Traditional Religion and Culture in a New Era Reimon Bachika, 2017-12-04 Where will postmodern culture lead us in the twenty first century Will it destroy traditional cultures together with the old established religions that were its foundation These questions and the new concerns they evoke are explored in this important collection of original essays Contributors challenge entrenched assumptions about what many social scientists consider irreversible cultural trends These include cultural differentiation emphasis on individual identity movement toward religion as a private act rather than a community commitment and above all emphasis on the relativity of all knowledge and values The volume asserts three lines of argument in opposition to these trends The first is the teleological significance of traditional religions and archaic knowledge History can be said to have no goal but the same must not follow for human culture One can conceive individually of a hundred goals to live for However the quality of life cannot be that diverse Taken to the extreme cultural particularity and philosophical nihilism are insults to the life that emerged on our planet eons ago Second this volume emphasizes moral concern and the importance of universal values Ideas of human well being have been formulated from ancient times Religious beliefs invariably contain statements of value in the form of commandments and exhortations that express fundamental goals for a quality of life Third the nature of religion and spirituality is discussed Religion today has become controversial socially and marginal sociologically The role of religion in society is sometimes problematic or abused but it is also underestimated and misunderstood The authors suggest that contemporary religion might best be viewed as non ideological spiritual culture This in turn looks to a future in which religion and culture coalesce This volume includes an international cast of scholars from Japan the United States Canada the United Kingdom Germany Greece Italy New Zealand and Belgium All have engaged in research outside their own countries Taken as a whole this volume addresses issues of interest to those in the fields of futures studies religion and philosophy and in particular those concerned with human agency personal responsibility and

meaning of the word culture I believe that the belief in one God and religion has served humanity the most in our growth and development throughout history But if this is true then we must ask ourselves why is our society so dark and evil today Notably with so many people still claiming to be religious people around the world Christians and Muslims make up approximately 55 percent of the world's population and all religions make up nearly 90 percent of the world's population One of the reasons I believe God's knowledge is not shining in our world today is that each religion is claiming that their belief is the only way to be blessed by God Because each religion is claiming that the other religions are wrong I think that this has created confusion in our society concerning religion Each of us who believe in God was born into this world knowing nothing and all of us had to accept that which was told to us by our parents and community as the truth However God has given each of us the ability to study and grow in knowledge Eventually we should develop an understanding that will provide us with the ability to distinguish right from wrong and truth from lies for ourselves I believe that each new generation that inherits God's books must reinterpret them to be able to judge for themselves what is the truth from God Also we need to decide for ourselves whether today's religions are misrepresenting these books original message and intentions On the Day of Judgment the answer that you were just following what was passed down to you won't be an excuse with God If you were born into your religion what makes your belief any different from all the other religions that also say that their faith is the right way and that yours is the wrong way If you believe in God and His promise I encourage you to investigate for yourself what God wants you to really believe say and do to be blessed by Him I want to share with you my understanding of culture religion and the real purpose of life that God has blessed me to understand This understanding I believe will help you to see why we are having so many problems in our societies and religions of today Also what it is going to take for our world to get back on the right track

Religion, Culture, and the Monstrous Joseph P. Laycock, Natasha L. Mikles, 2021-02-15 Religion Culture and the Monstrous Of Gods and Monsters explores the intersection of the emerging field of monster theory within religious studies With case studies from ancient Mesopotamia to contemporary valleys of the Himalayas to ghost tours in Savannah Georgia the volume examines the variegated nature of the monstrous as well as the cultural functions of monsters in shaping how we see the world and ourselves In this the authors constructively assess the state of the two fields of monster theory and religious studies and propose new directions in how these fields can inform each other The case studies included illuminate the ways in which monsters reinforce the categories through which a given culture sees the world At the same time the volume points to how monsters appear to question disrupt or challenge those categories creating an unsettling or surplus of meaning

Religion, Culture, and the State Howard Adelman, Pierre Anctil, 2011-04-09 The Canadian principle of reasonable accommodation demands that the cultural majority make certain concessions to the needs of minority groups if these concessions will not cause undue hardship This principle has caused much debate in Quebec particularly over issues of language Muslim head coverings and religious symbols such as the kirpan traditional Sikh dagger In 2007 Quebec Premier

African Traditional Religion in the Modern World, 2d ed. Douglas E. Thomas, 2015-05-11 African traditional religion encompasses a variety of non dogmatic spiritual practices followed by millions around the world Some scholars argue it is related to the Nubian religion of Egypt s Dynastic Period In an expanded second edition this book examines the nature of African traditional religion and describes common attributes of various cultural belief systems with an emphasis on West Africa Principal elements studied include sacrifice salvation and culture modes of revelation divination and African resilience in the face of invasion and colonization The religious experiences of black people throughout the Americas are also covered The author finds the cosmology symbolism and rituals of the Yoruba culture to be the fundamental bases of African traditional religion and draws similarities between the oral and written literature of West Africans and that of New World practitioners The influence of Islam and Christianity is also discussed Instructors considering this book for use in a course may request an examination copy here Religion, Culture, and International Conflict Michael Cromartie, 2005-03-25 As religiously grounded moral arguments have become ever more influential factors in the national debate particularly reinforced by recent presidential elections and the creation of the faith based initiative office in the White House journalists ignorance about theological convictions has often worked to distort the public discourse on important policy issues Pope John Paul II s pronouncements on stem cell research the constitutional controversies regarding faith based initiatives the emerging participation of Muslims in American life issues like these require political journalists in print and broadcast media

to cover religious contexts that many admit they are ill equipped to understand Put differently these news events reflect subtle theological nuances and deep faith commitments that shape the activities of religious believers in the public square Inasmuch as a faith tradition is an active or significant participant in the public arena journalists will need to better understand the theological sources and religious convictions that motivate this political activity The current national discourse has brought faith and its relationship to public policy to the forefront of our daily news Since 1999 the Ethics and Public Policy Center through the generosity of the Pew Charitable Trusts has hosted six conferences for national journalists to help raise the level of their reporting by increasing their understanding of religion religious communities and the religious convictions that inform the political activity of devout believers This book contains the presentations and conversations that grew out of those conferences
