of specific regions lordships are so poorly understood as to make only preliminary comment possible Equally there is the opportunity to bring together and build upon recent and pending work on several crucial themes including the pre and post Reformation church the Irish Sea World in the later middle ages and kindreds and lordships such as the Campbells Clan Chattan and the MacKenzies To date most attention has been devoted the west particularly the dramatic trajectory of the MacDonald Lordship of the Isles which has generated a clutch of notable studies in the last generation This volume seeks to break out of the straitjacket of the western G idhealtachd and see late medieval Gaelic Scotland as a whole While remaining sensitive to external perceptions and actions and their influence the perspective is firmly rooted within Gaelic Scotland itself As such it seeks to see the region in its own terms rather than as the problem of another to investigate more critically a political process which superficial and external analysis could all too readily characterise as a wearisome continuum of feuds forays and rebellions The book is organised in thematic chapters dealing with society politics economic life religion and belief culture and identity Each of these is structured chronologically The opening and concluding chapters present and draw together the strands of the story
