Educational Reform Legislation in the 20th Century Gary McCulloch, 2018-08-29 Much has been written on Education Acts yet we have abused and neglected them. The history of educational legislation has been written off as Acts and facts and the conventional approach to writing about them has been concerned with politics and especially with the men responsible for them. On the centenary of the 1918 Education Act and Education Scotland Act and the thirtieth anniversary of the 1988 Education Reform Act we can rightly compare them alongside the other two agenda setting master Acts of the 20th century those of 1902 and 1944. These latter Acts themselves landmarks of legislation have each attracted several significant articles that have been published in the British Journal of Educational Studies. Between them these provide a detailed commentary on the key legislation that has framed the development of UK education that is also open to critique and challenge. The anniversaries of these key Education Acts are also starting points for broader discussion of continuities, changes and contestation in legislation involving the regime of power, control and regulation of education. This can also include consideration of the international context and the relationship between educational and other social legislation and reform

Haig and Kitchener in Twentieth-Century Britain Stephen Heathorn, 2016-04-22 Lord Kitchener and Lord Haig are two monumental figures of the First World War. Their reputations both in their lifetimes and after their deaths have been attacked and defended, scrutinized and contested. They have been depicted in film, print and public memorials in Britain and the wider world and new biographies of both men appear to this day. The material representations of Haig and Kitchener were shaped, used and manipulated for official and popular ends by a variety of groups at different times during the twentieth century. The purpose of this study is not to discover the real individual nor to attack or defend their reputations; rather it is an exploration of how both men have been depicted since their deaths and to consider what this tells us about the nature and meaning of First World War commemoration. While Haig's representation was more contested before the Second World War than was Kitchener's with several constituencies trying to fashion and use Haig's memory: the Government, the British Legion, ex-servicemen themselves and bereaved families, it was probably less contested but overwhelmingly more negative than Kitchener's after the Second World War. The book sheds light on the notion of heroic masculinity, questioning in particular the degree to which the image of the common soldier replaced that of the high commander in the popular imagination and explores how the military heritage in the twentieth century came into collision with the culture of modernity. It also contributes to ongoing debates in British historiography and to the larger debates over the social construction of memory, the problematic relation between what is considered heritage and history and the need for historians to be sensitive and attentive to the interconnections between heritage and history and their contexts

Education in the United Kingdom Colin Brock, 2015-01-29 Education in the United Kingdom is a comprehensive critical reference guide to education in England

Scotland Wales Northern Ireland The Isle of Man The Channel Islands Gibraltar The Cayman Islands Bermuda Anguilla and The British Overseas Territories Although generically similar in education structures the various components of the United Kingdom have separate systems with some very distinctive differences The chapters written by regional experts offer a review of contemporary national and regional educational structures and policies research innovation and trends Some of the themes covered include issues relating to the partition of Ireland differences between maintained and independent schooling language issues and radical alternatives in teacher education Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets this book is an essential reference for researchers scholars international agencies and policy makers Education in a Federal UK John Furlong, Ingrid Lunt, 2019-10-23

Britain's two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK It seems that for the first time the public the media and the political elite have woken up to the fact that in different parts of the UK there are different histories different aspirations and different imagined futures in relation to a whole range of vitally important political issues But what the public debate often fails to recognise is that in many areas of public life perhaps especially education the UK is already a federal state and in key respects has been so for many years The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK This has been achieved by commissioning two different papers from each of the four countries Wales Scotland Northern Ireland and England The first is an overview exploring the distinctive history principles and current policies of each country The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country the Foundation Phase for Wales assessment policy in Scotland shared education initiatives in Northern Ireland and higher education policy in England Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today This volume was originally published as a special issue of Oxford Review of Education
