**Edward Bancroft** Thomas J. Schaeper, 2011-03-29 A man of as many names as motives Edward Bancroft is a singular figure in the history of Revolutionary America Born in Massachusetts in 1745 Bancroft moved to England as a young man in the 1760s and began building a respectable resume as both a scientist and a man of letters In recognition of his works in natural history Bancroft was unanimously elected to the Royal Society and while working to secure French aid for the American Revolution he became a close associate of such luminaries as Benjamin Franklin Silas Deane and John Adams Though lauded in his time as a staunch American patriot when the British diplomatic archives were opened in the late nineteenth century it was revealed that Bancroft led a secret life as a British agent acting against French and American interests In this book the first complete biography of Bancroft historian Thomas J Schaeper reveals the full extent of the agent's deception during the crucial years of the American Revolution Operating under aliases

working in ciphers and leaving coded messages in the trees of Paris's Tuileries Gardens Bancroft filtered information from unsuspecting figures including Franklin and Deane back to his contacts in Britain navigating a complicated web of political allegiances Through Schaeper's keen analysis of Bancroft's correspondence and diplomatic records this biography reveals whether Bancroft should ultimately be considered a traitor to America or a patriot to Britain

**Elegance in Science** Ian Glynn, 2013-02-14 The idea of elegance in science is not necessarily a familiar one but it is an important one The use of the term is perhaps most clear cut in mathematics the elegant proof and this is where Ian Glynn begins his exploration Scientists often share a sense of admiration and excitement on hearing of an elegant solution to a problem an elegant theory or an elegant experiment The idea of elegance may seem strange in a field of endeavour that prides itself in its objectivity but only if science is regarded as a dull dry activity of counting and measuring It is of course far more than that and elegance is a

fundamental aspect of the beauty and imagination involved in scientific activity Ian Glynn a distinguished scientist selects historical examples from a range of sciences to draw out the principles of science including Kepler's Laws the experiments that demonstrated the nature of heat and the action of nerves and of course the several extraordinary episodes that led to Watson and Crick's discovery of the structure of DNA With a highly readable selection of inspiring episodes highlighting the role of beauty and simplicity in the sciences the book also relates to important philosophical issues of inference and Glynn ends by warning us not to rely on beauty and simplicity alone even the most elegant explanation can be wrong

**The Heat Will Kill You First** Jeff Goodell, 2023-07-11 New York Times best selling journalist Jeff Goodell presents a masterful bracing David Wallace Wells examination of the impact that temperature rise will have on our lives and on our planet offering a vital new perspective on where we are headed how we can prepare and what is at stake if we fail to act When heat comes it's invisible It doesn't bend tree branches or blow hair across your face to let you know it's arrived The sun feels like the barrel of a gun pointed at you The world is waking up to a new reality wildfires are now seasonal in California the Northeast is getting less and less snow each winter and the ice sheets in the Arctic and Antarctica are melting fast Heat is the first order threat that drives all other impacts of the climate crisis And as the temperature rises it is revealing fault lines in our governments our politics our economy and our values The basic science is not complicated Stop burning fossil fuels tomorrow and the global temperature will stop rising tomorrow Stop burning fossil fuels in 50 years and the temperature will keep rising for 50 years making parts of our planet virtually uninhabitable It's up to us The hotter it gets the deeper and wider our fault lines will open The Heat Will Kill You First is about the extreme ways in which our planet is already changing It is about why spring is coming a few weeks earlier and fall is coming a few weeks later and the impact that will have on everything from our food supply to disease outbreaks It is about what will happen to our lives and our communities when typical summer days in Chicago or Boston go from 90 F to 110 F A heatwave Goodell explains is a predatory event one that culls out the most vulnerable people But that is changing As heatwaves become more intense and more common they will become more democratic As an award winning journalist who has been at the forefront of environmental journalism for decades Goodell's new book may be his most provocative yet explaining how extreme heat will dramatically change the world as we know it Masterfully reported mixing the latest scientific insight with on the ground storytelling Jeff Goodell tackles the big questions and uncovers how extreme heat is a force beyond anything we have reckoned with before

The Riddle of the Rosetta Jed Z. Buchwald, Diane Greco Josefowicz, 2022-05-24 A major new history of the race between two geniuses to decipher ancient Egyptian hieroglyphs set against the backdrop of nineteenth century Europe In 1799 a French Army officer was rebuilding the defenses of a fort on the banks of the Nile when he discovered an ancient stele fragment bearing a decree inscribed in three different scripts So begins one of the most familiar tales in Egyptology that of the Rosetta Stone and the decipherment of Egyptian hieroglyphs This book draws on fresh archival evidence to provide a major new account of how the

English polymath Thomas Young and the French philologist Jean François Champollion vied to be the first to solve the riddle of the Rosetta. Jed Buchwald and Diane Greco Josefowicz bring to life a bygone age of intellectual adventure. Much more than a decoding exercise centered on a single artifact, the race to decipher the Rosetta Stone reflected broader disputes about language, historical evidence, biblical truth, and the value of classical learning. Buchwald and Josefowicz paint compelling portraits of Young and Champollion, two gifted intellects with altogether different motivations. Young disdained Egyptian culture and saw Egyptian writing as a means to greater knowledge about Greco-Roman antiquity. Champollion swept up in the political chaos of Restoration France and fiercely opposed to the scholars aligned with throne and altar, admired ancient Egypt and was prepared to upend conventional wisdom to solve the mystery of the hieroglyphs. Taking readers from the hushed lecture rooms of the Institut de France to the windswept monuments of the Valley of the Kings, *The Riddle of the Rosetta* reveals the untold story behind one of the nineteenth century's most thrilling discoveries. **Nurture** Richard Hosking, 2004. Proceedings of the 2003 Oxford Symposium on the subject of nurture in the context of food and cooking.

**Energy, the Subtle Concept** Jennifer Coopersmith, 2015. This book explains the idea of energy by tracing the story of its discovery from Galileo through to Einstein. It explains the physics using the minimum of mathematics, presenting both a gripping historical narrative and a fascinating introduction to an elusive physical concept. *Good Morning Captain!: A Fictional Biography* Doug Burgum, 2015-03-30. Now he spends his days in Spain, cared for by a kind nurse. With Maria's gentle encouragement, Alex reflects on a life well lived. As he leads Maria through his family history, his childhood antics in England, and his journey to become a pilot, he struggles to work through his jumbled memories that eventually reveal the fascinating details of his near-death experience, world travels, and adventures and romantic encounters. *Good Morning Captain* is a fictionalized biography of one man's journey through his life as he recalls memories of glamour, romance, and the rewards of flying commercial aircraft to his beloved nurse.
