jobs that involve data science have proliferated and an array of data science programs at the undergraduate and graduate levels have been established. Nevertheless, data science is still in its infancy, which suggests the importance of envisioning what the field might look like in the future and what key steps can be taken now to move data science education in that direction. This study will set forth a vision for the emerging discipline of data science at the undergraduate level. This interim report lays out some of the information and comments that the committee has gathered and heard during the first half of its study, offers perspectives on the current state of data science education, and poses some questions that may shape the way data science education evolves in the future. The study will conclude in early 2018 with a final report that lays out a vision for future data science education.

ENCOUNTERS with GOD William K. Dorrance, 2025-05-20 Read this book to learn facts which support religious beliefs, why and how God communicates with humanity, why bad things happen to good people, about the evidence for God, souls, and an afterlife, why the evidence is ignored by science and Christianity, about the continuation of thinking, seeing, and hearing near death experiences when the body is clinically dead, what mediums, channeling, and between lives regression reveal about life after death, what the experience of empathy reveals about you, about contemporary Jesus-like spiritual teachers, where and how to experience your soul, why human behavior, wars, conflicts, and crimes have not improved despite science's achievements.
