*Proceedings of the EU preparatory meeting of the Third world congress for freedom of scientific research - "From the body to the body politic" (2013)* Associazione Luca Coscioni per la libertà di ricerca scientifica, 2014-03-04 For nearly ten years now Luca Coscioni Association through and together with the World Congress has been fighting for freedom of scientific research The World Congress is not a place of mere convention and intellectual debate it is also the seat of political initiative where scientists researchers politicians sick and disabled people and citizens can work together to address complex issues such as patentability Open Access and clinical trials as well as the relationship between science and religion or between science and politics Marco Pannella leader of the Nonviolent Radical Party is to thank for providing the idea for this scheme It was put together in the weeks when we were beginning to organize a referendum in Italy to abolish the law banning scientific research on embryos This was not just an Italian issue but a global one At that

moment in history we spoke of the danger and threat of all types of fundamentalism whether religious or ideological which were opposed to science and to freedom of research The aim of the meeting that was held in November 14 15 2013 in Brussels is to identify the urgent need for freedom of research and freedom in the broader more general sense This is not to insist so much on the importance of science research human well being but also to respond or to find another possible answer to the problem of the crisis of democracy and the rule of law

*Biopolymer-Based Nanomaterials in Drug Delivery and Biomedical Applications* Hriday Bera, Chowdhury Mobaswar Hossain, Sudipta Saha, 2021-01-05 Over the past few decades there has been unprecedented progress in the design of versatile biopolymer based nanoplatfroms for pharmaceutical and biomedical applications particularly due to their attractive traits including excellent biocompatibility outstanding biodegradability low immunogenicity and facile chemical modifiability Biopolymer Based Nanomaterials in Drug Delivery and Biomedical Applications serves as a clear and detailed body of information on the synthesis and characterization of biopolymer based materials in nanomedicine This book describes various nanomaterials consisting of biopolymers including polysaccharides i e derived from plants animals bacteria algae and fungi and polypeptides in terms of their structures synthetic protocols and characterization and uses as therapeutic drugs and gene delivery carriers and in other biomedical fields The chapters of this book which are contributed by internationally renowned scholars working in the arena of biopolymer based nanomaterials would offer a wide vision on the potential future applications of these nanomaterials in the delivery and targeting of bioactive molecules of pharmaceutical interests and in tissue engineering biosensing bioimaging and diagnostic purposes The state of the art information presented in the book would also encourage young investigators and researchers to further bring cutting edge developments in the field of nanomedicine in the near future Provides a scholarly insight into the recent development of biopolymer based nanomaterials Focuses on the diverse cutting edge techniques for the fabrication of native and modified biopolymer based nanoplatfroms and their applications in drug delivery and biomedical fields Assesses the opportunities and challenges of biopolymer based nanocarriers in pharmaceutical and biomedical research

*The implementation of the ecosystem approach to fisheries management in Gökçeada, Turkey* Ünal, V., Tosunoğlu, Z., Tırnakçı, E.M., Vasconcellos, M., 2022-04-07 Gökçeada is Turkey's largest island and acts as a natural center for the transition points of migrating fish located at the entrance of Saros Bay and at a point where the Marmara Sea and the North Aegean waters meet The banks surrounding Gökçeada create rich fishing beds It also hosts Turkey's only marine park established in 1999 A lack of stock assessments as well as co management has impeded fisheries management capabilities in the region This document presents a first baseline report on the fisheries of Gökçeada to facilitate its transition to incorporating the principles of an ecosystem approach to fisheries management This report was prepared as part of the project Transition to Ecosystem Approach to Fisheries Management and Designing a Management Plan in Gökçeada Turkey carried out in cooperation with the Ministry of Agriculture and Forestry and managed by Ege University with the

participation of many other stakeholders and financed by the FAO EastMed Project The first part of the report presents information on the fisheries and the second section presents threats to the sustainability of fishing A review of all existing relevant data was completed in addition to fisher interviews performed in 2020 to properly understand the current state of the fisheries and threats affecting sustainability The baseline report is the first step towards the preparation of a management plan for fisheries in G k eada The success of this initiative requires the joint willingness and determination of all stakeholders especially from the official institutions and the fishery cooperative

14 Protein Phosphorylation in Health and Disease Allegra Via, Andreas Zanzoni, 2016-08-11 Protein phosphorylation is one of the most abundant reversible post translational modifications in eukaryotes It is involved in virtually all cellular processes by regulating protein function localization and stability and by mediating protein protein interactions Furthermore aberrant protein phosphorylation is implicated in the onset and progression of human diseases such as cancer and neurodegenerative disorders In the last years tens of thousands of in vivo phosphorylation events have been identified by large scale quantitative phospho proteomics experiment suggesting that a large fraction of the proteome might be regulated by phosphorylation This data explosion is increasingly enabling the development of computational approaches often combined with experimental validation aiming at prioritizing phosphosites and assessing their functional relevance Some computational approaches also address the inference of specificity determinants of protein kinases phosphatases and the identification of phosphoresidue recognition domains In this context several challenging issues are still open regarding phosphorylation including a better understanding of the interplay between phosphorylation and allosteric regulation agents and mechanisms disrupting or promoting abnormal phosphorylation in diseases the identification and modulation of novel phosphorylation inhibitors and so forth Furthermore the determinants of kinase and phosphatase recognition and binding specificity are still unknown in several cases as well as the impact of disease mutations on phosphorylation mediated signaling The articles included in this Research Topic illustrate the very diverse aspects of phosphorylation ranging from structural changes induced by phosphorylation to the peculiarities of phosphosite evolution Some also provide a glimpse into the huge complexity of phosphorylation networks and pathways in health and disease and underscore that a deeper knowledge of such processes is essential to identify disease biomarkers on one hand and design more effective therapeutic strategies on the other

 Hazards** Markus Stoffel, Michelle Bollschweiler, David R. Butler, Brian H. Luckman, 2010-07-15 Dendrogeomorphology  
 Beginnings and Futures A Personal Reminiscence My early forays into dendrogeomorphology occurred long before I even  
 knew what that word meant I was working as a young geoscientist in the 1960s and early 1970s on a problem with slope  
 movements and deformed vegetation At the same time unknown to me Jouko Alestalo in Finland was doing something similar  
 Both of us had seen that trees which produced annual growth rings were reacting to geomorphic processes resulting in  
 changes in their internal and external growth patterns Dendroclimatology was an already well established field but the  
 reactions of trees to other environmental processes were far less well understood in the 1960s It was Alestalo 1971 who first  
 used the term dendrogeomorphology In the early 1970s I could see that active slope movement processes were affecting the  
 growth of trees in diverse ways at certain localities I wanted to learn more about those processes and try to extract a long  
 term chronology of movement from the highly diverse ring patterns
