Religion And Psychology In Transition Psychoanalysis Feminism And Theology:

Religion and Psychology in Transition James W. Jones, 2008-10-01 In this thought provoking book clinical psychologist and professor of religious studies James W Jones presents a dialogue between contemporary psychoanalytic thinking and contemporary theology He sheds new light on the interaction of religion and psychology by viewing it from the perspective of world religions providing an epistemological framework for the psychology of religion that draws on contemporary philosophy of science and bringing out the importance of gender as a category of analysis Developments in psychoanalysis provide new resources for theological reflection Jones contends The Freudian view that human nature is isolated and instinctual has shifted to a vision of the self as constituted in and through relationships Jones uses this relational model of human nature to explore the convergence between contemporary psychoanalysis feminist theorizing and themes in religious thought found in a variety of traditions He also critiques the reductionism inherent in Freud's discussion of religion and proposes nonreductionistic and genuinely psychoanalytic ways for psychoanalysis to treat religious topics For therapists psychologists theologians and others interested in spiritual or psychological issues Jones offers illuminating clinical material and insightful analysis

Taking Psychoanalytic and Psychometric Perspectives toward a Binocular Vision of Religion Barbara Keller, 2020-06-02 Psychoanalytic and Psychometric Perspectives on Religion suggests to combine perspectives from psychoanalysis and academic psychology from nomothetic and idiographic research for more depth of vision for the current psychology of religion In this interdisciplinary study Barbara Keller demonstrates the potential of integrative perspectives by analysing topics such as religious development religion and personality and the process of working with religious issues in psychotherapy Options for the study of lived religion are discussed taking into consideration North American and European contexts of religious experience and of psychological and psychoanalytic discussion

Psychology in Nietzsche's Criticism of Religion Jan-Olav Henriksen, 2022-11-14 Friedrich Nietzsche claimed to be a psychologist This claim is substantiated in his criticism of religion In this book Jan Olav Henriksen provides new perspectives on Nietzsche's contribution to such criticism by applying elements from attachment theory and self psychology The result is that Nietzsche's insights into the problematic elements in religion point beyond what he was able to articulate based on the psychological resources available to him Henriksen sheds new light on the psychological dimensions in Nietzsche's individualism his understanding of God morality metaphysics and emotions and demonstrates how Nietzsche's criticism of religion is rooted in both psychological splitting and a profound loss of the orientational resources religion provided in his childhood

Psychology, Religion, and Spirituality Fraser Watts, 2017-03-06 This book gives an up to date overview and evaluation of what psychology tells us about religious beliefs practices and experiences

Shared Wisdom Pamela Cooper-White, 2024-11-19 For twenty years educators caregivers psychotherapists and theologians have turned to Pamela Cooper White's *Shared Wisdom* on the dynamics between caregivers and care seekers Now Cooper White updates her

groundbreaking book to present new insights on how understanding one's own emotional reactions remains a core competency for ministry **Sigmund Freud and Oskar Pfister on Religion** Carlos Domínguez-Morano, 2023-07-24 Sigmund Freud and Oskar Pfister on Religion examines the dialogue between psychoanalysis and religion through the encounters of two men the unfaithful Jew who founded psychoanalysis and a pastor of profound religious faith and proven psychoanalytic conviction Carlos Domínguez Morano analyses the original encounters between Freud and Pfister and their respective positions noting the incidences, impasses and progress of their discussions The complex interactions between psychoanalysis and religion over time are considered and Domínguez Morano assesses the fundamental parameters of each perspective with reference to Catholicism The book explores the relationship between psychoanalysis and religion as a rich ongoing and unending dialogue and sheds new light on the origins of psychoanalysis Sigmund Freud and Oskar Pfister on Religion will be of great interest to academics and scholars of psychoanalytic studies religion the history of psychology and the history of ideas *Race in Psychoanalysis* Celia Brickman, 2017-12-06 Race in Psychoanalysis analyzes the often unrecognized racism in psychoanalysis by examining how the colonialist discourse of late nineteenth century anthropology made its way into Freud's foundational texts where it has remained and continues to exert a hidden influence Recent racial violence particularly in the US has made many realize that academic and professional disciplines as well as social and political institutions need to be re-examined for the racial biases they may contain Psychoanalysis is no exception When Freud applied his insights to the history of the psyche and of civilization he made liberal use of the anthropology of his time which was steeped in colonial racist thought Although it has often been assumed that this usage was confined to his non-clinical works this book argues that through the pivotal concept of primitivity it fed back into his theories of the psyche and of clinical technique as well Celia Brickman examines how the discourse concerning the presumed primitivity of colonized and enslaved peoples contributed to psychoanalytic understandings of self and raced other She shows how psychoanalytic constructions of race and gender are related and how Freud's attitudes towards primitivity were related to the anti-Semitism of his time All of this is demonstrated to be part of the modernist aim of psychoanalysis which seeks to create a modern subjectivity through a renegotiation of the past Finally the book shows how all of this can affect both clinician and patient within the contemporary clinical encounter Race in Psychoanalysis is a pivotal work of significance for scholars practitioners and students of psychoanalysis psychologists clinical social workers and other clinicians whose work is informed by psychoanalytic insights as well as those engaged in critical race and postcolonial studies *Research in the Social Scientific Study of Religion, Volume 29* Andrew Village, Ralph W. Hood, 2018-10-16 The general papers in Volume 29 of Research in the Social Scientific Study of Religion cover a range of topics including psychological type prayer nature and well-being psychobiography coping with addiction and the role of place in spirituality The first special section on congregational studies draws on a range of large datasets from the National Church Life Surveys in Australia Papers examine the factors that

