expectations of teachers can influence levels of pupils academic attainment the book shows the complexity of interpersonal interaction and perception within the classroom and the nature of problems involved in studying these It also focuses on the way that the mutual perceptions of teachers and pupils themselves affect and are affected by other aspects of life in a school and extensive use is made of research conducted in British schools to illustrate major points The conclusion of the study was that it is the classroom the very environment in which teachers and pupils interact rather than teacher training that may need reform

Clark, Susan Gail Clark, 2005-05-01 The black footed ferret once thought extinct was rediscovered in Wyoming in 1981 In this book Tim Clark tells the story of subsequent efforts to save the black footed ferret showing how it points up the necessity of finding new ways to conserve and restore species According to Clark the problems facing conservation are not fundamentally biological but stem from human systems policy decisions organizational priorities and professional rivalries The focus in conservation he says must shift from science to practical problem solving Clark first describes and analyzes efforts to restore the black footed ferret after 1981 and looks at the processes people institutions and programs that were involved in that endeavor Finding that the ferret case illustrates many things that go wrong in the implementation of complex environmental policy Clark then proposes fresh approaches to endangered species recovery He gives guidelines for improving decisionmaking and development of policies for devising organizational strategies and structures that are more conducive to learning and for a new civic professionalism that will raise the standards for performance and better meet society s needs This policy oriented approach he contends will open up new avenues methods and hope for species recovery A very important work that will be widely read discussed and argued Steven J Bissell Colorado Division of Wildlife A valuable contribution to a general science policy field where clear and sophisticated thinking is rare Garry D Brewer School of Natural Resources and the Environment University of Michigan Ann Arbor
