Science of God Kevin J. Sharpe,2006 Is theology responsible to tradition or new insight Institutional church or humanity at large Spiritual or everyday existence Revelation or scientific findings In his new book Science of God Truth in the Age of Science Kevin Sharpe proposes a method for doing theology which does not divorce it from the practical applications of science Not only does this work establish that theology ought to be empirical in what it says about the world and God s relationship to it but it also outlines a clear method for doing this Science and theology can each share the same empirical method when each attempts a description of any part of reality it is relying on its own essential assumptions or lens When applied to theology the method assumes the existence of God and then seeks the nature of God using falsifiable and verifiable techniques Starting with the sciences that examine happiness particularly biology genetics psychology and social psychology Science of God seeks to understand the spiritual nature of humans and through it the nature of God *Advances in Scientific Philosophy* ,2023-06-26 The Merging of Theology and Spirituality Larry S. McDonald,2006-07-29 While acknowledging the inherent tension between evangelicals who emphasize theological propositions and those who emphasize personal experience Alister McGrath believes that spirituality represents the interface between ideas and life between Christian theology and human existence The book explores the centrality of McGrath s theology in the development of his views on spirituality McGrath does not approach spirituality from a theological void but instead uses his theological perspective as the foundation Through detailed examination of McGrath s previous work and the writing of other evangelicals The Merging of Theology and Spirituality offers an overview of a unique thinker s contributions and a guide for future theological and spiritual exploration