Climate Change and the Symbol Deficit in the Christian Tradition Jan-Olav Henriksen, 2022-02-24 Exploring how the climate crisis discloses the symbol deficit in the Christian tradition this book argues that Christianity is rich in symbols that identify and address the failures of humans and the obstacles that prevent humans from doing well while positive symbols that can engage people in constructive action seem underdeveloped Henriksen examines the potential of the Christian tradition to develop symbols that can engage peoples in committed and sustained action to prevent further crisis To do so he argues that we need symbols that engage both intellectually and emotionally and which enhance our perception of belonging in relationships with other humans be it both in the present and in the future According to Henriksen the deficit can only be obliterated if we can develop symbols that have some root or resonance in the Christian tradition provide concrete and specified guidance of agency engage people both emotionally and intellectually and finally open up to visions for a moral agency that provide positive motivations for caring about environmental conditions as a whole

Religion as Orientation and Transformation Jan-Olav Henriksen, 2017-05-12 Religions are not primarily expressed in people s heads and their thoughts but in what they do People use religious symbols in order to orientate or change themselves In this way religion is related to all realms of human life Jan Olav Henriksen shows that only against this backdrop can we understand the role of religions in human life Book jacket

Korean, Asian, or American? Jacob Yongseok Young, 2012-04-26 The voices of second generation Korean Americans echo throughout the pages of this book which is a sensitive exploration of their struggles with minority marginality cultural ambiguity and negative perceptions Born in the United States they are still viewed as foreigners because of their Korean appearance Raised in American society they are still tied to the cultural expectations of their Korean immigrant parents

While straddling two cultures these individuals search for understanding and attempt to rewrite their identity in a new way Through autobiographical reconstruction and identity transformation they form a unique identity of their own a Korean American identity This book follows a group of second generation Korean American Christians in the English speaking ministry of a large suburban Korean church It examines their conflicts with the conservative Korean speaking ministry ruling the church and their quest to achieve independence and ultimately become a multicultural church **Relating to God** , Dan Merkur,2013-11-21 In Relating to God Clinical Psychoanalysis Spirituality and Theism Dan Merkur conceptualizes religious discourse within psychoanalysis He proposes that God be treated as a transferential figure whose analysis leads to a reduction of the parental content that is projected onto God Merkur notes that religious conversion experiences regularly involve theological intuitions that are either rational or owing to morbid complications have undergone displacement into irrational symbolism Analysis renders the religiosity more wholesome Traditionally psychoanalytic thought has been dismissive of religion Freud is on record however as having called psychoanalysis a neutral procedure He argued that religion with its dependency on a providential God who punishes disobedience imagines spirituality on the model of human parents and fails to approach spirituality in an appropriately scientific manner He wrote little of spiritual phenomena but mentioned both the rationality of the universe and the parapsychological occurrence of thought transference Occasionally later psychoanalysts used different language in order to contrast wholesome and morbid forms of religion Erich Fromm distinguished authoritarian and humanistic religions while D W Winnicott condemned fetishistic behavior while approving of playful illusions that require belief in These formulations constructed a middle position for clinicians neither categorically opposed to religion as classical psychoanalysis was nor do they embrace cultural relativity as spiritually oriented psychotherapists are currently advocating What sorts of spiritual practices does psychoanalysis find unobjectionable As examples of humanistic religion Fromm named Zen Buddhism Buddhist mindfulness meditation and the via negativa or way of negating that some Christian and Jewish mystics have followed Because the Bible based approaches are little known Merkur discusses their histories procedures and psychoanalytic understanding Human Development and Faith (Second Edition) Felicity B. Kelcourse,2015-07-28 This book now in its second edition brings together the best available understandings of human development from a multidisciplinary perspective Uniquely inclusive of the moral and faith dimensions of context and life cycle development Human Development and Faith examines the interplay of mind body family community and soul at every stage of development It addresses two central questions What are the good enough conditions of parenting family and community in each phase of life from birth to death which support growth and development What gives life adequate meaning as development proceeds If human development describes the normative and hoped for passages of life then faith provides the necessary component of meaning Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live The Journal of Pastoral Theology called the

first edition of *Human Development and Faith* an excellent text for pastoral theology courses because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development This second edition includes a new chapter on infancy updates reflecting our growing awareness of cultural diversity and a new preface

