Science The Center Of Culture:

Reconsideration of Science and Technology III Liu Dachun, Yang Huili, Fan Shanshan, 2022-09-30 Drawing on debates from traditional and postmodern thoughts on science and technology the title builds a new theoretical framework to reconsider science and technology integrating the opposing viewpoints that either justify science or negate it As the third volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this final volume seeks to restore the cultural implications of science Across the six chapters the authors probe the prospect of a pluralistic scientific culture including discussions of diversified value choices the tension between reason and unreason other binary characteristics of scientific knowledge including objectivity and uniqueness universality and locality as well as the loss awakening and reconstruction of scientific culture The authors call for a transformation of scientific culture from a dominant culture to an affirmative one and envision a free and open world of science and technology The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture

The Comprehensive Guide to Science and Faith William A. Dembski, Casey Luskin, Joseph M. Holden, 2021-10-05 Science and Faith Can and Do Support Each Other Science and Christianity are often presented as opposites when in fact the order of the universe and the complexity of life powerfully testify to intelligent design With this comprehensive resource that includes the latest research you ll witness how the findings of scientists provide compelling reasons to acknowledge the mind and presence of a creator Featuring more than 45 entries by top caliber experts you ll better understand how scientific concepts like intelligent design are supported by evidence the scientific findings that support the history and accounts found in the Bible the biases that lead to scientific information being presented as a challenge rather than a complement to Christianity Whether you re looking for answers to your own questions or seeking to explain the case for intelligent design to others The Comprehensive Guide to Science and Faith is an invaluable apologetic tool that will help you explore and analyze the relevant facts research and theories in light of biblical truth

Media and Science-Religion Conflict Thomas Aechtner, 2020-01-22 This book examines why the religion science skirmishes known as the Evolution Wars have persisted into the 21st century It does so by considering the influences of mass media in relation to decision making research and the Elaboration Likelihood Model one of the most authoritative persuasion theories The book s analysis concentrates on the expression of cues or cognitive mental shortcuts in Darwin sceptic and counter creationist broadcasts A multiyear collection of media generated by the most prominent Darwin sceptic organizations is surveyed along with rival publications from supporters of evolutionary theory described as the pro evolutionists The analysed materials include works produced by Young Earth Creationist and Intelligent Design media makers New Atheist pacesetters as well as both agnostic and religious supporters of evolution These cues are shown to function as subtle but effective means of shaping

public opinion including appeals to expertise claims that ideas are being censored and the tactical use of statistics and technical jargon. Contending that persuasive mass media is a decisive component of science religion controversies, this book will be of keen interest to scholars of Religion Science and Religion interactions as well as researchers of Media and Communication Studies more generally. In *Democratic Experiments*, Brice Laurent discusses the challenges that emerging technologies create for democracy today. He focuses on nanotechnology and its attendant problems, proposing nanotechnology as a lens through which to understand contemporary democracy in both theory and practice. Arguing that democracy is at stake where nanotechnology is defined as a problem, Laurent examines the sites where nanotechnology is discussed and debated by scientists, policymakers, and citizens. It is at these sites where the joint production of nanotechnology and the democratic order can be observed. Focusing on the United States, France, and Europe and various international organizations, Laurent analyzes representations of nanotechnology in science museums, collective discussions in participatory settings, the making of categories such as nanomaterials or responsible innovation, in standardization and regulatory arenas, and initiatives undertaken by social movements. He contrasts American debates in which the concern for public objectivity is central with the French state experiment, the European goal of harmonization, and the international concern with a global market. In France, public debate proceeded in response to public protest and encountered a radical critique of technological development. The United States experimented with an innovative approach to technology assessment. The European regulatory approach results in lengthy debates over political integration. The United States relies on the adversarial functioning of federal agencies. Because nanotechnology is a domain where concerns over anticipation and participation are pervasive, Laurent argues, nanotechnology and science and technology studies more generally provides a relevant focus for a renewed analysis of democracy. Equity, Exclusion and Everyday Science Learning Emily Dawson, 2019-02-01 Equity Exclusion and Everyday Science Learning explores how some people are excluded from science education and communication Taking the role of science in society as a starting point it critically examines the concept of equity in science learning and develops a framework to support inclusive change This book presents a theoretically informed empirically detailed analysis of how people from minoritised groups in the UK experience science and everyday science learning resources in their daily lives The book draws on two years of ethnographic research carried out in London with five community groups who identified as Asian Somali Afro Caribbean Latin American and Sierra Leonean Exploring their experiences of everyday science learning from a sociological perspective with social justice as a guiding concern this book opens with a theory of exclusion and closes with a theory of inclusion Equity Exclusion and Everyday Science Learning is not only an essential text for postgraduate students and postdoctoral researchers of Science Education Science Communication and Museum Studies but for any professional working in museums science centres and institutional public engagement

In Synchrony with the Heavens, Volume 2 Instruments of Mass Calculation David King, 2005-06-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by
