Scientific Blacksmith Technology And Society:

Pastoralism and Socio-technological Transformations in Northern Benin Georges Djohy, 2017 Pastoralists throughout Africa face increasing pressures. In Benin, governmental development policies and programmes in crop farming are changing power relations between herders and farmers to favour the latter. How are the Fulani pastoralists responding to these threats to their existence? Georges Djohy explores the dynamics in local use of natural resources and in inter-ethnic relations resulting from development interventions. He combines the approaches of science and technology studies looking at the co-construction of society and technology and political ecology looking at the power relations shaping the dynamics of economic, environmental and social change so as to throw light on the forces of marginalisation, adaptation and innovation at work in northern Benin. Having worked there for many years, Djohy has been able to uncover gradual processes of socio-technological change that are happening behind the scenes of agricultural development involving mechanisation, herbicide use, tree planting, land registration and natural resource conservation. He reveals how farmers are using these interventions as weapons in order to gain more rights over larger areas of land, in other words to support indigenous land grabbing from herders who had been using the land since decades for grazing. He documents how the Fulani are innovating to ensure their survival, e.g. by using new technologies for transport and communication, developing new strategies of livestock feeding and herd movement and developing complementary sources of household income. The Fulani are organising themselves from local to national level to provide technological and socio-cultural services, manage conflicts and gain a stronger political voice, e.g. to be able to achieve demarcation of corridors for moving livestock through cultivated areas. They even use non-functioning mini-dairies, another example of development intervention to demonstrate their modernity and to open up other opportunities to transform their pastoral systems. This book provides insights into normally hidden technical and social dynamics that are unexpected outcomes of development interventions.

Handbook of Research on Theoretical Perspectives on Indigenous Knowledge Systems in Developing Countries Ngulube, Patrick, 2016-09-12 There has been a growth in the use, acceptance and popularity of indigenous knowledge. High rates of poverty and a widening economic divide is threatening the accessibility to western scientific knowledge in the developing world where many indigenous people live. Consequently, indigenous knowledge has become a potential source for sustainable development in the developing world. The Handbook of Research on Theoretical Perspectives on Indigenous Knowledge Systems in Developing Countries presents interdisciplinary research on knowledge management, sharing and transfer among indigenous communities. Providing a unique perspective on alternative knowledge systems, this publication is a critical resource for sociologists, anthropologists, researchers and graduate-level students in a variety of fields.

Can Emerging Technologies Make a Difference in Development? Rachel A. Parker, Richard P. Appelbaum, 2013-02-28 In this innovative and entirely original text, which has been thoughtfully edited to ensure coherence and readability across disciplines, scientists and practitioners from around the world provide evidence of

the opportunities for and the challenges of developing collaborative approaches to bringing advanced and emerging technology to poor communities in developing countries in a responsible and sustainable manner This volume will stimulate and satisfy readers seeking to engage in a rich and challenging discussion integrating many strands of social thought and physical science For those also seeking to creatively engage in the great challenges of our times for the benefit of struggling farmers sick children and people literally living in the dark around the world may this volume also spark imagination inspire commitment and provoke collaborative problem solving *Science And Technology* Robert Evenson, Gustav Ranis, 2019-06-26 This book presents several general theoretical notions about the process of science and technology as it relates to development It develops the international dimension of science and technology in terms of the international exchange processes and the appropriateness and modification of technology *The Projected and Prophetic: Humanity in Cyberspace, Cyberspace, and Science Fiction* Jordan J. Copeland, 2020-03-31 This volume was first published by Inter Disciplinary Press in 2011 The papers collected in this volume document the exchange and development of ideas that comprised the 5th Global Conference on Visions of Humanity in Cyberspace Cyberspace and Science Fiction hosted at Mansfield College Oxford United Kingdom in July 2010 As in the past the conference was driven by questions related to how cyberspace cyberspace and science fiction can provide new insights into the nature of what it is to be human and the understanding of what it means for human beings to live in communities In addition to these recurring themes there is just as importantly a disposition that is shared by those participating in this volume The authors as well the writers thinkers and filmmakers they consider in their essays demonstrate an intrepid and inquisitive approach that tests age old questions within the rapidly expanding but still vaguely defined spaces that new technologies have afforded us Moreover in many ways the conference and present volume reflect their subject which has always been situated self consciously and comfortably between the receding boundaries that have traditionally served both to delineate various academic disciplines and to distinguish real scholarship from popular discourse Thus as evidenced in the chapters of this volume the conference benefited from the participation of delegates who represented a variety of fields methodologies and perspectives