Freud and Religion William B. Parsons, 2021-05-27 We live in an era that often described as therapeutic Our culture is suffused with unconscious fantasies and psychoanalytic ways of thinking about self other and society Aspects of the Freudian cultural universe have also had an impact on how we think about religion In this volume William Parsons explores the relationship between religion and psychoanalysis through multiple linked investigations Why did Freud write about religion and what did he say What were the multiple critiques levelled at his work What were the post Freudian psychoanalytic advances How can we still apply psychoanalytic ideas going forward In answering these and related questions Parsons distinguishes between classic reductive adaptive and transformational psychoanalytic models He also argues that the psychoanalytic theory of religion needs to integrate reflexive dialogical and inclusive elements as part of its toolkit Offering illustrations and applications of such revisions Parsons creates new capacities for thinking psychologically and critically about religion

Relating God and the Self Jan-Olav Henriksen, 2016-04-08 Religion is not only about understanding the world it is just as much about how to develop and shape the self's experience of itself Because the religious self is shaped by our symbols of God and symbols of God are also shaped by the self theology and philosophy of religion cannot ignore this interplay or the psychological dimension when they discuss what symbols of God are adequate and not By discussing critically different ways the symbol of God functions in the formation of the self the book develops a nuanced and original approach to the interplay between God and the self It suggests that play is actually an important metaphor in order to develop a dynamic understanding of religion's way of relating God and the Self This approach challenges understandings of religion focussing only its cognitive claims as well as those who emphasize doctrinal orthodoxy as the most important element in religion

Understanding Religious Conversion Dong Young Kim, 2012-07-20 Understanding Religious Conversion begins with emphasis on the value of respecting religious theological interpretations of conversion while coordinating social scientific studies of how personal social and cultural issues are relevant to the human transformational process It encourages us to bring together the perspectives of psychology sociology anthropology and religious studies into critical and mutually informing conversation for establishing a richer and more accurate perception of the complex phenomenon of religious conversion The case of St Augustine's conversion experience superbly illustrates the complicated and multidimensional process of religious change By critically extending the contributions of the literature within Lewis Rambo's interdisciplinary framework Dong Young Kim presents a more integrated picture of how personal social cultural and religious theological components interact with one another in the process of Augustine's conversion In doing so he has struggled with how to relocate more effectively and practically the conversion narrative of Augustine within the context of pastoral care and ministry and the field of the

academy in order to facilitate a better understanding of the conversion stories of the church members as well as to enhance the experiences of religious conversion within the Christian community *A Moral Ontology for a Theistic Ethic* Frank G. Kirkpatrick,2017-11-22 This title was first published in 2003 This book develops a moral ontology for a theistic ethic that engages the work of contemporary moral and political philosophers and reaffirms the relevance of a theistic tradition of God's relation to the world reflected in the fundamental teachings of Judaism Christianity and Islam Drawing on recent thought in the non religious fields of psychology and political and moral philosophy which build around the concept of human flourishing in community Kirkpatrick argues that a theistic ethic need not be the captive of parochial or sectarian theological camps He proposes a common or universal ethic that transcends the fashionable ethnocentric incommensurate differences in morality alleged by many post modern deconstructionists In the wake of ethnic religious strife post September 11th 2001 this book argues for a common morality built on the inclusivity of love community and justice that can transcend sectarian and parochial boundaries **The Good Life** Jeffrey B. Rubin,2012-02-01 Psychoanalysts have traditionally been expert at uncovering what afflicts and damages people argues Jeffrey B Rubin but by focusing on narcissism and perversions depression and sadism psychoanalysis has all too often disregarded what nourishes and sustains us In *The Good Life* he demonstrates how psychoanalysis can make a profound contribution to the well lived life by drawing on a neglected but potent aspect of psychoanalysis its capacity to illuminate a psychology of health as well as illness Rubin shows that at its best psychoanalysis can highlight both the ingredients of love ethics creativity and spirituality as well as the obstacles to experiencing them Exploring the good life from this dual perspective provides an indispensable resource for helping us live with greater meaning and vitality *The Roots of Radicalization* Victor Counted,2021-08-06 In *The Roots of Radicalization* Disrupted Attachment Systems and Displacement Victor Counted examines the expressions of attachment related radicalization Counted argues that radicalization is rooted in experiences of disrupted attachment in religion places or with people who are perceived as sources of security
