which proceeded from Abbotsford Though such is not exactly the source which we might expect to give birth to the transition from profitless dilettantism to the intelligent spirit of scientific investigation yet it is unquestionable that Sir Walter Scott was the first of modern writers to teach all men this truth which looks like a truism and yet was as good as unknown to writers of history and others till so taught that the bygone ages of the world were actually filled by living men If however the impulse to the pursuit of Arch ology as a science be thus traceable to our own country neither Scotland nor England can lay claim to the merit of having been the first to recognise its true character or to develop its fruits The spirit of antiquarianism has not indeed slumbered among us It has taken form in Roxburgh Bannatyne Abbotsford and other literary Clubs producing valuable results for the use of the historian but limiting its range within the Medieval era and abandoning to isolated labourers that ampler field of research which embraces the prehistoric period of nations and belongs not to literature but to the science of Nature It was not till continental Arch ologists had shewn what legitimate induction is capable of that those of Britain were content to forsake laborious trifling and associate themselves with renewed energy of purpose to establish the study on its true footing as an indispensable link in the circle of the sciences Amid the increasing zeal for the advancement of knowledge the time appears to have at length come for the thorough elucidation of Primeval Arch ology as an element in the history of man The British Association expressly constituted for the purpose of giving a stronger impulse and a more systematic direction to scientific inquiry embraced within its original scheme no provision for the encouragement of those investigations which most directly tend to throw light on the origin and progress of the human race Physical arch ology was indeed admissible in so far as it dealt with the extinct fauna of the pal ontologist but it was practically pronounced to be without the scientific pale whenever it touched on that portion of the arch ology of the globe which comprehends the history of the race of human beings to which we ourselves belong A delusive hope was indeed raised by the publication in the first volume of the Transactions of the Association of one memoir on the contributions afforded by physical and philological researches to the history of the human species but the ethnologist was doomed to disappointment During several annual meetings elaborate and valuable memoirs prepared on various questions relating to this important branch of knowledge and to the primeval population of the British Isles were returned to their authors without being read This pregnant fact has excited little notice hitherto but when the scientific history of the first half of the nineteenth century shall come to be reviewed by those who succeed us and reap the fruits of such advancement as we now aim at it will not be overlooked as an evidence of the exoteric character of much of the overestimated science of the age Through the persevering zeal of a few resolute men of distinguished ability ethnology was at length afforded a partial footing among the recognised sciences and at the meeting of the Association to be held at Ipswich in 1851 it will for the first time take its place as a distinct section of British Science

The Scottish Golf Book Malcolm Campbell, Glyn Satterley, 1999-11-01 Golf is a Scottish game It has been played by the Scots for centuries and Scotland is its spiritual and cultural home This is a book devoted to one nation s

devotion to a game of stick and ball which today casts its enchantment over the entire world The beginnings of golf and its early development are shrouded in mystery and are part fact and part fable The Scottish Golf Book separates one from the other as it traces the early history of golf to the multimillion dollar worldwide obsession it has become today Images from the earliest days of Scottish photography recall titanic battles between the early superstars of the game while the modern lens takes the reader on a spectacular and magical journey around the historic the classic and the hidden treasures of Scotland s finest courses *Scottish Notes and Queries* John Bulloch, John Alexander Henderson, 1901 **Catalogue of Antiquities, Works of Art, and Historical Scottish Relics Exhibited in the Museum of the Archæological Institute ... During Their Annual Meeting, Held in Edinburgh, July 1856, Etc. [Edited by A. Way.]** Archaeological Institute of Great Britain and Ireland (ENGLAND), 1859 **Able Minds and Practiced Hands** Sally M. Foster, 2017-07-05 One hundred years on from J Romilly Allen and Joseph Anderson s 1903 landmark publication *The Early Christian Monuments of Scotland* twenty six essays explore the current state of knowledge of early medieval sculpture in Scotland They demonstrate the unique value of this material in contributing to our understanding of the society and people that created it between 1000 to 1500 years ago Today s approaches and techniques offer new insights as well as great hope for what might be learnt from future study of familiar and new material alike The essays exemplify the ever diversifying interdisciplinary approaches that are being taken to the study of early medieval sculpture Key themes that emerge include the interdependence of conservation research and access the need for a 21st century inventory of the sculpture the breadth and value of the wide range of the research tools that now exist conservation issues including the politics of how and where sculpture should be protected and the pressing need to identify priorities for action and what is probably the most important development over the last 100 years the increase in awareness of the range of values and significances that attaches to early medieval sculpture including appreciation of context
