How Scientific Instruments Speak Bas de Boer, 2021-01-14 Science is highly dependent on technologies to observe scientific objects For example astronomers need telescopes to observe planetary movements and cognitive neuroscience depends on brain imaging technologies to investigate human cognition But how do such technologies shape scientific practice and how do new scientific objects come into being when new technologies are used in science In How Scientific Instruments Speak Bas de Boer develops a philosophical account of how technologies shape the reality that scientists study arguing that we should understand scientific instruments as mediating technologies Rather than mute tools serving pre existing human goals scientific instruments play an active role in shaping scientific work De Boer uses this account to discuss how brain imaging and stimulation technologies mediate the way in which cognitive neuroscientists investigate human cognitive functions The development of cognitive neuroscience runs parallel with the development of advanced brain imaging technologies drawing a lot of public attention sometimes called neurohype because of its alleged capacity to demystify the human mind By analyzing how the objects that cognitive neuroscientists study are mediated by brain imaging technologies de Boer explicates the processes by which human cognition is investigated

How Scientific Instruments Have Changed Hands, 2016-09-12 This collection of essays discusses the marketing of scientific and medical instruments from the eighteenth century to the First World War The evidence presented here is derived from sources as diverse as contemporary trade literature through newspaper advertisements to rarely surviving inventories and from the instruments themselves The picture may not yet be complete but it has been acknowledged that it is more complex than sketched out twenty five or even fifty years ago Here is a collection of case studies from the United Kingdom the Americas and Europe showing instruments moving from maker to market place and to some extent what happened next Contributors are Alexi Baker Paolo Brenni Laura Ch zaro Gloria Clifton Peggy Aldrich Kidwell Richard L Kremer A D Morrison Low Joshua Nall Sara J Schechner and Liba Taub

Early American Scientific Instruments and Their Makers Silvio A. Bedini, 2019-11-22 In Early American Scientific Instruments and Their Makers Silvio A. Bedini meticulously explores the intricate relationship between science and craftsmanship during America s formative years This compelling study delves into the evolution of scientific tools and devices highlighting the innovations and practical applications that characterized early American scientific advancement With a literary style that expertly blends historical narrative with detailed descriptions Bedini situates this work within the broader context of American intellectual history

presenting a vivid portrait of the makers who contributed to the country's scientific landscape Silvio A Bedini a noted historian and curator draws from a wealth of knowledge accumulated during his tenure at the Smithsonian Institution where he dedicated himself to the preservation and study of scientific instruments His passion for this niche area of history can be attributed to his belief in the significance of these tools as artifacts of human ingenuity and inquiry In addition Bedini's extensive research into various craftsmen and their contributions offers readers a nuanced understanding of the cultural and technological milieu of the time Early American Scientific Instruments and Their Makers is an essential read for scholars collectors and enthusiasts alike offering profound insights into the ingenuity of early American science Whether you are a historian seeking a deeper understanding of America's technological past or simply curious about the evolution of scientific tools Bedini's work is both informative and engaging inviting you to appreciate the legacy of these remarkable creators

Making Scientific Instruments in the Industrial Revolution A.D. Morrison-Low, 2017-03-02 At the start of the Industrial Revolution it appeared that most scientific instruments were made and sold in London but by the time of the Great Exhibition in 1851 a number of provincial firms had the self confidence to exhibit their products in London to an international audience How had this change come about and why This book looks at the four main and two lesser English centres known for instrument production outside the capital Birmingham Liverpool Manchester and Sheffield along with the older population centres in Bristol and York Making wide use of new sources Dr Morrison Low curator of history of science at the National Museums of Scotland charts the growth of these centres and provides a characterisation of their products New information is provided on aspects of the trade especially marketing techniques sources of materials tools and customer relationships From contemporary evidence she argues that the principal output of the provincial trade with some notable exceptions must have been into the London marketplace anonymously and at the cheaper end of the market She also discusses the structure and organization of the provincial trade and looks at the impact of new technology imported from

other closely allied trades By virtue of its approach and subject matter the book considers aspects of economic and business history gender and the family the history of science and technology material culture and patterns of migration It contains a myriad of stories of families and firms of entrepreneurs and customers and of organizations and arms of government In bringing together this wide range of interests Dr Morrison Low enables us to appreciate how central the making selling and distribution of scientific instruments was for the Industrial Revolution **Scientific Instruments on Display**, 2014-08-14

