Between 1830 and 1914 in Britain a dramatic modification of the reputation of Edmund Burke 1730 1797 occurred Burke an Irishman and Whig politician is now most commonly known as the founder of modern conservatism an intellectual tradition which is also deeply connected to the identity of the British Conservative Party The idea of Burkean conservatism a political philosophy which upholds the authority of tradition the organic historic conception of society and the necessity of order religion and property has been incredibly influential both in international academic analysis and in the wider political world This is a highly significant intellectual construct but its origins have not yet been understood Emily Jones demonstrates for the first time that the transformation of Burke into the founder of conservatism was in fact part of wider developments in British political intellectual and cultural history in the nineteenth and early twentieth centuries Drawing from a wide range of sources including political texts parliamentary speeches histories biographies and educational curricula Edmund Burke and the Invention of Modern Conservatism shows how and why Burke s reputation was transformed over a formative period of British history In doing so it bridges the significant gap between the history of political thought as conventionally understood and the history of the making of political traditions The result is to demonstrate that by 1914 Burke had been firmly established as a conservative political philosopher and was admired and utilized by political Conservatives in Britain who identified themselves as his intellectual heirs This was one essential component of a conscious re working of C conservatism which is still at work today *Nineteenth-Century Philosophy* Alan D. Schrift, Daniel Conway, 2014-09-19 The second half of the 19th Century saw a revolution in both European politics and philosophy Philosophical fervour reflected political fervour Five great critics dominated the European intellectual scene Ludwig Feuerbach Karl Marx Soren Kierkegaard Fyodor Dostoevsky and Friedrich Nietzsche Nineteenth Century Philosophy assesses the response of each of these leading figures to Hegelian philosophy the dominant paradigm of the time to the shifting political landscape of Europe and the United States and also to the emerging critique of modernity itself Both individually and collectively these thinkers succeeded in revolutionizing theology philosophy psychology and politics The period also saw the emergence of new schools of thought

and new disciplinary thinking The volume covers the birth of sociology and the social sciences the development of French spiritualism the beginning of American pragmatism the rise of science and mathematics and the maturation of hermeneutics and phenomenology *The History of Continental Philosophy* Alan D. Schrift, 2013-04-12 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume History of Continental Philosophy will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant's philosophy and its initial reception the History traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind A History of Continental Philosophy has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition Featuring helpful overviews of major topics and plotting road maps to their underlying contexts A History of Continental Philosophy is destined to be the resource of first and last resort for students and scholars alike **The Urban Working Class in Britain, 1830-1914 Vol 3** Andrew August, 2021-12-16 This four volume primary resource collection is the most comprehensive of its kind and includes a multitude of sources that allows the user to chart the squalor the noise the conflict the aspiration and the diversity of the working class experience up to the outbreak of the First World War *Guide to Reprints*, 2008 *Guide to Reprints*, 2003 K G Saur Books, 2002-10 *The Cambridge History of the Book in Britain: Volume 6, 1830-1914* David McKitterick, 2009-03-05 The years 1830 1914 witnessed a revolution in the manufacture and use of books as great as that in the fifteenth century Using new technology in printing paper making and binding publishers worked with authors and illustrators to meet ever growing and more varied demands from a population seeking books at all price levels The essays by leading book historians in this volume show how books became cheap how publishers used the magazine and newspaper markets to extend their influence and how book ownership became universal for the first time The fullest account ever published of the nineteenth century revolution in printing publishing and bookselling this volume brings The Cambridge History of the Book in Britain up to a point when the world of books took on a recognisably modern form *Guide to Reprints 2002* Irene Izod, 2001-10 *Science and Method* Henri Poincaré, 1999-01-01 The philosophy of science as it is

known today emerged out of a combination of three traditional concerns the classification of the sciences methodology and the philosophy of nature Included in the series Works in the Philosophy of Science 1830 1914 are all three of these interrelated areas The titles should be of interest to both the philosopher of science and to the historian of ideas The former will be able to trace present day concerns back to their origins the latter should find it a useful source for the study of Victorian conceptions of science Henri Poincare here deals with a variety of issues of methodology the selection of facts for study the calculation of errors and the use of statistical methods to compensate for errors It also contains an attack on logicism in the foundations of mathematics and an early account of the significance for methodology of the new mechanics of radioactive decay

Science Talk Daniel Patrick Thurs, 2007-07-24 Science news is met by the public with a mixture of fascination and disengagement On the one hand Americans are inflamed by topics ranging from the question of whether or not Pluto is a planet to the ethics of stem cell research But the complexity of scientific research can also be confusing and overwhelming causing many to divert their attentions elsewhere and leave science to the experts Whether they follow science news closely or not Americans take for granted that discoveries in the sciences are occurring constantly Few however stop to consider how these advances and the debates they sometimes lead to contribute to the changing definition of the term science itself Going beyond the issue centered debates Daniel Patrick Thurs examines what these controversies say about how we understand science now and in the future Drawing on his analysis of magazines newspapers journals and other forms of public discourse Thurs describes how science originally used as a synonym for general knowledge became a term to distinguish particular subjects as elite forms of study accessible only to the highly educated
