social historians **A History of Scotland** Allan I. MacInnes, 2018-09-27 This illuminating and insightful guide offers a comprehensive overview of Scottish history from the kingdom's genesis in the ninth century to the independence debates of the present day. Considering both internal dynamics and international horizons, Allan MacInnes asserts Scotland's heritage as significant and compelling in its own right rather than reducing it to an offshoot of England's past. Rigorous and wide-ranging, this textbook is an essential companion for undergraduate and postgraduate students of History. Ultimately, it turned out that its potential was much wider than just the city area encompassing existing regional connections. That is why the RRR Concept was created, which assumes the development of regional connections with the center of the region, i.e. Radom. The publication is divided into seven parts so that the reader can better understand the railway infrastructure in Radom. The first three chapters contain information collected by the author as starting material for further analyzes and assumptions. Chapter four presents current solutions used in suburban railways around the world, including in Poland, especially in larger provincial centers. Chapters five and seven present the main assumptions of the Radom Commuter Railway as a project ready for implementation. The fifth part focuses on the role of the city of Radom as the natural center of the region.

Economic Development in Scotland Tim Alers, 2005-05-06 **Inhaltsangabe** Introduction This thesis tries to examine the structures, activities, changes, and spatial impacts of economic development in Scotland. Looking at the Scottish economy, it has to be considered that Scotland is both an integrated part of the UK and the UK economy and a peripheral region within the UK. Therefore, Scotland does not have an economy of its own, but the distinctiveness of the region in terms of location, history, and recent political developments justifies a closer examination of the matter. Scotland is in many aspects a very heterogeneous region. This is in particular true for the economic structure, and a focus on one region cannot be representative. Edinburgh is an exceptionally prosperous region, not only in Scottish terms. However, this prosperity and activity in economic development makes Edinburgh an interesting subject for examination. Thus, the focus of this thesis lies on the developments in Edinburgh. Economic development is certainly influenced by a vast number of factors, and it is impossible to take all of them into account. Within this thesis, the emphasis lies on governmental influence on the developments. However, European development

measures are not considered Accordingly the thesis aims to look at the ways the promotion of economic development is carried out in Scotland and tries to assess the measures on the background of the distinctiveness of Scotland and Edinburgh Thus in the first chapter the thesis takes a look at Scotland as a whole examining the physical environment the administrative framework and its recent changes Furthermore it looks at the economic legacy of the heavy industries and the recent developments in the Scottish economy Subsequently the history and institutions of the promotion of economic development in Britain and Scotland are presented The last part of the first chapter deals with the planning framework in Scotland The second chapter portrays Edinburgh's economic structure The key industries are presented briefly as are the institutions of economic development Afterwards parts of the Edinburgh development plan are examined The third chapter focuses on the Waterfront project in Edinburgh The background of waterfront revitalisation is presented The project and its participants are then examined in some detail Finally a conclusion is drawn on the developments in Edinburgh Inhaltsverzeichnis Table of Contents Abbreviations List of Figures List of
