Schooling For Humanity When Big Brother Isn't Watching:

Schooling for Humanity David O. Solmitz, 2001 *Schooling for Humanity When Big Brother Isn't Watching* documents David O. Solmitz's thirty-year struggle as a controversial anti-establishment teacher in a small rural central Maine high school. Using journal entries accompanied by administrative reprimands intertwined with historical documentation of the intensifying conflict between democratic pedagogy and capitalist domination in our public schools, the author gives a narrative account of his efforts to create a democratic classroom in a traditional secondary school setting. By incorporating theories of progressive educators into his practice, Solmitz demonstrates the possibility of achieving the ideals of democratic schooling in spite of an increasingly bureaucratic rigid and authoritarian system.

Becoming a Critical Educator Patricia H. Hinchey, 2004 Many American educators are all too familiar with disengaged students, disenfranchised teachers, sanitized and irrelevant curricula, inadequate support for the neediest schools and students, and the tyranny of standardizing testing. This text invites teachers and would-be teachers unhappy with such conditions to consider becoming critical educators: professionals dedicated to creating schools that genuinely provide equal opportunity for all children. Assuming little or no background in critical theory, chapters address several essential questions to help readers develop the understanding and resolve necessary to become change agents: Why do critical theorists say that education is always political? How do traditional and critical agendas for schools differ? Which agenda benefits whose children? What classroom and policy changes does critical practice require? What risks must change agents accept? Resources point readers toward opportunities to deepen their understanding beyond the limits of these pages.

The Wire in the College Classroom Karen Dillon, Naomi Crummey, 2015-04-01 *The Wire*'s provocative subject matter, layered narrative, and explicit critiques of American socioeconomic institutions make it one of the most teachable television series in recent years. This collection of new essays offers practical examples for implementing *The Wire* in the college classroom as a cultural text to engage students in critical and creative inquiry. The essays provide a disciplinary framework for using the series in media studies, writing, and narrative ethics and rhetoric, and education and literacy. Each essay details the pedagogical goals of teaching the series or specific episodes, how it was employed in class, and student responses to the material. Instructors considering this book for use in a course may request an examination copy [here](#).
