Juxtaposition Piers Anthony,2012-02-14 In this brilliantly satisfying conclusion to the epic adventure begun in Split Infinity and continued in Blue Adept Piers Anthony again proves himself a consummate master of both science fiction and fantasy Stile had problems two whole worlds of problems in fact On Proton a world of future science his murder was averted only by the help of a lovely robot who sent him through an invisible curtain to Phaze an alternate world ruled by magic There he found he was the double of the sorcerer the Blue Adept who had been mysteriously murdered And the assassin was after Stile To survive Stile had to master magic fight a dragon win the friendship of a lady unicorn locate his enemy among the paranoid Adepts and return out of Phaze to win the Great Games on Proton After that he was ready to face the real problems The infallible Oracle was suddenly involved in the conspiracy against him The two worlds were out of balance and heading for disaster Stile was somehow supposed to take over the job of saving them or go down to total destruction with all he loved he had to act and act quickly with no idea of what he was supposed to do *Planesrunner* Ian McDonald,2018-02-21 There is not one you There are many yous There is not one world There are many worlds Ours is one among billions of parallel earths When Everett Singh s scientist father is kidnapped from the streets of London he leaves young Everett a mysterious app on his computer the Infundibulum the map of all the parallel earths the most valuable object in the multiverse There are dark forces in the Plenitude of Known Worlds who will stop at nothing to get it They ve got power authority the might of ten planets some of them more technologically advanced than our Earth at their fingertips He s got wits intelligence and a knack for Indian cooking Everett must trick his way through the Heisenberg Gate that his dad helped build and go on the run in a parallel Earth But to rescue his dad from Charlotte Villiers and the sinister Order this Planesrunner s going to need friends Friends like Captain Anastasia Sixsmyth her adopted daughter Sen and the crew of the airship Everness Can they rescue Everett s father and get the Infundibulum to safety The game is afoot Praise for Planesrunner PLANESRUNNER is chock full

of awesome Ian McDonald's steampunk London blazes on a vast scale with eye popping towers gritty streets and larger than life characters who aren't afraid to fight for each other The kind of airship dueling guns blazing fantasy that makes me wish I could pop through to the next reality over join the Airish and take to the skies Paolo Bacigalupi Science fiction rules in this stellar series opener about a boy who travels to parallel universes What joy to find science fiction based on real scientific concepts Shining imagination pulsing suspense and sparkling writing make this one stand out Kirkus Starred Review McDonald writes with scientific and literary sophistication as well as a wicked sense of humor Add nonstop action eccentric characters and expert universe building and this first volume of the Everness series is a winner Publishers Weekly

Empress of the Sun Ian McDonald, 2018-02-21 The airship Everness makes a Heisenberg Jump to an alternate Earth unlike any her crew has ever seen Everett Sen and the crew find themselves above a plain that goes on forever in every direction without any horizon They've arrived on an Alderson Disc an astronomical megastructure of incredibly strong material reaching from the orbit of Mercury to the orbit of Jupiter Who could have built such a thing The Jiju the dominant species on a plane where the dinosaurs didn't die out They evolved diversified and have a twenty five million year technology head start on humanity If they ever get off their plane and into the worlds of the Plenitude Everness has jumped right into the midst of a faction fight between rival nations but can anyone be safe among the warring Jiju and what is the price of their help The crew of the Everness is divided in a very alien world a world fast approaching the point of apocalypse And back in the Plenitude of Known Worlds Charlotte Villiers gathers allies and works her way deep into the corridors of power Praise for *Empress of the Sun* YA or not the Everness series may be the most enjoyable ongoing series that SF currently has to offer Locus The marvelous Everness series takes readers to a world with highly evolved dinosaurs in this third voyage through parallel universes McDonald lets his imagination run rampant without abandoning credibility tackling real scientific concepts such as confirmation bias a feature lacking in far too much science fiction Endlessly fascinating and fun Kirkus Starred Review With strong characters covering all ages and genders fine action sequences and enough cool SF concepts that could fill a volume twice its size *EMPRESS OF THE SUN* is an excellent entry in one of my favorite SF series SF Signal

Correspondences Tim Ingold, 2020-10-20 We inhabit a world of more than humans For life to flourish we must listen to the calls this world makes on us and respond with care sensitivity and judgement That is what it means to correspond to join our lives with those of the beings matters and elements with whom and with which we dwell upon the earth In this book anthropologist Tim Ingold corresponds with landscapes and forests oceans and skies monuments and

artworks To each he brings the same spontaneity of thought and observation the same intimacy and lightness of touch but also the same affection longing and care that in the days when we used to write letters by hand we would bring to our correspondences with one another The result is a profound yet accessible inquiry into ways of attending to the world around us into the relation between art and life and into the craft of writing itself At a time of environmental crisis when words so often seem to fail us Ingold points to how the practice of correspondence can help restore our kinship with a stricken earth

Statistical Ecology Anil Gore,S.A. Paranjpe,2013-04-17 As the world enters the new millennium mankind faces a series of new problems many of them created by man himself These include overpopulation air and water pollution global warming accumulation of greenhouse gases damage to the ozone layer and loss of biodiversity Perhaps these problems were around even earlier in an incipient stage but they have now assumed global proportions and are uppermost in the minds of all A natural consequence is enhanced interest in sciences connected with these problems Ecology is a field that is immensely useful in understanding many of them In the seventies nature conservation became a concern of wide sections of society well beyond the small group of expert ecologists Species extinction and depletion of biological resources were seen as major threats to human welfare It was therefore natural for scientists from different disciplines to seek reasons behind these developments We were no exceptions and when opportunity to interact with ecologists as statistical consultants came we found ourselves reading more and more of ecology and evolutionary biology Several years ago we proposed starting of an elective one semester course on statistical ecology for graduate students of statistics of Pune University **Nanoshock** K.
