Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood,P. Hallinger,2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development

Authentic Holistic Education, Wellbeing, and the Future of Catholic Schools in a Changing World Graeme J. Mellor, 2025-04-28 This book addresses the effects of the changed and changing contexts of Catholic Education in the contemporary world These include the social educational and ecclesial contexts Meaning structures shaped by these past contexts have broken down and the greatest but often unarticulated context is the anthropological context The understanding of humanity and the meaning of human existence today is beset by a marked lack of clarity and consistent direction Catholic Education today exists within contextual fields which are almost unrecognizable from those which existed at the close of the Second World War Each succeeding decade since has wrought stark and dynamic change socially educationally and religiously As such Catholic Education today looks for a direction forward and a sense of purpose into the future This book proposes that the major purpose of contemporary Catholic Education is to provide an educational context that nurtures the true holistic growth of students within its care The focus upon Christian Humanism in contemporary Papal and Magisterial teaching sets the ground for this developing understanding