During their active lives scientific instruments generally inhabit the laboratory observatory classroom or the field But instruments have also lived in a wider set of venues as objects on display As such they acquire new levels of meaning their cultural functions expand This book offers selected studies of instruments on display in museums national fairs universal exhibitions patent offices book frontispieces theatrical stages movie sets and on line collections The authors argue that these displays as they have changed with time reflect changing social attitudes towards the objects themselves and toward science and its heritage By bringing display to the center of analysis the collection offers a new and ambitious framework for the study of scientific instruments and the material culture of science Contributors are Amy Ackenberg Hastings Silke Ackermann Marco Beretta Laurence Bobis Alison Boyle Fausto Casi Ileana Chinnici Suzanne D barbat Richard Dunn Inga Elmqvist S derlund Ingrid Jendrzejewski Peggy A Kidwell Richard Kremer Mara Miniati Richard A Paselk Donata Randazzo Steven Turner **Irish National Inventory of Historic Scientific Instruments** Charles Mollan, 1995-11-15 Carried out

over a period of ten years this is a listing of scientific instruments dating before 1920 preserved in many collections throughout the island of Ireland It gives location date and description for each of the more than 5 000 entries together where appropriate with relevant accompanying detail It demonstrates clearly that Ireland has an important resource which hitherto had not been appreciated It also preserves information about collections which have since been lost sold or otherwise dispersed **Scientific Instruments between East and West**, 2019-09-02 Scientific Instruments between East and West

is a collection of essays on aspects of the transmission of knowledge about scientific instruments and the trade in such instruments between the Eastern and Western worlds particularly from Europe to the Ottoman Empire The contributors from a variety of countries draw on original Arabic and Ottoman Turkish manuscripts and other archival sources and publications dating from the fifteenth to the twentieth centuries not previously studied for their relevance to the history of scientific instruments This little studied topic in the history of science was the subject of the 35th Scientific Instrument Symposium held in Istanbul in September 2016 where the original versions of these essays were delivered Contributors are Mahdi Abdeljaouad Pierre Ageron Hamid Bohloul Patrice Bret Gaye Dan an Feza G nergun Meltem Kocaman Richard L Kremer Janet Laidla Panagiotis Lazos David Pantalony Atilla Polat Bernd Scholze Konstantinos Skordoulis Seyyed Hadi Tabatabaei Anthony Turner Hasan Umut and George Vlahakis See inside the book here [European Collections of Scientific](#)

Returning to Scientific Practice Xu Zhu, Wu Tong, 2019-05-17 This book is a result from a collective study on philosophy of scientific practice PSP which began around 2002 and still ongoing There is an apparently increasing interest in scientific practice influenced by the historicistic philosophy of science and the sociology of scientific knowledge SSK Prof WU Tong and his research group believe that it is

necessary for PSP to turn from the theory dominant position to the practice dominance PSP has also put forward the possibility of reinterpreting the epistemic status of local knowledge in Chinese tradition which provides the most significant motivation to participate this study In this book we have selected three main cases namely Chinese medicine Fengshui and Ethnobotany to examine the effect of PSP The aim of our collective study is not merely on theoretical construction of PSP but also to consider the various applications of PSP especially for re interpreting and demonstrating the variety of local knowledge from traditional China which seems to be a genuine contribution to the international enterprise of philosophy of science particularly made by Chinese scholars
