Schools Of Linguistics:

Schools of Linguistics Geoffrey Sampson, 1980 This book presents a portrait of the contrasting beliefs assumptions and intellectual backgrounds of the various schools of linguistics which contributed to the subject throughout the 20th century beginning with a glimpse of their 19th century roots *Modern Schools of Linguistic Thought* Zeki Hamawand, 2020-05-21 This textbook provides a clear and concise overview of the main schools of linguistic thought and scholarship from the late 18th century to the present day examining the key tenets and leading figures of each approach and assessing their impact on the field Combining theory with practice the author aims to familiarise students with the mechanisms used in analysing language structures to acquaint them with the history of the discipline and to demonstrate how different sometimes competing approaches can be combined to understand language and linguistics today Written in an engaging and accessible manner this textbook is an ideal primer for new students of linguistics at any level as well as more experienced researchers seeking to understand the history of their field or the arguments and theories of other sub disciplines **Dictionary of the Prague School of Linguistics** Josef Vachek, 2003-01-01 This is the first English version of a text out of print for more than 40 years summarising the positions and key concepts of an influential stream of linguistic thought Using quotations as entries J Vachek 1909 1997 a leading advocate of the Prague School employed more than 160 sources papers and monographs by well over 30 representatives of the school Mathesius Trnka Skalicka Dane Dokulil Mukarovsk Jakobson Trubetzkoy Isachenko and others The dictionary both captures the pioneering efforts and achievements of the school from its foundation in 1926 and provides a framework for assessing the current state of affairs attesting to its originality and serving as a preventive to treading paths already explored The headword concepts are provided with French German and Czech equivalents and Vachek s original preface is supplemented by a foreword which traces the development of the school up to the present date and puts it into perspective **Schools of Linguistics** Geoffrey Sampson, 2022 **Schools of Thought** O. Amsterdamska, 2012-12-06 This book is based on the assumption that the development of science has to be understood both as a social and as an intellectual process The division between internal and external history between history of ideas and sociology of science has been harmful not only to our understanding of scientific rationality but also to our understanding of the social processes of scientific development Just as philosophy of science must be informed by its history so also must sociology of science be both historically and philosophically informed Proceeding on this assumption I examine in detail the contents of linguistic ideas and the changes they underwent as well as the institutional processes of disciplinary development and school formation The development of linguistics in the nineteenth and early twentieth centuries has provided me with a convenient locus for a study of the processes of cognitive change and continuity in the context of modern academically institutionalized science This book examines first the idea system and the institutionalization of historical and comparative linguistics in the first half of the nineteenth century and then focusses on the formation and development of

three schools of thought the Neogrammarians the Neo Idealists and the Geneva School of Ferdinand de Saussure

Universal History of Linguistics Esa Itkonen, 1991-01-01 This wide ranging book presents the linguistic achievements of four major cultures to readers presumably conversant with modern theoretical linguistics The chapter on India discusses in detail Panini's c 400 B C grammar Astadhyayi as well as the work of his commentators Katyayana Patanjali and Bhartrhari In the Chinese tradition the Confucian doctrine of the Rectification of Names is singled out for treatment Arabic linguistics is represented by Sibawaihi's d 793 grammar al Kitab in particular its syntax as well as the subsequent commentary tradition The chapter on Europe which is the most comprehensive of the four covers the time span from antiquity to the 20th century special attention is devoted to the contributions of Plato Aristotle the Stoics Varro Apollonius Dyscolus and the Modistae The achievements of the cultures in linguistics are treated throughout from a deliberately value laden point of view The achievements of Western antiquity and the Middle Ages are shown to be much more than the average linguist is inclined to believe Even more importantly it is shown that the Indian and the Arab traditions have been superior to the European tradition at least until the 20th century The fact that a linguistic theory created some 2 400 years ago is fully as adequate as our best theories today must have far reaching implications for the notion of scientific progress More precisely it proves necessary to distinguish between progress in the human sciences and progress in the natural sciences These issues which pertain to the general philosophy of science are treated in the final chapter of the book
