Science under Scrutiny R. W. Home, 2013-03-09 Only in fairly recent years has History and Philosophy of Science been recognized though not always under that name as a distinct field of scholarly endeavour Previously in the Australasian region as elsewhere those few individuals working within this broad area of inquiry found their base both intellectually and socially where they could In fact the institutionalization of History and Philosophy of Science began comparatively early in Australia An initial lecturing appointment was made at the University of Melbourne immediately after the Second World War in 1946 and other appointments followed as the subject underwent an expansion during the 1950s and 60s similar to that which took place in other parts of the world Today there are major Departments at the University of Melbourne the University of New South Wales and the University of Wollongong and smaller groups active in many other parts of Australia and in New Zealand

that too often are uncritically taken for granted and for non academics wondering why we can't shake off the politics that so influences scientific work Vernon Smith Nobel Laureate in Economic Sciences and George L Argyros Chair in Finance and Economics Chapman University Advances and deepens empirically rigorous scholarship into biased political influences affecting academic and professional psychology Offers constructive solutions for minimizing undue political influences within psychology and moving the field forward Serves as a resource for psychological academicians researchers practitioners and consultants seeking to restore the principles of accurate science and effective practice to their respective areas of research

Rational Changes in Science Joseph C. Pitt, Marcello Pera, 2012-12-06 THE PROBLEMS OF SCIENTIFIC RATIONALITY Fashion is a fickle mistress Only yesterday scientific rationality enjoyed considerable attention consideration and even reverence among philosophers but today's fashion leads us to despise it and the matron rejected and abandoned as Hecuba complains *modo maxima rerum tot generis natisque potens nunc trahor exui inops* to cite Kant for our purpose who cited Ovid for his Like every fashion ours also has its paradoxical aspects as John Watkins correctly reminds in an essay in this volume Enthusiasm for science was high among philosophers when significant scientific results were mostly a promise it declined when that promise became an undeniable reality Nevertheless as with the decline of any fashion even the revolt against scientific rationality has some reasonable grounds If the taste of the philosophical community has changed so much it is not due to an incident or a whim This volume is not about the history of and reasons for this change Instead it provides a view of the new emerging image of scientific rationality in both its philosophical and historical aspects In particular the aim of the contributions gathered here is to focus on the concept around which the discussions about rationality have mostly taken place scientific change

Sturdy, 1995 This comprehensive survey of the members of France's Academie des Sciences to the 1750s takes up the challenge to search for a way to connect history of science with social and cultural history at the bottom the level of the scientists rather than at the top the level of philosophical debate about science and culture T L Hankins In Defence of Biography the Use of Biography in the History of Science in History of Science 17 1979 1 16 The book focuses primarily on the academicians themselves and although it has much to say about the Academie as an institution it does so in the light of the changing positions which the academicians occupied in the social hierarchy of early modern France It explores the implications of those changes for the development of the Academie down to the mid 1700s and it argues that throughout this period the the relationship which the Academie had with the Bourbon regime and with French society in general was governed governed to a large extent by the personal circumstances of the
