Scientific Instruments: how to Build and Use Them Sam Epstein,1970 **Building iPhone and iPad Electronic Projects** Mike Westerfield,2013-09-11 Why simply play music or go online when you can use your iPhone or iPad for some really fun projects such as building a metal detector hacking a radio control truck or tracking a model rocket in flight Learn how to build these and other cool things by using iOS device sensors and inexpensive hardware such as Arduino and a Bluetooth Low Energy LE Shield This hands on book shows you how to write simple applications with techBASIC an Apple approved development environment that runs on iOS devices By using code and example programs built into techBASIC you ll learn how to write apps directly on your Apple device and have it interact with other hardware Build a metal detector with the iOS magnetometer Use the HiJack hardware platform to create a plant moisture sensor Put your iPhone on a small rocket to collect acceleration and rotation data Hack a radio control truck with Arduino and Bluetooth LE Create an arcade game with an iPad controller and two iPhone paddles Control a candy machine with an iOS device a micro servo and a WiFi connection **I & EC** ,1925 **Background Readings on Science, Technology, and Energy R. & D. in Japan and China** ,1981 **Building** ,1904 *Understanding the Universe* George Greenstein,2013-02-18 A student active introduction to astronomy emphasizing inquiry learning so students will clearly understand our universe and the scientific method Within text and end of chapter questions check understanding of concepts and require the student to think critically through astronomy based problems Nature of Science and Detectives on the Case sections in each chapter encourage students to take on the role of a scientist and so develop an understanding of how scientific progress is made leading students through a chain of arguments of forming and testing hypotheses in the context of specific astronomical topics By focusing on key topics the student is able to develop a deeper understanding of the core areas of astronomy Math is used to make intuitive points and kept simple by using a two track system to first describe the logic of the calculation followed by a more detailed example Simple illustrations support the text and step students through concepts visually **Leading Continuous Improvement in Schools** Erin Anderson,Kathleen M. W. Cunningham,David H. Eddy-Spicer,2023-10-31 This volume provides a set of principles and systematic methods for improvement to help district and school leaders achieve the continuous improvement goals embedded in the Professional Standard for Educational Leadership PSEL and the National Educational Leadership Program NELP standards Bringing the PSEL Standard 10 to life this book tackles the why how and what of continuous improvement through an equity lens In the first section Leading Continuous Improvement in Schools provides an overall introduction to and rationale for continuous improvement situating current approaches to continuous improvement situating current approaches to continuous improvement in education within broader historical and sectoral

contexts The second section highlights how the tenets of improvement science such as making iterative incremental evidence based advancements utilizing practical measurements and acknowledging variability position school and system leaders to adaptively integrate systematic and evidence based approaches to change as part of ongoing organizational processes The book concludes with a section that invites readers to consider leadership approaches that forward improvement work how leaders can build internal capacity to engage in improvement and how policy can support efforts to build and sustain the capacity for continuous improvement Special features include beginning of chapter highlights end of chapter connections to standards and action inventories through each chapter Overall the volume provides a focus on the continuous improvement aspects of the NELP and PSEL standards that serves as a bridge supporting students preparing to become educational leaders in their journey from learning about continuous improvement to learning how to lead continuous equity oriented improvement work in their own contexts Biomimetic Research for Architecture and Building Construction Jan

Knippers,Klaus G. Nickel,Thomas Speck,2016-12-19 This book comprises a first survey of the Collaborative Research Center SFB TRR 141 Biological Design and Integrative Structures Analysis Simulation and Implementation in Architecture funded by the Deutsche Forschungsgemeinschaft since October 2014 The SFB TRR 141 provides a collaborative framework for architects and engineers from the University of Stuttgart biologists and physicists from the University of Freiburg and geoscientists and evolutionary biologists from the University of Tübingen The program is conceptualized as a dialogue between the disciplines and is based on the belief that that biomimetic research has the potential to lead everyone involved to new findings far beyond his individual reach During the last few decades computational methods have been introduced into all fields of science and technology In architecture they enable the geometric differentiation of building components and allow the fabrication of porous or fibre based materials with locally adjusted physical and chemical properties Recent developments in simulation technologies focus on multi scale models and the interplay of mechanical phenomena at various hierarchical levels In the natural sciences a multitude of quantitative methods covering diverse hierarchical levels have been introduced These advances in computational methods have opened a new era in biomimetics local differentiation at various scales the main feature of natural constructions can for the first time not only be analysed but to a certain extent also be transferred to building construction Computational methodologies enable the direct exchange of information between fields of science that until now have been widely separated As a result they lead to a new approach to biomimetic research which hopefully contributes to a more sustainable development in architecture and building construction A History of Science
