurquin School of Molecular Biosciences Washington State University, Linda Stone Department of Anthropology Washington State University, 2007-06-08 Polls show that 45% of the American public believes that humans were created about 10 000 years ago and that evolution is non-existent Another 25% believes that changes in the natural world are directed by a supernatural being with a particular goal in mind This thinking clashes frontally with scientific findings obtained in the past 150 years A large portion of the general public espouses the views of creationists and their descendants and ignores or is unaware of scientific advances Critical thinking about the natural world within a scientific framework is lacking in the USA and many parts of the world This manuscript provides a multidisciplinary explanation and defense for the science of evolution not just Darwinism as it is being challenged by arguments for intelligent design and other creation myths It draws in the life physical and social sciences and recent studies of human evolution that rely much on the idea of change over time which is evolution writ large It puts the evolution ID issue into international perspective by including opinions held in world religions other than Christianity It is clearly written and also can easily be used as a guide for those with some science background The authors make a convincing case that other books do not achieve this as much as they do in this work The book is written for a whole spectrum of educated people including teachers and teachers in training who are interested in the broad issues of the origins of the universe life and humans and who may not quite grasp the potential magnitude of the negative influence on all of science education of people embracing creationist and ID thinking This includes high school teachers and people on boards of education and in municipal governments anyone involved in education It could be used also in college courses such as contemporary social issues and Science and Society sometimes team taught by sociologists and scientists The authors show that when they are teleological dogmatic or politically inspired religious and creation myths threaten scientific efforts The book does not require any extensive knowledge of science The principle of change over time pervades all of science from cosmology to the search for the origin for life to human physical and cultural evolution The book educates readers on scientific matters that overwhelmingly support the idea of evolution not only in the living world but also in physical and social science It explains

too how evolution physical and biological is a random unguided process whose roots can be already found in quantum physics

The Nature of Creation Mark Harris, 2014-09-19 It is generally assumed that science and religion are at war Many now claim that science has made religious belief redundant others have turned to a literalist interpretation of biblical creation to reject or revise science others try to resolve Darwin with Genesis *The Nature of Creation* addresses this complex debate by engaging with both modern science and biblical scholarship together Creation is central to Christian theology and the Bible and has become the chosen battleground for scientists atheists and creationists alike *The Nature of Creation* presents a sustained historical investigation of what the creation texts of the Bible have to say and how this relates to modern scientific ideas of beginnings

The book aims to demonstrate what science and religion can share and how they differ and ought to differ Genesis, Creation, and Creationism Lloyd R. Bailey, 2006-05-28 Genesis Creation and Creationism is an important new study that explores all sides of the creationism debate and gives a sound and spiritually rich way of understanding the creation stories of Genesis Creationism is an ardently proclaimed and widely held point of view involving both scientific and biblical data While much has been written about scientific creationism much less is available about its counterpart biblical creationism Genesis Creation and Creationism provides this much needed evaluation of creationism by uniquely allowing the Bible to speak for itself Author Lloyd R Bailey who is a biblical scholar and also holds a degree in physics begins his investigation by inviting all sides of the creationism debate to set aside their prejudices for or against the theory of evolution and read the biblical story of creation in Genesis 1 1 2 4a He then examines the creationist phenomenon and compares this data with the agenda of the young earth creationist All the while Bailey enhances the Bible's ability to speak for itself by withholding judgment on many of the assumptions of historical critical biblical scholarship for example the date and authorship of Genesis The result is a scientifically straightforward study of Genesis that explicitly answers fundamentalist questions on creationism Genesis Creation and Creationism is a thought provoking study on the relationship of science and religion that speaks to all Christian denominations It provides excellent resource material for high school science classes religion classes and for seminarians engaged in biblical studies **Theism and the Christian Faith** Charles Carroll Everett, 1909

Richard Schaefer,2019-10-28 Author Richard A Schaefer was a lifelong communicator fascinated by stories and like any good journalist dug for the facts and verified sources exploring nagging questions such as Is creation or evolution more credible based on science and expert opinions This book truly represented a personal passion of looking at all sides of the CREATION vs EVOLUTION issue He called on many experts and theorists including Charles Darwin himself Surprisingly Darwin was far more skeptical of his own theories than are many PhDs today and admitted to significant holes in his logic Read for yourself as great thinkers explore the pros and cons of both theories and their variants *INVISIBLE LIGHT, OR THE ELECTRIC THEORY OF CREATION* GEO.
